FLOOD CONTROL STRUCTURES

HOW IS FLOOD PROTECTION OBTAINED ?
THE FEDERAL GOVERNMENT, THROUGH ITS AGENCIES, IS RESPONSIBLE FOR CONSTRUCTION OF THE MAJOR FLOOD CONTROL PROJECTS. THEY INVESTIGATE, PLAN, HOLD PUBLIC HEARINGS, RECOMMEND AND APPROVE PROJECTS.
AS ITS SHARE OF THE FEDERALLY APPROVED PROJECTS, THE COUNTY MUST PROVIDE RIGHTS OF WAY, PAY FOR RELOCATION OF UTILITIES, ROADS AND BRIDGES AS REQUIRED, AND MAINTAIN THE COMPLETED STRUCTURES. ON SOME MINOR PROJECTS, THE COUNTY MAY PERFORM THE CONSTRUCTION AS WELL. YOUR BOARD OF SUPERVISORS HAS AGREED TO DO THESE THINGS.
HOW WILL THIS BENEFIT ME, IF I AM NOT IN A FLOOD-PRONE AREA ? WHEN COUNTY AND CITY ROADS AND PROPERTY ARE DAMAGED, TAXPAYERS ALL OVER THE COUNTY MUST PAY FOR THE REPAIRS.
CORRECTIVE MEASURES MUST BE TAKEN TO ELIMINATE THIS THREAT TO HEALTH, SAFETY AND THE PUBLIC WELFARE, BY COMPLETION OF THIS COUNTY-WIDE PROGRAM.

FLOOD CONTROL
DISTRICT
PARTNERSHIP
The Flood Control District participates in regional projects with federal, state, county and municipal governments to maximize the use of available project funds
While the District, by law, cannot fund recreational features, many of its partners choose to do so as long as the features do not interfere with the flood control function

MARVEL OF MODERN TECHNOLOGY

Project plans to reinforce canal dikes

Storm damage, design flaw latest problems facing CAP

Water runoff rips out 300 feet of concrete lining

CAP dam to get plastic support

$20 million project would aim to prevent water seepage

The earthen dike acts as a dam to hold back storm water that drains out of the McDowell Mountains along washes, man-made channels and city streets — and would spill into the CAP canal if not intercepted.

Structural weaknesses

Cracks, corrosion found on CAP's concrete siphons

Pipe section

CAP siphon damage worse than expected

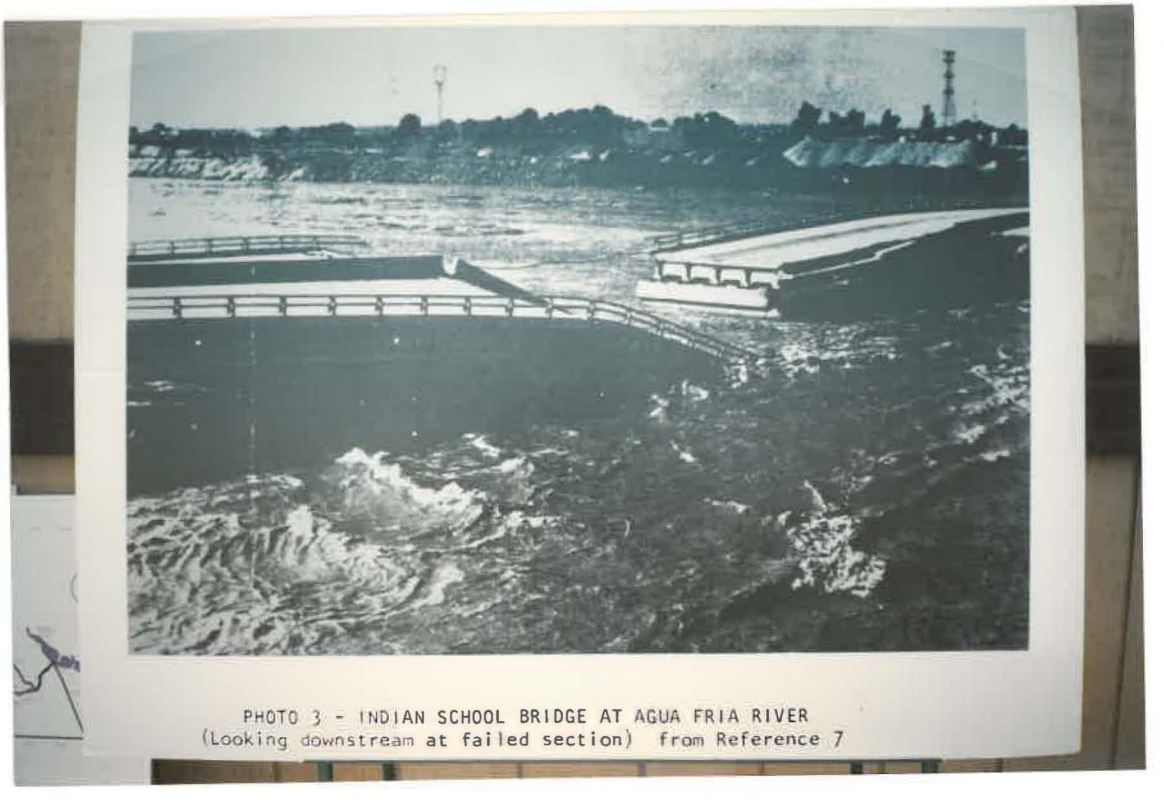

PHOTO 3 - INDIAN SCHOOL BRIDGE AT AGUA FRIA RIVER
