TABLE OF CONTENTS

TECHNICAL DATA NOTEBOOK

FLOODPLAIN DELINEATION REPORT – VOLUME HD

SECTION 1: INTRODUCTIONVOL I

 1.1 Project Location..... Vol I

 1.2 Hydraulic Methodology and Results Vol I

SECTION 2: ADWR/FEMA FORMSVOL I

SECTION 3: MAPPING AND SURVEY INFORMATIONVOL I

 3.1 Field Survey Information Vol I

 3.2 Mapping..... Vol I

 3.2.1 Hydrology Mapping Vol I

 3.2.2 Hydraulic Mapping Vol I

SECTION 4: HYDROLOGYVOL I

SECTION 5: HYDRAULICSVOL I

5.1 Method DescriptionVOL I

 5.2 Work Study Maps..... Vol I

 5.3.1 Manning’s “n” Value Vol I

 5.3.1.1 Introduction..... Vol I

 5.3.1.2 Methodology Vol I

 5.3.1.3 “n” Value Determination..... Vol I

 5.3.1.4 Bank-Station Placement Vol I

 5.3.2 Expansion and Contraction Coefficients..... Vol I

 5.4 Cross-Section Description..... Vol I

 5.4.1 Channels and Overbanks..... Vol I

5.4.2	Bridges and Constrictions	Vol I
5.4.2.1	Minor Hydraulic Structures.....	Vol I
5.4.2.2	Major Hydraulic Structures.....	Vol I
5.5	Modeling Considerations.....	Vol I
5.5.1	Hydraulic Jumps and Drop Analysis.....	Vol I
5.5.2	Bridges and Culverts.....	Vol I
5.5.3	Levees and Dikes	Vol I
5.5.4	Islands and Flow Splits	Vol I
5.5.5	Ineffective Flow Areas.....	Vol I
5.5.6	Supercritical Flow	Vol I
5.5.7	Blocked Obstructions.....	Vol I
5.5.8	Special Modeling Considerations South of the CAP	Vol I
5.5.8.1	Wash 1 East.....	Vol I
5.5.8.2	Wash 2 East.....	Vol I
5.5.8.3	Wash 3 East.....	Vol I
5.5.8.4	Wash 3 East (Zone A)	Vol I
5.5.8.5	Wash 4 East.....	Vol I
5.5.8.6	Wash 5 East.....	Vol I
5.5.8.7	Wash 5 East (Zone AO)	Vol I
5.5.8.8	Wash 6 East.....	Vol I
5.5.8.9	Wash 6 East-South	Vol I
5.5.8.10	Wash 6 East (Zone A)	Vol I
5.5.8.11	Wash 7 East (East Split).....	Vol I
5.5.8.12	Wash 7 East (West Split)	Vol I
5.5.8.13	Wash 8 East.....	Vol I
5.5.8.14	Wash 7 East and 8 East (Zone A).....	Vol I
5.5.8.15	Wash 9 East.....	Vol I
5.5.8.16	Wash 9 East-Split.....	Vol I
5.5.8.17	Wash 10 East.....	Vol I
5.5.8.18	Wash 10 East (East Split-1)	Vol I
5.5.8.19	Wash 10 East (East Split-2)	Vol I

b/c of structure

---Summary of Statistics---

	Minimum	Maximum
Left Overbank n Value:	0.03	0.093
Right Overbank n Value:	0.035	0.093
Channel n Value:	0.03	0.093
Contraction Coefficient:	0.1	0.3
Expansion Coefficient:	0.3	0.5

Typical desert washes have heavy vegetation in the wash and almost no vegetation in the overbanks. Therefore, most channel "n" values are larger than the overbanks.

ROUGHNESS COEFFICIENT CHECK

RS: 6.085
 NT RC 05 The left overbank n value of 0.044 and the right overbank n value of 0.045 are less than or equal to the channel n value of 0.054
 The overbank n values should be reevaluated.

RS: 6.062
 NT RC 05 The left overbank n value of 0.044 and the right overbank n value of 0.045 are less than or equal to the channel n value of 0.054
 The overbank n values should be reevaluated.

RS: 6.024
 NT RC 05 The left overbank n value of 0.044 and the right overbank n value of 0.045 are less than or equal to the channel n value of 0.054
 The overbank n values should be reevaluated.

RS: 5.983
 NT RC 05 The left overbank n value of 0.044 and the right overbank n value of 0.045 are less than or equal to the channel n value of 0.054
 The overbank n values should be reevaluated.

RS: 5.941
 NT RC 05 The left overbank n value of 0.044 and the right overbank n value of 0.045 are less than or equal to the channel n value of 0.054
 The overbank n values should be reevaluated.

 The overbank n values should be reevaluated.

RS: 5.806
 NT RC 05 The left overbank n value of 0.044 and the right overbank n value of 0.045 are less than or equal to the channel n value of 0.054
 The overbank n values should be reevaluated.

RS: 5.737
 NT RC 05 The left overbank n value of 0.044 and the right overbank n value of 0.045 are less than or equal to the channel n value of 0.054
 The overbank n values should be reevaluated.

RS: 5.662
 NT RC 05 The left overbank n value of 0.044 and the right overbank n value of 0.045 are less than or equal to the channel n value of 0.054
 The overbank n values should be reevaluated.

RS: 5.584
 NT RC 05 The left overbank n value of 0.044 and the right overbank n value of 0.045 are less than or equal to the channel n value of 0.054
 The overbank n values should be reevaluated.

RS: 5.519
 NT RC 05 The left overbank n value of 0.044 and the right overbank n value of 0.045 are less than or equal to the channel n value of 0.054
 The overbank n values should be reevaluated.

RS: 5.435
 NT RC 05 The left overbank n value of 0.044 and the right overbank n value of 0.045 are less than or equal to the channel n value of 0.054
 The overbank n values should be reevaluated.

The overbank n values should be reevaluated.

RS: 4.283

NT RC 05 The left overbank n value of 0.045 and the right overbank n value of 0.045 are less than or equal to the channel n value of 0.059
The overbank n values should be reevaluated.

RS: 4.21

NT RC 05 The left overbank n value of 0.045 and the right overbank n value of 0.045 are less than or equal to the channel n value of 0.059
The overbank n values should be reevaluated.

RS: 4.126

NT RC 05 The left overbank n value of 0.045 and the right overbank n value of 0.045 are less than or equal to the channel n value of 0.059
The overbank n values should be reevaluated.

RS: 3.977

NT RC 05 The left overbank n value of 0.045 and the right overbank n value of 0.045 are less than or equal to the channel n value of 0.059
The overbank n values should be reevaluated.

RS: 3.925

NT RC 05 The left overbank n value of 0.045 and the right overbank n value of 0.045 are less than or equal to the channel n value of 0.059
The overbank n values should be reevaluated.

RS: 2.748

NT RC 05 The left overbank n value of 0.051 and the right overbank n value of 0.043 are less than or equal to the channel n value of 0.064
The overbank n values should be reevaluated.

RS: 1.985

NT RC 05 The left overbank n value of 0.038 and the right overbank n value of 0.038 are less than or equal to the channel n value of 0.068
The overbank n values should be reevaluated.

RS: 1.462

NT RC 05 The left overbank n value of 0.038 and the right overbank n value of 0.038 are less than or equal to the channel n value of 0.068
The overbank n values should be reevaluated.

RS: 1.156

NT RC 01 Left overbank n value is less than 0.035
The n value for overbank is usually larger than 0.035.
The n value should be reevaluated.

RS: 1.132

NT RC 01 Left overbank n value is less than 0.035
The n value for overbank is usually larger than 0.035.
The n value should be reevaluated.

RS: 1.132

NT RC 05 The left overbank n value of 0.031 and the right overbank n value of 0.044 are less than or equal to the channel n value of 0.093
The overbank n values should be reevaluated.

TRANSITION LOSS COEFFICIENT CHECK

RS: 3.048

NT TL 02 Contraction and expansion loss coefficients are 0.3 and 0.5 respectively. However, this cross section is not at the structure.
They should be equal to 0.1 and 0.3.

RS: 1.398

NT TL 01 This is section 4
Contraction and expansion loss coefficients are 0.1 and 0.3
They should be equal to 0.3 and 0.5 respectively.

RS: 1.284

NT TL 02 Contraction and expansion loss coefficients are 0.3 and 0.5 respectively. However, this cross section is not at the structure.
They should be equal to 0.1 and 0.3.

ROUGHNESS COEFFICIENT AT STRUCTURES

RS: 3.1715

NT RS 02 The channel n value of 0.03 for the upstream internal bridge opening section is equal or larger than the channel n value of 0.03 at Section 3. Usually, the channel n value of the bridge opening section is less than the channel n value of Section 3. The selection of the n value(s) should be reevaluated.

RS: 3.1715

NT RS 02 The channel n value of 0.03 for the downstream internal bridge opening section is equal or larger than the channel n value of 0.03 at Section 2. Usually, the channel n value of the bridge opening section is less than the channel n value of Section 2. The selection of the n value(s) should be reevaluated.

FLOODWAY WIDTH CHECK

RS: 6.085
 FW FW 01 Left encroachment station 9994 is more than left channel bank station 9993.756 and less than the right channel bank station 10005.68
 Left encroachment station is within the channel.
 The encroachment station or channel bank station should be adjusted.

RS: 6.085
 FW FW 05 The 1% annual chance flood is contained within the channel.
 Right encroachment station 10006 is outside the channel.
 Right channel bank station is 10005.68
 Right encroachment station and/or right channel bank station should be adjusted.

RS: 6.085
 FW FW 06 The right station effective of 10004.72 for the floodway profile is less than the right channel bank station of 10005.68
 The right side of the floodway boundary is within the channel.
 The right encroachment station of 10006 is greater than the right channel bank station.
 The right encroachment station should be the same as the right channel bank station.

RS: 6.062
 FW FW 03 The right channel bank station may not be at the proper location.

RS: 6.062
 FW FW 06 The left station effective of 9982.64 for the floodway profile is more than the left channel bank station of 9980.09
 The left side of the floodway boundary is within the channel.
 The left encroachment station of 9980 is less than the left channel bank station.
 The left encroachment station should be the same as the left channel bank station.

RS: 6.024
 FW FW 01 Left encroachment station 9981 is more than left channel bank station 9980.712 and less than the right channel bank station 10039.93
 Left encroachment station is within the channel.
 The encroachment station or channel bank station should be adjusted.

RS: 5.983
 FW FW 01 Right encroachment station 10006 is less than right channel bank station 10006.21 and greater than the left channel bank station 9968.09
 Right encroachment station is within the channel.
 The encroachment station or channel bank station should be adjusted.

RS: 5.941
 FW FW 01 Left encroachment station 9976 is more than left channel bank station 9975.83 and less than the right channel bank station 10020.3
 Left encroachment station is within the channel.

The encroachment station or channel bank station should be adjusted.

RS: 5.941
FW FW 01 Right encroachment station 10020 is less than right channel bank station 10020.3 and greater than the left channel bank station 9975.83
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 5.874
FW FW 03 The right channel bank station may not be at the proper location.

RS: 5.806
FW FW 01 Right encroachment station 10027 is less than right channel bank station 10027.25 and greater than the left channel bank station 9984.1
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 5.737
FW FW 01 Right encroachment station 10011 is less than right channel bank station 10011.45 and greater than the left channel bank station 9984.39
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 5.584
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 5.519
FW FW 01 Left encroachment station 9968 is more than left channel bank station 9967.6 and less than the right channel bank station 10008.41
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 5.519
FW FW 01 Right encroachment station 10008 is less than right channel bank station 10008.41 and greater than the left channel bank station 9967.6
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 5.519
FW FW 03 The right channel bank station may not be at the proper location.

RS: 5.435
FW FW 01 Left encroachment station 9980 is more than left channel bank station 9979.573 and less than the right channel bank station 10020.06
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 5.361
FW FW 01 Left encroachment station 9977 is more than left channel bank station 9976.675 and less than the right channel bank station 10034.61
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 5.361
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 5.291
FW FW 03 The Left channel bank station may not be at the proper location.

SURCHARGE CHECK

DISCHARGE CHECK

STARTING WATER-SURFACE ELEVATION CHECK

FW SW 04 The name of the stream is Reach #1
Encroachment method 1 is used.
Total conveyance for the natural profile is 140591.7
Total conveyance for the floodway profile is 129240.6
The difference in conveyance between the floodway profile and the natural profile is more than 1%.
Normal Depth option with the same energy slope as the natural profile must be used for the floodway profile and rerun the plan.
This message is not applicable for the revisions.

FW SW 05 The name of stream is Reach #1
Encroachment method 1 is used.
The floodway starting water-surface elevation of 1348.50 is equal to the natural starting water-surface elevation of 1348.50
Normal depth option with the same energy slope as the natural profile must be used for the floodway profile and rerun the plan.
This message is not applicable for the revisions.

GEOMETRIC CHECK

TYPE OF FLOW CHECK

RS: 3.1715 This is Bridge #1
 BR PF 01 Type of flow is sluicagate pressure flow because,
 1. EGEL 3 of 1426.06 is equal to or less than MinTopRd of 1428.61.
 2. EGEL 3 of 1426.06 is equal to or greater than MxLoCdu of 1424.90.
 3. WSEL 2 of 1424.25 is less than MxLoCdd of 1425.80.

RS: 3.1715 This is Bridge #1
 BR PF 01 Type of flow is sluicagate pressure flow because,
 1. EGEL 3 of 1426.28 is equal to or less than MinTopRd of 1428.61.
 2. EGEL 3 of 1426.28 is equal to or greater than MxLoCdu of 1424.90.
 3. WSEL 2 of 1424.24 is less than MxLoCdd of 1425.80.

DISTANCE CHECK

RS: 3.1715 This is Bridge #1
 ST DT 01 'Distance from Upstream XS' of 0.01 is less than the height of the bridge opening of 9.00
 Section 3 should be placed at the foot of the road embankment or wing walls.
 Distances at Sections 4 & 3, and 'Distance from Upstream XS' should be adjusted.

RS: 3.1715 This is Bridge #1
 ST DT 02 The channel distance of 2.638001 at Downstream Internal Section is less than the height of the bridge opening of 8.10
 Section 2 should be placed at the foot of the road embankment or wing walls.
 Distances at Sections 4, 3 & 2 should be adjusted.

INEFFECTIVE FLOW CHECK

RS: 3.173 This is Section 3
 ST IF 01 Pressure or low flow occurs at Bridge
 However, right ineffective flow station was not considered at Section 3.
 The ineffective flow station(s) and elevations should be inserted.

RS: 3.235 This is Section 4
 ST IF 07 Ineffective flow option was considered at this section.
 However, it should be a fully expanded cross section.
 Ineffective flow stations and elevations should be cleared from this section, unless the areas beyond the ineffective flow stations are not within the flow path of the stream.
 This message should be ignored if this section is Section 2 of the upstream structure.

RS: 3.157 This is Section 1
 ST IF 07 Ineffective flow option was considered at this section.
 However, it should be a fully expanded cross section.
 Ineffective flow stations and elevations should be cleared from this section, unless the areas beyond the ineffective flow stations are not within the flow path of the stream.
 This message should be ignored if this section is Section 3 of the downstream structure.

FLOODWAY CHECK

RS: 3.1715 This is Bridge
 ST FW 01 Encroachment Method was not specified at this river station.
 For flood insurance studies Encroachment Methods 4 and 1 should be used.

RS: 3.17 This is Section 2
 ST FW 04 The left encroachment station of 9991 is greater than the left bank station of 9990.5
 The left encroachment station is within the channel.
 The encroachment station and/or channel bank station should be reevaluated.

RS: 3.173 This is Section 3
 ST FW 03 The right station effective of 10271.21 for the natural profile is greater than right most abutment station of 10051.83
 The 1% annual chance floodplain is outside the structure opening area.
 The right encroachment station of 10051 is less than the right abutment station of 10051.83
 The encroachment station should be recomputed.

RS: 3.173 This is Section 3
 ST FW 10 Left encroachment station 9951 is more than the left ineffective flow station 9502.39 and equal to or greater than the right ineffective flow station -9999
 The effective flow area is totally blocked by the encroachment stations.
 The encroachment stations should be adjusted.

GEOMETRIC CHECK

TYPE OF FLOW CHECK

RS: 3.13 This is CULVERT#1
 CV PF 01 Type of flow is pressure flow because,
 1. EGEL 3 of 1423.74 is less than or equal to MinTopRd of 1423.79.
 2. CulvWSIn of 1422.10 is greater than or equal to MxLoCdU of 1422.10.
 3. CulvWSOut of 1421.20 is greater than or equal to MxLoCdD of 1421.20.

RS: 3.13 This is CULVERT#1
 CV PW 01 Type of flow is pressure and weir flow because,
 1. EGEL 3 of 1424.13 is greater than MinTopRd of 1423.83.
 2. CulvWSIn of 1422.10 is greater than or equal to MxLoCdU of 1422.10.
 3. CulvWSOut of 1421.20 is greater than or equal to MxLoCdD of 1421.20.

DISTANCE CHECK

RS: 3.13 This is CULVERT#1
 ST DT 01 'Culvert Upstrm Dist' of 0.01 is less than the height of the culvert opening of 4 .
 Section 3 should be placed at the foot of the road embankment or wing walls.
 Distances at Sections 4 & 3, and 'Distance from Upstream XS' should be adjusted.

CULVERT COEFFICIENT CHECK

CULVERT CRITERIA CHECK

INEFFECTIVE FLOW CHECK

RS: 3.151 This is Section 3.
 ST IF 03 Pressure flow occurs at the structure. Ineffective flow is considered at Section 3.
 However, the velocity head at Section 3 is more than 0.5 foot and more than the velocity head at section 4.
 The ineffective flow stations should be widened until the velocity head at Section 3 is equal to or less than 0.5 foot, or equal to or less than the velocity head at Section 4.

RS: 3.109 This is Section 2
 ST IF 06 Pressure flow occurs at Culvert Group 1
 The velocity head at Section 2 is more than 0.5
 The computed left ineffective flow station of 9973.15 is less than the selected left ineffective flow station of 9973.6
 The left ineffective flow station should be adjusted.

RS: 3.157 This is Section 4
 ST IF 07 Ineffective flow option was considered at this section.
 However, it should be a fully expanded cross section.
 Ineffective flow stations and elevations should be cleared from this section, unless the areas beyond the ineffective flow stations are not within the flow path of the stream.
 This message should be ignored if this section is Section 2 of the upstream structure.

FLOODWAY CHECK

RS: 3.13 This is Culvert
 ST FW 01 Encroachment Method was not specified at this river station.
 For flood insurance studies Encroachment Methods 4 and 1
 should be used.

RS: 3.13 This is Culvert
 ST FW 09 The right most weir station of 10008.46 for the floodway profile is equal
 or greater than the right most weir station of 9949.96 for the natural
 profile.
 The floodway weir flow boundary is equal to or outside of the
 natural profile weir flow boundary.
 Encroachment computations should be investigated.

RS: 3.109 This is Section 2
 ST FW 04 The left encroachment station of 9974 is greater than the
 left bank station of 9973.7
 The left encroachment station is within the channel.
 The encroachment station and/or channel bank station should be reevaluated.

RS: 3.109 This is Section 2
 ST FW 08 The right station effective of 10049.04 for the natural profile.
 is greater than the right channel bank station of 10038.7
 The right encroachment station is outside the channel.
 The right encroachment station of 10053 is greater than the right
 station effective of 10049.04 for the natural profile.
 The right encroachment station should be adjusted.

RS: 3.109 This is Section 2
 ST FW 10 Left encroachment station 9974 is more than the left ineffective flow
 station 9973.6 and less than the right ineffective flow station 10053.4
 Left encroachment station is within the effective flow area.
 Left encroachment station should at least be equal to the left
 ineffective flow station.

RS: 3.109 This is Section 2
 ST FW 10 Right encroachment station 10053 is less than the right ineffective flow
 station 10053.4 and greater than the left ineffective flow station 9973.6
 Right encroachment station is within the effective flow area.
 Right encroachment station should at least be equal to the right
 ineffective flow station.

RS: 3.151 This is Section 3
 ST FW 08 The right station effective of 10021.05 for the natural profile.
 is greater than the right channel bank station of 10017.8
 The right encroachment station is outside the channel.
 The right encroachment station of 10027 is greater than the right
 station effective of 10021.05 for the natural profile.
 The right encroachment station should be adjusted.

RS: 3.151 This is Section 3
 ST FW 10 Left encroachment station 9962 is more than the left ineffective flow
 station 9954.28 and less than the right ineffective flow station 10023.6
 Left encroachment station is within the effective flow area.
 Left encroachment station should at least be equal to the left
 ineffective flow station.

CULVERT CRITERIA CHECK

INEFFECTIVE FLOW CHECK

RS: 1.398 This is Section 4
ST IF 07 Ineffective flow option was considered at this section.
However, it should be a fully expanded cross section.
Ineffective flow stations and elevations should be cleared from
this section, unless the areas beyond the ineffective flow stations
are not within the flow path of the stream.
This message should be ignored if this section is Section 2 of
the upstream structure.

RS: 1.284 This is Section 1
ST IF 07 Ineffective flow option was considered at this section.
However, it should be a fully expanded cross section.
Ineffective flow stations and elevations should be cleared from
this section, unless the areas beyond the ineffective flow stations
are not within the flow path of the stream.
This message should be ignored if this section is Section 3 of the downstream
structure.

RS: 1.398 This is Section 4
ST IF 07 Ineffective flow option was considered at this section.
However, it should be a fully expanded cross section.
Ineffective flow stations and elevations should be cleared from
this section, unless the areas beyond the ineffective flow stations
are not within the flow path of the stream.
This message should be ignored if this section is Section 2 of
the upstream structure.

RS: 1.284 This is Section 1

B/c very defined channel that meanders.

---Summary of Statistics---

	Minimum	Maximum
Left Overbank n Value:	0.039	0.062
Right Overbank n Value:	0.039	0.049
Channel n Value:	0.051	0.062
Contraction Coefficient:	0.1	0.2
Expansion Coefficient:	0.3	0.4

Typical desert washes have heavy vegetation in the wash and almost no vegetation in the overbanks. Therefore, most channel "n" values are larger than the overbanks.

ROUGHNESS COEFFICIENT CHECK

RS: 2.418
 NT RC 05 The left overbank n value of 0.039 and the right overbank n value of 0.039 are less than or equal to the channel n value of 0.051
 The overbank n values should be reevaluated.

of 0.049 are less than or equal to the channel n value of 0.06
The overbank n values should be reevaluated.

RS: 0.535
NT RC 05 The left overbank n value of 0.044 and the right overbank n value
of 0.049 are less than or equal to the channel n value of 0.06
The overbank n values should be reevaluated.

RS: 0.462
NT RC 05 The left overbank n value of 0.044 and the right overbank n value
of 0.049 are less than or equal to the channel n value of 0.06
The overbank n values should be reevaluated.

RS: 0.416
NT RC 05 The left overbank n value of 0.044 and the right overbank n value
of 0.049 are less than or equal to the channel n value of 0.06
The overbank n values should be reevaluated.

RS: 0.355
NT RC 05 The left overbank n value of 0.044 and the right overbank n value
of 0.049 are less than or equal to the channel n value of 0.06
The overbank n values should be reevaluated.

RS: 0.315
NT RC 05 The left overbank n value of 0.048 and the right overbank n value
of 0.048 are less than or equal to the channel n value of 0.062
The overbank n values should be reevaluated.

TRANSITION LOSS COEFFICIENT CHECK

RS: 2.17
NT TL 02 Contraction and expansion loss coefficients are 0.2 and 0.4
respectively. However, this cross section is not at the structure.
They should be equal to 0.1 and 0.3.

RS: 2.108
NT TL 02 Contraction and expansion loss coefficients are 0.2 and 0.4
respectively. However, this cross section is not at the structure.
They should be equal to 0.1 and 0.3.

RS: 2.078
NT TL 02 Contraction and expansion loss coefficients are 0.2 and 0.4
respectively. However, this cross section is not at the structure.
They should be equal to 0.1 and 0.3.

RS: 2.051
NT TL 02 Contraction and expansion loss coefficients are 0.2 and 0.4
respectively. However, this cross section is not at the structure.
They should be equal to 0.1 and 0.3.

ENCROACHMENT METHOD CHECK

FLOODWAY WIDTH CHECK

RS: 2.418
FW FW 04 The left station effective of 9996.58 for 1% annual chance floodplain is less than the left channel bank station 9998.04
The 1% annual chance floodplain is outside the channel.
However, the left encroachment station (9979) is outside of 1% annual chance floodplain.
The left encroachment station should be adjusted.

RS: 2.418
FW FW 04 The right station effective of 10006.4 for 1% annual chance floodplain is greater than the right channel bank station (10004.76).
The 1% annual chance floodplain is outside the channel.
However, the right encroachment station (10027) is outside of 1% annual chance floodplain.
The right encroachment station should be adjusted.

RS: 2.377
FW FW 05 The 1% annual chance flood is contained within the channel.
Left encroachment station 9912 is outside the channel.
Left channel bank station is 9983.65
Left encroachment station and/or left channel bank station should be adjusted.

RS: 2.377
FW FW 05 The 1% annual chance flood is contained within the channel.
Right encroachment station 10046 is outside the channel.
Right channel bank station is 10013.87
Right encroachment station and/or right channel bank station should be adjusted.

RS: 2.377
FW FW 06 The left station effective of 9984.67 for the floodway profile is more than the left channel bank station of 9983.65
The left side of the floodway boundary is within the channel.
The left encroachment station of 9912 is less than the left channel bank station.
The left encroachment station should be the same as the left channel bank station.

RS: 2.377
FW FW 06 The right station effective of 10013.69 for the floodway profile is less than the right channel bank station of 10013.87
The right side of the floodway boundary is within the channel.
The right encroachment station of 10046 is greater than the right channel bank station.
The right encroachment station should be the same as the right channel bank station.

RS: 2.336
 FW FW 05 The 1% annual chance flood is contained within the channel.
 Left encroachment station 9988 is outside the channel.
 Left channel bank station is 9988.21
 Left encroachment station and/or left channel bank station should be adjusted.

RS: 2.336
 FW FW 05 The 1% annual chance flood is contained within the channel.
 Right encroachment station 10021 is outside the channel.
 Right channel bank station is 10020.55
 Right encroachment station and/or right channel bank station should be adjusted.

RS: 2.336
 FW FW 06 The left station effective of 9989.37 for the floodway profile is more
 than the left channel bank station of 9988.21
 The left side of the floodway boundary is within the channel.
 The left encroachment station of 9988 is less than the left channel
 bank station.
 The left encroachment station should be the same as the left
 channel bank station.

RS: 2.336
 FW FW 06 The right station effective of 10019.46 for the floodway profile is less
 than the right channel bank station of 10020.55
 The right side of the floodway boundary is within the channel.
 The right encroachment station of 10021 is greater than the right channel
 bank station.
 The right encroachment station should be the same as the right
 channel bank station.

RS: 2.305
 FW FW 01 Left encroachment station 9995 is more than left channel bank
 station 9994.961 and less than the right channel bank station 10011.98
 Left encroachment station is within the channel.
 The encroachment station or channel bank station should be adjusted.

RS: 2.305
 FW FW 03 The Left channel bank station may not be at the proper
 location.

RS: 2.23
 FW FW 03 The Left channel bank station may not be at the proper
 location.

RS: 2.23
 FW FW 03 The right channel bank station may not be at the proper
 location.

RS: 2.23
 FW FW 04 The right station effective of 10009.24 for 1% annual chance floodplain
 is greater than the right channel bank station (10008.15).
 The 1% annual chance floodplain is outside the channel.
 However, the right encroachment station (10010) is outside of 1% annual
 chance floodplain.
 The right encroachment station should be adjusted.

RS: 2.17
 FW FW 01 Left encroachment station 9982 is more than left channel bank
 station 9981.68 and less than the right channel bank station 10017.38
 Left encroachment station is within the channel.
 The encroachment station or channel bank station should be adjusted.

RS: 2.17
 FW FW 01 Right encroachment station 10017 is less than right channel bank
 station 10017.38 and greater than the left channel bank station 9981.68
 Right encroachment station is within the channel.
 The encroachment station or channel bank station should be adjusted.

RS: 2.108
 FW FW 01 Left encroachment station 9980 is more than left channel bank
 station 9979.82 and less than the right channel bank station 10018.03
 Left encroachment station is within the channel.
 The encroachment station or channel bank station should be adjusted.

RS: 2.108
FW FW 01 Right encroachment station 10018 is less than right channel bank station 10018.03 and greater than the left channel bank station 9979.82 Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 2.108
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 2.108
FW FW 03 The right channel bank station may not be at the proper location.

RS: 2.078
FW FW 01 Left encroachment station 9978 is more than left channel bank station 9977.67 and less than the right channel bank station 10058.1 Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 2.078
FW FW 01 Right encroachment station 10058 is less than right channel bank station 10058.1 and greater than the left channel bank station 9977.67 Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 2.051
FW FW 01 Left encroachment station 9988 is more than left channel bank station 9987.75 and less than the right channel bank station 10044.38 Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 2.051
FW FW 01 Right encroachment station 10044 is less than right channel bank station 10044.38 and greater than the left channel bank station 9987.75 Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 2.051

RS: 1.992
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 1.822
FW FW 01 Left encroachment station 9971 is more than left channel bank station 9970.55 and less than the right channel bank station 10013.7 Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 1.796
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 1.796
FW FW 03 The right channel bank station may not be at the proper location.

RS: 1.796
FW FW 04 The left station effective of 9952.56 for 1% annual chance floodplain is less than the left channel bank station 9978.67 The 1% annual chance floodplain is outside the channel.
However, the left encroachment station (9872) is outside of 1% annual chance floodplain.
The left encroachment station should be adjusted.

RS: 1.796
FW FW 04 The right station effective of 10064.34 for 1% annual chance floodplain is greater than the right channel bank station (10024.72).
The 1% annual chance floodplain is outside the channel.
However, the right encroachment station (10144) is outside of 1% annual chance floodplain.

The right encroachment station should be adjusted.

- RS: 1.772
FW FW 04 The left station effective of 9985.79 for 1% annual chance floodplain is less than the left channel bank station 9985.791
The 1% annual chance floodplain is outside the channel.
However, the left encroachment station (9900) is outside of 1% annual chance floodplain.
The left encroachment station should be adjusted.
- RS: 1.772
FW FW 06 The left station effective of 9985.8 for the floodway profile is more than the left channel bank station of 9985.791
The left side of the floodway boundary is within the channel.
The left encroachment station of 9900 is less than the left channel bank station.
The left encroachment station should be the same as the left channel bank station.
- RS: 1.772
FW FW 06 The right station effective of 10012.42 for the floodway profile is less than the right channel bank station of 10012.43
The right side of the floodway boundary is within the channel.
The right encroachment station of 10060 is greater than the right channel bank station.
The right encroachment station should be the same as the right channel bank station.
- RS: 1.709
FW FW 01 Right encroachment station 10013 is less than right channel bank station 10013.39 and greater than the left channel bank station 9975.05
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.
- RS: 1.481
FW FW 01 Left encroachment station 9983 is more than left channel bank station 9982.52 and less than the right channel bank station 10024.4
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.
- RS: 1.43
FW FW 01 Right encroachment station 10020 is less than right channel bank station 10020.51 and greater than the left channel bank station 9981.307
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.
- RS: 1.336
FW FW 04 The left station effective of 9980.63 for 1% annual chance floodplain is less than the left channel bank station 9983.573
The 1% annual chance floodplain is outside the channel.
However, the left encroachment station (9980) is outside of 1% annual chance floodplain.
The left encroachment station should be adjusted.
- RS: 1.269
FW FW 01 Right encroachment station 10038 is less than right channel bank station 10038.67 and greater than the left channel bank station 9966.169
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.
- RS: 1.269
FW FW 05 The 1% annual chance flood is contained within the channel.
Left encroachment station 9966 is outside the channel.
Left channel bank station is 9966.169
Left encroachment station and/or left channel bank station should be adjusted.
- RS: 1.227
FW FW 01 Right encroachment station 10011 is less than right channel bank station 10011.2 and greater than the left channel bank station 9972.865
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.
- RS: 1.227
FW FW 03 The right channel bank station may not be at the proper

location.

- RS: 1.176
 FW FW 04 The left station effective of 9956.33 for 1% annual chance floodplain is less than the left channel bank station 9956.345
 The 1% annual chance floodplain is outside the channel.
 However, the left encroachment station (9954) is outside of 1% annual chance floodplain.
 The left encroachment station should be adjusted.
- RS: 1.176
 FW FW 04 The right station effective of 10023.32 for 1% annual chance floodplain is greater than the right channel bank station (10023.31).
 The 1% annual chance floodplain is outside the channel.
 However, the right encroachment station (10027) is outside of 1% annual chance floodplain.
 The right encroachment station should be adjusted.
- RS: 1.176
 FW FW 06 The left station effective of 9956.35 for the floodway profile is more than the left channel bank station of 9956.345
 The left side of the floodway boundary is within the channel.
 The left encroachment station of 9954 is less than the left channel bank station.
 The left encroachment station should be the same as the left channel bank station.
- RS: 1.176

---Summary of Statistics---

	Minimum	Maximum
Left Overbank n Value:	0.044	0.048
Right Overbank n Value:	0.048	0.049
Channel n Value:	0.06	0.062
Contraction Coefficient:	0.1	0.1
Expansion Coefficient:	0.3	0.3

Typical desert washes have heavy vegetation in the wash and almost no vegetation in the overbanks. Therefore, most channel "n" values are larger than the overbanks.

ROUGHNESS COEFFICIENT CHECK

---Summary of Statistics---

	Minimum	Maximum
Left Overbank n Value:	0.034	0.051
Right Overbank n Value:	0.031	0.037
Channel n Value:	0.031	0.065
Contraction Coefficient:	0.1	0.3
Expansion Coefficient:	0.3	0.5

Typical desert washes have heavy vegetation in the wash and almost no vegetation in the overbanks. Therefore, most channel "n" values are larger than the overbanks.

ROUGHNESS COEFFICIENT CHECK

- RS: 5.146
 NT RC 05 The left overbank n value of 0.035 and the right overbank n value of 0.037 are less than or equal to the channel n value of 0.052
 The overbank n values should be reevaluated.
- RS: 5.12
 NT RC 05 The left overbank n value of 0.035 and the right overbank n value of 0.037 are less than or equal to the channel n value of 0.052
 The overbank n values should be reevaluated.
- RS: 5.064
 NT RC 05 The left overbank n value of 0.035 and the right overbank n value of 0.037 are less than or equal to the channel n value of 0.052
 The overbank n values should be reevaluated.
- RS: 5.016
 NT RC 05 The left overbank n value of 0.035 and the right overbank n value of 0.037 are less than or equal to the channel n value of 0.052

of 0.037 are less than or equal to the channel n value of 0.065
The overbank n values should be reevaluated.

RS: 4.111

NT RC 05 The left overbank n value of 0.037 and the right overbank n value
of 0.037 are less than or equal to the channel n value of 0.065
The overbank n values should be reevaluated.

RS: 4.052

NT RC 05 The left overbank n value of 0.037 and the right overbank n value
of 0.037 are less than or equal to the channel n value of 0.065
The overbank n values should be reevaluated.

RS: 4.01

NT RC 05 The left overbank n value of 0.037 and the right overbank n value
of 0.037 are less than or equal to the channel n value of 0.065
The overbank n values should be reevaluated.

RS: 3.938

NT RC 05 The left overbank n value of 0.037 and the right overbank n value
of 0.037 are less than or equal to the channel n value of 0.065
The overbank n values should be reevaluated.

RS: 3.853

NT RC 05 The left overbank n value of 0.037 and the right overbank n value
of 0.037 are less than or equal to the channel n value of 0.065
The overbank n values should be reevaluated.

RS: 3.785

NT RC 05 The left overbank n value of 0.037 and the right overbank n value
of 0.037 are less than or equal to the channel n value of 0.065
The overbank n values should be reevaluated.

RS: 3.734

NT RC 05 The left overbank n value of 0.037 and the right overbank n value
of 0.037 are less than or equal to the channel n value of 0.065
The overbank n values should be reevaluated.

RS: 3.721

NT RC 05 The left overbank n value of 0.037 and the right overbank n value
of 0.037 are less than or equal to the channel n value of 0.065
The overbank n values should be reevaluated.

RS: 2.765

NT RC 01 Left overbank n value is less than 0.035
The n value for overbank is usually larger than 0.035.
The n value should be reevaluated.

RS: 2.765

NT RC 01 Right overbank n value is less than 0.035
The n value for overbank is usually larger than 0.035.
The n value should be reevaluated.

RS: 2.765

NT RC 05 The left overbank n value of 0.034 and the right overbank n value
of 0.031 are less than or equal to the channel n value of 0.05
The overbank n values should be reevaluated.

RS: 2.693

NT RC 01 Left overbank n value is less than 0.035
The n value for overbank is usually larger than 0.035.
The n value should be reevaluated.

RS: 2.693

NT RC 01 Right overbank n value is less than 0.035
The n value for overbank is usually larger than 0.035.
The n value should be reevaluated.

RS: 2.693

NT RC 05 The left overbank n value of 0.034 and the right overbank n value
of 0.031 are less than or equal to the channel n value of 0.05
The overbank n values should be reevaluated.

RS: 2.61

NT RC 01 Left overbank n value is less than 0.035
The n value for overbank is usually larger than 0.035.
The n value should be reevaluated.

RS: 2.61

NT RC 01 Right overbank n value is less than 0.035
The n value for overbank is usually larger than 0.035.
The n value should be reevaluated.

RS: 2.61

NT RC 05 The left overbank n value of 0.034 and the right overbank n value
of 0.031 are less than or equal to the channel n value of 0.05
The overbank n values should be reevaluated.

RS: 2.555

NT RC 01 Left overbank n value is less than 0.035
The n value for overbank is usually larger than 0.035.
The n value should be reevaluated.

RS: 2.555

NT RC 01 Right overbank n value is less than 0.035
The n value for overbank is usually larger than 0.035.
The n value should be reevaluated.

RS: 2.555

NT RC 05 The left overbank n value of 0.034 and the right overbank n value
of 0.031 are less than or equal to the channel n value of 0.05
The overbank n values should be reevaluated.

RS: 2.489

NT RC 01 Left overbank n value is less than 0.035
The n value for overbank is usually larger than 0.035.
The n value should be reevaluated.

RS: 2.489

NT RC 01 Right overbank n value is less than 0.035
The n value for overbank is usually larger than 0.035.
The n value should be reevaluated.

RS: 2.489

NT RC 05 The left overbank n value of 0.034 and the right overbank n value
of 0.031 are less than or equal to the channel n value of 0.05
The overbank n values should be reevaluated.

RS: 2.422

NT RC 01 Left overbank n value is less than 0.035
The n value for overbank is usually larger than 0.035.
The n value should be reevaluated.

RS: 2.422

NT RC 01 Right overbank n value is less than 0.035
The n value for overbank is usually larger than 0.035.
The n value should be reevaluated.

RS: 2.422

NT RC 05 The left overbank n value of 0.034 and the right overbank n value
of 0.031 are less than or equal to the channel n value of 0.05
The overbank n values should be reevaluated.

RS: 2.381

NT RC 01 Left overbank n value is less than 0.035
The n value for overbank is usually larger than 0.035.
The n value should be reevaluated.

RS: 2.381

NT RC 01 Right overbank n value is less than 0.035
The n value for overbank is usually larger than 0.035.
The n value should be reevaluated.

RS: 2.381

NT RC 05 The left overbank n value of 0.034 and the right overbank n value
of 0.031 are less than or equal to the channel n value of 0.05
The overbank n values should be reevaluated.

RS: 2.302
 NT RC 01 Left overbank n value is less than 0.035
 The n value for overbank is usually larger then 0.035.
 The n value should be reevaluated.

RS: 2.302
 NT RC 01 Right overbank n value is less than 0.035
 The n value for overbank is usually larger then 0.035.
 The n value should be reevaluated.

RS: 2.302
 NT RC 05 The left overbank n value of 0.034 and the right overbank n value
 of 0.031 are less than or equal to the channel n value of 0.05
 The overbank n values should be reevaluated.

RS: 2.257
 NT RC 01 Left overbank n value is less than 0.035
 The n value for overbank is usually larger then 0.035.
 The n value should be reevaluated.

RS: 2.257
 NT RC 01 Right overbank n value is less than 0.035
 The n value for overbank is usually larger then 0.035.
 The n value should be reevaluated.

RS: 2.257
 NT RC 05 The left overbank n value of 0.034 and the right overbank n value
 of 0.031 are less than or equal to the channel n value of 0.05
 The overbank n values should be reevaluated.

RS: 2.208
 NT RC 01 Left overbank n value is less than 0.035
 The n value for overbank is usually larger then 0.035.
 The n value should be reevaluated.

RS: 2.208
 NT RC 01 Right overbank n value is less than 0.035
 The n value for overbank is usually larger then 0.035.
 The n value should be reevaluated.

RS: 2.208
 NT RC 05 The left overbank n value of 0.034 and the right overbank n value
 of 0.031 are less than or equal to the channel n value of 0.05
 The overbank n values should be reevaluated.

RS: 2.131
 NT RC 01 Left overbank n value is less than 0.035
 The n value for overbank is usually larger then 0.035.
 The n value should be reevaluated.

RS: 2.131
 NT RC 01 Right overbank n value is less than 0.035
 The n value for overbank is usually larger then 0.035.
 The n value should be reevaluated.

RS: 2.131
 NT RC 05 The left overbank n value of 0.034 and the right overbank n value
 of 0.031 are less than or equal to the channel n value of 0.05
 The overbank n values should be reevaluated.

RS: 2.052
 NT RC 01 Left overbank n value is less than 0.035
 The n value for overbank is usually larger then 0.035.
 The n value should be reevaluated.

NT RC 01 Left overbank n value is less than 0.035
The n value for overbank is usually larger than 0.035.
The n value should be reevaluated.

RS: 1.414

NT RC 01 Right overbank n value is less than 0.035
The n value for overbank is usually larger than 0.035.
The n value should be reevaluated.

RS: 1.414

NT RC 05 The left overbank n value of 0.034 and the right overbank n value
of 0.031 are less than or equal to the channel n value of 0.05
The overbank n values should be reevaluated.

RS: 1.329

NT RC 01 Left overbank n value is less than 0.035
The n value for overbank is usually larger than 0.035.
The n value should be reevaluated.

RS: 1.329

NT RC 01 Right overbank n value is less than 0.035
The n value for overbank is usually larger than 0.035.
The n value should be reevaluated.

RS: 1.329

NT RC 05 The left overbank n value of 0.034 and the right overbank n value
of 0.031 are less than or equal to the channel n value of 0.05
The overbank n values should be reevaluated.

RS: 1.298

NT RC 01 Left overbank n value is less than 0.035
The n value for overbank is usually larger than 0.035.
The n value should be reevaluated.

RS: 1.298

NT RC 01 Right overbank n value is less than 0.035
The n value for overbank is usually larger than 0.035.
The n value should be reevaluated.

RS: 1.298

NT RC 05 The left overbank n value of 0.034 and the right overbank n value

5E

of 0.031 are less than or equal to the channel n value of 0.05
The overbank n values should be reevaluated.

RS: 1.264

NT RC 01 Left overbank n value is less than 0.035
The n value for overbank is usually larger than 0.035.
The n value should be reevaluated.

RS: 1.264

NT RC 01 Right overbank n value is less than 0.035
The n value for overbank is usually larger than 0.035.
The n value should be reevaluated.

RS: 1.264

NT RC 05 The left overbank n value of 0.034 and the right overbank n value
of 0.031 are less than or equal to the channel n value of 0.05
The overbank n values should be reevaluated.

RS: 1.22

NT RC 01 Left overbank n value is less than 0.035
The n value for overbank is usually larger than 0.035.
The n value should be reevaluated.

RS: 1.22

NT RC 01 Right overbank n value is less than 0.035
The n value for overbank is usually larger than 0.035.
The n value should be reevaluated.

RS: 1.22

NT RC 05 The left overbank n value of 0.034 and the right overbank n value
of 0.031 are less than or equal to the channel n value of 0.05
The overbank n values should be reevaluated.

TRANSITION LOSS COEFFICIENT CHECK

RS: 5.146

NT TL 02 Contraction and expansion loss coefficients are 0.3 and 0.5
respectively. However, this cross section is not at the structure.
They should be equal to 0.1 and 0.3.

RS: 5.12

NT TL 02 Contraction and expansion loss coefficients are 0.3 and 0.5
respectively. However, this cross section is not at the structure.
They should be equal to 0.1 and 0.3.

ENCROACHMENT METHOD CHECK

FLOODWAY WIDTH CHECK

RS: 5.146
FW FW 01 Left encroachment station 9988 is more than left channel bank station 9987.55 and less than the right channel bank station 10008.47
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 5.146
FW FW 01 Right encroachment station 10008 is less than right channel bank station 10008.47 and greater than the left channel bank station 9987.55
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 5.12
FW FW 01 Right encroachment station 10051 is less than right channel bank station 10051.17 and greater than the left channel bank station 9986.119
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 5.064
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 5.064
FW FW 03 The right channel bank station may not be at the proper location.

RS: 5.016
FW FW 01 Left encroachment station 9992 is more than left channel bank station 9975.8 and less than the right channel bank station 10015.81
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 4.881
FW FW 03 The right channel bank station may not be at the proper location.

RS: 4.847
FW FW 01 Left encroachment station 9974 is more than left channel bank station 9973.91 and less than the right channel bank station 10014.13
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 4.806
FW FW 01 Left encroachment station 9992 is more than left channel bank station 9991.975 and less than the right channel bank station 10023.82
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 4.696
FW FW 01 Right encroachment station 10012 is less than right channel bank station 10012.31 and greater than the left channel bank station 9982.13
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 4.696
FW FW 03 The right channel bank station may not be at the proper location.

RS: 4.63
FW FW 01 Left encroachment station 9992 is more than left channel bank station 9991.77 and less than the right channel bank station 10023.72
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 4.58
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 4.58
FW FW 03 The right channel bank station may not be at the proper location.

location.

RS: 4.534
 FW FW 01 Right encroachment station 10014 is less than right channel bank station 10014.34 and greater than the left channel bank station 9945.2. Right encroachment station is within the channel. The encroachment station or channel bank station should be adjusted.

RS: 4.534
 FW FW 03 The Left channel bank station may not be at the proper location.

RS: 4.487
 FW FW 01 Left encroachment station 9967 is more than left channel bank station 9966.89 and less than the right channel bank station 10027.93. Left encroachment station is within the channel. The encroachment station or channel bank station should be adjusted.

RS: 4.487
 FW FW 03 The Left channel bank station may not be at the proper location.

RS: 4.444
 FW FW 03 The Left channel bank station may not be at the proper location.

RS: 4.381
 FW FW 03 The Left channel bank station may not be at the proper location.

RS: 4.318
 FW FW 03 The right channel bank station may not be at the proper location.

RS: 4.318
 FW FW 04 The left station effective of 9889.88 for 1% annual chance floodplain is less than the left channel bank station 9964.314. The 1% annual chance floodplain is outside the channel. However, the left encroachment station (9880) is outside of 1% annual chance floodplain. The left encroachment station should be adjusted.

RS: 4.26
 FW FW 03 The Left channel bank station may not be at the proper location.

RS: 4.26
 FW FW 03 The right channel bank station may not be at the proper location.

RS: 4.111
 FW FW 03 The right channel bank station may not be at the proper location.

RS: 3.938
 FW FW 03 The Left channel bank station may not be at the proper location.

RS: 3.853
 FW FW 03 The right channel bank station may not be at the proper location.

RS: 3.785
 FW FW 01 Left encroachment station 9983 is more than left channel bank station 9982.96 and less than the right channel bank station 10015.27. Left encroachment station is within the channel. The encroachment station or channel bank station should be adjusted.

RS: 3.785
 FW FW 01 Right encroachment station 10015 is less than right channel bank station 10015.27 and greater than the left channel bank station 9982.96. Right encroachment station is within the channel. The encroachment station or channel bank station should be adjusted.

RS: 3.785
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 3.785
FW FW 03 The right channel bank station may not be at the proper location.

RS: 3.734
FW FW 03 The right channel bank station may not be at the proper location.

RS: 3.721
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 3.721
FW FW 03 The right channel bank station may not be at the proper location.

RS: 3.711
FW FW 01 Right encroachment station 10039 is less than right channel bank station 10039.71 and greater than the left channel bank station 9982.47
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 3.711
FW FW 06 The left station effective of 9982.94 for the floodway profile is more than the left channel bank station of 9982.47
The left side of the floodway boundary is within the channel.
The left encroachment station of 9980 is less than the left channel bank station.
The left encroachment station should be the same as the left channel bank station.

RS: 3.424
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 3.147
FW FW 03 The right channel bank station may not be at the proper location.

RS: 3.06

RS: 2.765
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 2.693
FW FW 01 Left encroachment station 9970 is more than left channel bank station 9969.591 and less than the right channel bank station 10047.03
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 2.693
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 2.555
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 2.489
FW FW 01 Left encroachment station 9981 is more than left channel bank station 9980.55 and less than the right channel bank station 10016.71
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 2.422
FW FW 03 The right channel bank station may not be at the proper location.

RS: 2.302
FW FW 01 Right encroachment station 10010 is less than right channel bank station 10010.06 and greater than the left channel bank station 9967.785
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 2.257
FW FW 01 Left encroachment station 9984 is more than left channel bank station 9983.542 and less than the right channel bank station 10019.82
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 2.208
FW FW 01 Left encroachment station 9977 is more than left channel bank station 9976.886 and less than the right channel bank station 10017.71
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 2.208
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 2.131
FW FW 01 Left encroachment station 9968 is more than left channel bank station 9967.628 and less than the right channel bank station 10032.56
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 1.683
FW FW 01 Right encroachment station 10020 is less than right channel bank station 10020.31 and greater than the left channel bank station 9980.684
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 1.329
FW FW 03 The right channel bank station may not be at the proper location.

RS: 1.298
FW FW 06 The left station effective of 9959.3 for the floodway profile is more than the left channel bank station of 9958.175
The left side of the floodway boundary is within the channel.
The left encroachment station of 9953 is less than the left channel bank station.
The left encroachment station should be the same as the left channel bank station.

RS: 1.22
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 1.115
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 1.115
FW FW 03 The right channel bank station may not be at the proper location.

SURCHARGE CHECK

DISCHARGE CHECK

RS: 3.711
FW FD 01 The floodway discharge of 800 is not equal to the natural 1% chance

discharge of 1500

---Summary of Statistics---

	Minimum	Maximum
Left Overbank n Value:	0.035	0.053
Right Overbank n Value:	0.031	0.051
Channel n Value:	0.037	0.053
Contraction Coefficient:	0.1	0.2
Expansion Coefficient:	0.3	0.4

Typical desert washes have heavy vegetation in the wash and almost no vegetation in the overbanks. Therefore, most channel "n" values are larger than the overbanks.

ROUGHNESS COEFFICIENT CHECK

RS: 4.966
 NT RC 05 The left overbank n value of 0.035 and the right overbank n value of 0.036 are less than or equal to the channel n value of 0.05
 The overbank n values should be reevaluated.

RS: 4.896
 NT RC 05 The left overbank n value of 0.035 and the right overbank n value of 0.036 are less than or equal to the channel n value of 0.05
 The overbank n values should be reevaluated.

RS: 4.832
 NT RC 05 The left overbank n value of 0.035 and the right overbank n value of 0.036 are less than or equal to the channel n value of 0.05
 The overbank n values should be reevaluated.

RS: 4.772
 NT RC 05 The left overbank n value of 0.035 and the right overbank n value of 0.036 are less than or equal to the channel n value of 0.05
 The overbank n values should be reevaluated.

RS: 4.728
 NT RC 05 The left overbank n value of 0.035 and the right overbank n value of 0.036 are less than or equal to the channel n value of 0.05
 The overbank n values should be reevaluated.

RS: 4.63
 NT RC 05 The left overbank n value of 0.035 and the right overbank n value of 0.036 are less than or equal to the channel n value of 0.05
 The overbank n values should be reevaluated.

RS: 4.551
 NT RC 05 The left overbank n value of 0.035 and the right overbank n value of 0.036 are less than or equal to the channel n value of 0.05
 The overbank n values should be reevaluated.

RS: 4.476
 NT RC 05 The left overbank n value of 0.035 and the right overbank n value of 0.036 are less than or equal to the channel n value of 0.05
 The overbank n values should be reevaluated.

RS: 4.408
 NT RC 05 The left overbank n value of 0.035 and the right overbank n value of 0.036 are less than or equal to the channel n value of 0.05
 The overbank n values should be reevaluated.

RS: 4.374
 NT RC 05 The left overbank n value of 0.035 and the right overbank n value of 0.036 are less than or equal to the channel n value of 0.05
 The overbank n values should be reevaluated.

RS: 4.344
 NT RC 05 The left overbank n value of 0.035 and the right overbank n value of 0.036 are less than or equal to the channel n value of 0.05
 The overbank n values should be reevaluated.

RS: 2.316
 NT RC 05 The left overbank n value of 0.037 and the right overbank n value of 0.037 are less than or equal to the channel n value of 0.051. The overbank n values should be reevaluated.

RS: 2.25
 NT RC 05 The left overbank n value of 0.037 and the right overbank n value of 0.037 are less than or equal to the channel n value of 0.051. The overbank n values should be reevaluated.

RS: 2.197
 NT RC 05 The left overbank n value of 0.037 and the right overbank n value of 0.037 are less than or equal to the channel n value of 0.051. The overbank n values should be reevaluated.

RS: 2.146
 NT RC 05 The left overbank n value of 0.037 and the right overbank n value of 0.037 are less than or equal to the channel n value of 0.051. The overbank n values should be reevaluated.

RS: 2.116
 NT RC 05 The left overbank n value of 0.037 and the right overbank n value of 0.037 are less than or equal to the channel n value of 0.051. The overbank n values should be reevaluated.

RS: 2.08
 NT RC 05 The left overbank n value of 0.037 and the right overbank n value of 0.037 are less than or equal to the channel n value of 0.051. The overbank n values should be reevaluated.

RS: 1.995
 NT RC 05 The left overbank n value of 0.042 and the right overbank n value of 0.042 are less than or equal to the channel n value of 0.053. The overbank n values should be reevaluated.

TRANSITION LOSS COEFFICIENT CHECK

RS: 4.966
 NT TL 02 Contraction and expansion loss coefficients are 0.2 and 0.4 respectively. However, this cross section is not at the structure. They should be equal to 0.1 and 0.3.

RS: 4.896

---Summary of Statistics---

	Minimum	Maximum
Left Overbank n Value:	0.034	0.053
Right Overbank n Value:	0.034	0.046
Channel n Value:	0.034	0.055
Contraction Coefficient:	0.1	0.1
Expansion Coefficient:	0.3	0.3

Typical desert washes have heavy vegetation in the wash and almost no vegetation in the overbanks. Therefore, most channel "n" values are larger than the overbanks.

ROUGHNESS COEFFICIENT CHECK

RS: 1.995
 NT RC 05 The left overbank n value of 0.042 and the right overbank n value of 0.042 are less than or equal to the channel n value of 0.053
 The overbank n values should be reevaluated.

RS: 1.929
 NT RC 05 The left overbank n value of 0.042 and the right overbank n value of 0.042 are less than or equal to the channel n value of 0.053
 The overbank n values should be reevaluated.

RS: 1.859
 NT RC 01 Left overbank n value is less than 0.035
 The n value for overbank is usually larger than 0.035.
 The n value should be reevaluated.

RS: 1.859
 NT RC 01 Right overbank n value is less than 0.035
 The n value for overbank is usually larger than 0.035.
 The n value should be reevaluated.

RS: 1.859
NT RC 05 The left overbank n value of 0.034 and the right overbank n value of 0.034 are less than or equal to the channel n value of 0.047
The overbank n values should be reevaluated.

RS: 1.816
NT RC 01 Left overbank n value is less than 0.035
The n value for overbank is usually larger then 0.035.
The n value should be reevaluated.

RS: 1.816
NT RC 01 Right overbank n value is less than 0.035
The n value for overbank is usually larger then 0.035.
The n value should be reevaluated.

RS: 1.816
NT RC 05 The left overbank n value of 0.034 and the right overbank n value of 0.034 are less than or equal to the channel n value of 0.047
The overbank n values should be reevaluated.

RS: 1.755
NT RC 01 Left overbank n value is less than 0.035
The n value for overbank is usually larger then 0.035.
The n value should be reevaluated.

RS: 1.755
NT RC 01 Right overbank n value is less than 0.035
The n value for overbank is usually larger then 0.035.
The n value should be reevaluated.

RS: 1.755
NT RC 05 The left overbank n value of 0.034 and the right overbank n value of 0.034 are less than or equal to the channel n value of 0.047
The overbank n values should be reevaluated.

RS: 1.674
NT RC 01 Left overbank n value is less than 0.035
The n value for overbank is usually larger then 0.035.
The n value should be reevaluated.

RS: 1.674
NT RC 01 Right overbank n value is less than 0.035
The n value for overbank is usually larger then 0.035.
The n value should be reevaluated.

RS: 1.674
NT RC 05 The left overbank n value of 0.034 and the right overbank n value of 0.034 are less than or equal to the channel n value of 0.047
The overbank n values should be reevaluated.

RS: 1.633
NT RC 01 Left overbank n value is less than 0.035
The n value for overbank is usually larger then 0.035.
The n value should be reevaluated.

RS: 1.633
NT RC 01 Right overbank n value is less than 0.035
The n value for overbank is usually larger then 0.035.
The n value should be reevaluated.

RS: 1.633
NT RC 05 The left overbank n value of 0.034 and the right overbank n value of 0.034 are less than or equal to the channel n value of 0.047
The overbank n values should be reevaluated.

RS: 1.619

ENCROACHMENT METHOD CHECK

FLOODWAY WIDTH CHECK

RS: 2.054
 FW FW 03 The Left channel bank station may not be at the proper location.

RS: 1.995
 FW FW 03 The Left channel bank station may not be at the proper

location.

- RS: 1.995
 FW FW 04 The right station effective of 10010.46 for 1% annual chance floodplain is greater than the right channel bank station (10003.03).
 The 1% annual chance floodplain is outside the channel.
 However, the right encroachment station (10011) is outside of 1% annual chance floodplain.
 The right encroachment station should be adjusted.
- RS: 1.929
 FW FW 01 Right encroachment station 10018 is less than right channel bank station 10018.95 and greater than the left channel bank station 9960.737
 Right encroachment station is within the channel.
 The encroachment station or channel bank station should be adjusted.
- RS: 1.929
 FW FW 03 The Left channel bank station may not be at the proper location.
- RS: 1.859
 FW FW 01 Right encroachment station 10010 is less than right channel bank station 10012.2 and greater than the left channel bank station 9981.399
 Right encroachment station is within the channel.
 The encroachment station or channel bank station should be adjusted.
- RS: 1.816
 FW FW 01 Left encroachment station 9984 is more than left channel bank station 9983.59 and less than the right channel bank station 10011.48
 Left encroachment station is within the channel.
 The encroachment station or channel bank station should be adjusted.
- RS: 1.816
 FW FW 01 Right encroachment station 10011 is less than right channel bank station 10011.48 and greater than the left channel bank station 9983.59
 Right encroachment station is within the channel.
 The encroachment station or channel bank station should be adjusted.
- RS: 1.755
 FW FW 06 The left station effective of 9982.26 for the floodway profile is more than the left channel bank station of 9981.27
 The left side of the floodway boundary is within the channel.
 The left encroachment station of 9981 is less than the left channel bank station.
 The left encroachment station should be the same as the left channel bank station.
- RS: 1.755
 FW FW 06 The right station effective of 10013.54 for the floodway profile is less than the right channel bank station of 10013.7
 The right side of the floodway boundary is within the channel.
 The right encroachment station of 10029 is greater than the right channel bank station.
 The right encroachment station should be the same as the right channel bank station.
- RS: 1.633
 FW FW 06 The right station effective of 10013.54 for the floodway profile is less than the right channel bank station of 10015.92
 The right side of the floodway boundary is within the channel.
 The right encroachment station of 10042 is greater than the right channel bank station.
 The right encroachment station should be the same as the right channel bank station.
- RS: 1.619
 FW FW 06 The right station effective of 10019.27 for the floodway profile is less than the right channel bank station of 10019.92
 The right side of the floodway boundary is within the channel.
 The right encroachment station of 10036 is greater than the right channel bank station.
 The right encroachment station should be the same as the right channel bank station.

RS: 1.607
FW FW 03 The right channel bank station may not be at the proper location.

RS: 1.607
FW FW 04 The right station effective of 10020.91 for 1% annual chance floodplain is greater than the right channel bank station (10014.44). The 1% annual chance floodplain is outside the channel. However, the right encroachment station (10021) is outside of 1% annual chance floodplain. The right encroachment station should be adjusted.

RS: 1.513
FW FW 01 Right encroachment station 10015 is less than right channel bank station 10020.34 and greater than the left channel bank station 9981.66. Right encroachment station is within the channel. The encroachment station or channel bank station should be adjusted.

---Summary of Statistics---

	Minimum	Maximum
Left Overbank n Value:	0.036	0.036
Right Overbank n Value:	0.036	0.036
Channel n Value:	0.049	0.049
Contraction Coefficient:	0.1	0.1
Expansion Coefficient:	0.3	0.3

\ Typical desert washes have heavy vegetation in the wash and almost no vegetation in the overbanks. Therefore, most channel "n" values are larger than the overbanks.

The left encroachment station of 9974 is less than the left channel bank station.
The left encroachment station should be the same as the left channel bank station.

RS: 0.812

FW FW 06 The right station effective of 10013.67 for the floodway profile is less than the right channel bank station of 10015.67
The right side of the floodway boundary is within the channel.
The right encroachment station of 10016 is greater than the right channel bank station.
The right encroachment station should be the same as the right channel bank station.

RS: 0.759

FW FW 03 The Left channel bank station may not be at the proper location.

RS: 0.722

FW FW 03 The Left channel bank station may not be at the proper location.

RS: 0.722

FW FW 03 The right channel bank station may not be at the proper location.

RS: 0.67

FW FW 03 The right channel bank station may not be at the proper location.

RS: 0.67

FW FW 04 The left station effective of 9988.49 for 1% annual chance floodplain is less than the left channel bank station 9988.7
The 1% annual chance floodplain is outside the channel.
However, the left encroachment station (9904) is outside of 1% annual chance floodplain.
The left encroachment station should be adjusted.

RS: 0.67

FW FW 04 The right station effective of 10045.01 for 1% annual chance floodplain is greater than the right channel bank station (10044.92).
The 1% annual chance floodplain is outside the channel.
However, the right encroachment station (10048) is outside of 1% annual chance floodplain.
The right encroachment station should be adjusted.

RS: 0.607

FW FW 01 Right encroachment station 10020 is less than right channel bank station 10020.26 and greater than the left channel bank station 9960.28
Right encroachment station is within the channel.

The encroachment station or channel bank station should be adjusted.

RS: 0.607

FW FW 03 The right channel bank station may not be at the proper location.

RS: 0.397

FW FW 01 Left encroachment station 9986 is more than left channel bank station 9985.95 and less than the right channel bank station 10013.4
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 0.322

FW FW 01 Right encroachment station 10023 is less than right channel bank station 10023.12 and greater than the left channel bank station 9991.06
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 0.322

FW FW 03 The right channel bank station may not be at the proper location.

RS: 0.276

FW FW 01 Right encroachment station 10011 is less than right channel bank station 10014.8 and greater than the left channel bank station 9991.24
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 0.21

FW FW 01 Right encroachment station 10012 is less than right channel bank station 10012.91 and greater than the left channel bank station 9978.53
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 0.21

FW FW 03 The right channel bank station may not be at the proper location.

---Summary of Statistics---

	Minimum	Maximum
Left Overbank n Value:	0.036	0.036
Right Overbank n Value:	0.036	0.036
Channel n Value:	0.049	0.049
Contraction Coefficient:	0.1	0.3
Expansion Coefficient:	0.3	0.5

Typical desert washes have heavy vegetation in the wash and almost no vegetation in the overbanks. Therefore, most channel "n" values are larger than the overbanks.

ROUGHNESS COEFFICIENT CHECK

RS: 0.951
NT RC 05 The left overbank n value of 0.036 and the right overbank n value of 0.036 are less than or equal to the channel n value of 0.049
The overbank n values should be reevaluated.

RS: 0.9

dk of structure

---Summary of Statistics---

	Minimum	Maximum
Left Overbank n Value:	0.041	0.042
Right Overbank n Value:	0.041	0.042
Channel n Value:	0.052	0.053
Contraction Coefficient:	0.1	0.3

Typical desert washes have heavy vegetation in the wash and almost no vegetation in the overbanks. Therefore, most channel "n" values are larger than the overbanks.

Expansion Coefficient: 0.3 0.5

ROUGHNESS COEFFICIENT CHECK

RS: 3.029
NT RC 05 The left overbank n value of 0.041 and the right overbank n value of 0.041 are less than or equal to the channel n value of 0.052
The overbank n values should be reevaluated.

RS: 2.953
NT RC 05 The left overbank n value of 0.041 and the right overbank n value of 0.041 are less than or equal to the channel n value of 0.052
The overbank n values should be reevaluated.

RS: 2.898
NT RC 05 The left overbank n value of 0.041 and the right overbank n value of 0.041 are less than or equal to the channel n value of 0.052
The overbank n values should be reevaluated.

RS: 2.799
NT RC 05 The left overbank n value of 0.041 and the right overbank n value of 0.041 are less than or equal to the channel n value of 0.052
The overbank n values should be reevaluated.

RS: 2.711
NT RC 05 The left overbank n value of 0.041 and the right overbank n value of 0.041 are less than or equal to the channel n value of 0.052
The overbank n values should be reevaluated.

RS: 2.681
NT RC 05 The left overbank n value of 0.041 and the right overbank n value of 0.041 are less than or equal to the channel n value of 0.052
The overbank n values should be reevaluated.

RS: 2.633
NT RC 05 The left overbank n value of 0.041 and the right overbank n value of 0.041 are less than or equal to the channel n value of 0.052
The overbank n values should be reevaluated.

RS: 2.583
NT RC 05 The left overbank n value of 0.041 and the right overbank n value of 0.041 are less than or equal to the channel n value of 0.052
The overbank n values should be reevaluated.

RS: 2.53
NT RC 05 The left overbank n value of 0.041 and the right overbank n value of 0.041 are less than or equal to the channel n value of 0.052
The overbank n values should be reevaluated.

RS: 2.477
NT RC 05 The left overbank n value of 0.041 and the right overbank n value of 0.041 are less than or equal to the channel n value of 0.052
The overbank n values should be reevaluated.

RS: 2.403
NT RC 05 The left overbank n value of 0.041 and the right overbank n value of 0.041 are less than or equal to the channel n value of 0.052
The overbank n values should be reevaluated.

RS: 2.313
NT RC 05 The left overbank n value of 0.041 and the right overbank n value of 0.041 are less than or equal to the channel n value of 0.052
The overbank n values should be reevaluated.

RS: 2.249
NT RC 05 The left overbank n value of 0.041 and the right overbank n value of 0.041 are less than or equal to the channel n value of 0.052
The overbank n values should be reevaluated.

RS: 2.177
NT RC 05 The left overbank n value of 0.041 and the right overbank n value

RS: 0.4405
 NT RC 05 The left overbank n value of 0.042 and the right overbank n value of 0.042 are less than or equal to the channel n value of 0.053
 The overbank n values should be reevaluated.

RS: 0.426
 NT RC 05 The left overbank n value of 0.042 and the right overbank n value of 0.042 are less than or equal to the channel n value of 0.053
 The overbank n values should be reevaluated.

RS: 0.329
 NT RC 05 The left overbank n value of 0.042 and the right overbank n value of 0.042 are less than or equal to the channel n value of 0.053
 The overbank n values should be reevaluated.

RS: 0.283
 NT RC 05 The left overbank n value of 0.042 and the right overbank n value of 0.042 are less than or equal to the channel n value of 0.053
 The overbank n values should be reevaluated.

RS: 0.23
 NT RC 05 The left overbank n value of 0.042 and the right overbank n value of 0.042 are less than or equal to the channel n value of 0.053
 The overbank n values should be reevaluated.

RS: 0.168
 NT RC 05 The left overbank n value of 0.042 and the right overbank n value of 0.042 are less than or equal to the channel n value of 0.053
 The overbank n values should be reevaluated.

TRANSITION LOSS COEFFICIENT CHECK

RS: 0.52
 NT TL 01 This is section 4
 Contraction and expansion loss coefficients are 0.1 and 0.3
 They should be equal to 0.3 and 0.5 respectively.

RS: 0.329
 NT TL 02 Contraction and expansion loss coefficients are 0.3 and 0.5
 respectively. However, this cross section is not at the structure.
 They should be equal to 0.1 and 0.3.

ENCROACHMENT METHOD CHECK

RS: 0.4405
FW EM 01 Floodway encroachment method is not selected at this section.

FLOODWAY WIDTH CHECK

RS: 3.029
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 3.029
FW FW 04 The left station effective of 9992.88 for 1% annual chance floodplain is less than the left channel bank station 9993.283
The 1% annual chance floodplain is outside the channel.
However, the left encroachment station (9990) is outside of 1% annual chance floodplain.
The left encroachment station should be adjusted.

RS: 3.029
FW FW 04 The right station effective of 10005.94 for 1% annual chance floodplain is greater than the right channel bank station (10005.51).
The 1% annual chance floodplain is outside the channel.
However, the right encroachment station (10009) is outside of 1% annual chance floodplain.
The right encroachment station should be adjusted.

RS: 2.953
 FW FW 03 The Left channel bank station may not be at the proper location.

RS: 2.898
 FW FW 01 Left encroachment station 9984 is more than left channel bank station 9983.94 and less than the right channel bank station 10010.02
 Left encroachment station is within the channel.
 The encroachment station or channel bank station should be adjusted.

RS: 2.898
 FW FW 03 The right channel bank station may not be at the proper location.

RS: 2.799
 FW FW 03 The right channel bank station may not be at the proper location.

RS: 2.799
 FW FW 04 The left station effective of 9993.71 for 1% annual chance floodplain is less than the left channel bank station 9993.718
 The 1% annual chance floodplain is outside the channel.
 However, the left encroachment station (9959) is outside of 1% annual chance floodplain.
 The left encroachment station should be adjusted.

RS: 2.799
 FW FW 04 The right station effective of 10028.72 for 1% annual chance floodplain is greater than the right channel bank station (10022.62).
 The 1% annual chance floodplain is outside the channel.
 However, the right encroachment station (10166) is outside of 1% annual chance floodplain.
 The right encroachment station should be adjusted.

RS: 2.711
 FW FW 01 Left encroachment station 9936 is more than left channel bank station 9935.85 and less than the right channel bank station 10007.72
 Left encroachment station is within the channel.
 The encroachment station or channel bank station should be adjusted.

RS: 2.711
 FW FW 03 The Left channel bank station may not be at the proper location.

RS: 2.681
 FW FW 03 The Left channel bank station may not be at the proper location.

RS: 2.633
 FW FW 04 The left station effective of 9970.91 for 1% annual chance floodplain is less than the left channel bank station 9972.18
 The 1% annual chance floodplain is outside the channel.
 However, the left encroachment station (9901) is outside of 1% annual chance floodplain.
 The left encroachment station should be adjusted.

RS: 2.633
 FW FW 04 The right station effective of 10018.09 for 1% annual chance floodplain is greater than the right channel bank station (10015.85).
 The 1% annual chance floodplain is outside the channel.
 However, the right encroachment station (10078) is outside of 1% annual chance floodplain.
 The right encroachment station should be adjusted.

RS: 2.583
 FW FW 03 The right channel bank station may not be at the proper location.

RS: 2.583
 FW FW 04 The left station effective of 9971.32 for 1% annual chance floodplain is less than the left channel bank station 9974.24
 The 1% annual chance floodplain is outside the channel.
 However, the left encroachment station (9921) is outside of 1% annual

chance floodplain.
The left encroachment station should be adjusted.

RS: 2.583
FW FW 04 The right station effective of 10042.62 for 1% annual chance floodplain is greater than the right channel bank station (10036.35).
The 1% annual chance floodplain is outside the channel.
However, the right encroachment station (10098) is outside of 1% annual chance floodplain.
The right encroachment station should be adjusted.

RS: 2.53
FW FW 01 Left encroachment station 9991 is more than left channel bank station 9990.71 and less than the right channel bank station 10042.16
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 2.477
FW FW 01 Right encroachment station 10033 is less than right channel bank station 10033.23 and greater than the left channel bank station 9968.46
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 2.477
FW FW 03 The right channel bank station may not be at the proper location.

RS: 2.403
FW FW 01 Left encroachment station 9986 is more than left channel bank station 9985.58 and less than the right channel bank station 10024.78
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 2.313
FW FW 01 Right encroachment station 10038 is less than right channel bank station 10038.29 and greater than the left channel bank station 9986.6
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 2.313
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 2.313
FW FW 03 The right channel bank station may not be at the proper location.

RS: 2.249
FW FW 01 Left encroachment station 9965 is more than left channel bank station 9964.97 and less than the right channel bank station 10014.25
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 2.249
FW FW 01 Right encroachment station 10014 is less than right channel bank station 10014.25 and greater than the left channel bank station 9964.97
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 2.249
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 2.249
FW FW 03 The right channel bank station may not be at the proper location.

RS: 2.177
FW FW 01 Left encroachment station 9992 is more than left channel bank station 9991.631 and less than the right channel bank station 10021.01
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 2.177

FW FW 03 The right channel bank station may not be at the proper location.

RS: 2.101

FW FW 01 Left encroachment station 9976 is more than left channel bank station 9975.988 and less than the right channel bank station 10017.89
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 2.101

FW FW 03 The Left channel bank station may not be at the proper location.

RS: 2.024

FW FW 01 Left encroachment station 9981 is more than left channel bank station 9980.67 and less than the right channel bank station 10020.7
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 1.969

FW FW 03 The Left channel bank station may not be at the proper location.

RS: 1.87

FW FW 01 Right encroachment station 10040 is less than right channel bank station 10040.45 and greater than the left channel bank station 9991.1
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 1.87

FW FW 03 The Left channel bank station may not be at the proper location.

RS: 1.826

FW FW 03 The Left channel bank station may not be at the proper location.

RS: 1.759

FW FW 01 Left encroachment station 9992 is more than left channel bank station 9991.631 and less than the right channel bank station 10018.49
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 1.681

FW FW 03 The right channel bank station may not be at the proper location.

RS: 1.48

FW FW 01 Left encroachment station 9965 is more than left channel bank station 9964.625 and less than the right channel bank station 10028.82
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 1.205

FW FW 01 Left encroachment station 9982 is more than left channel bank station 9981.121 and less than the right channel bank station 10037.97
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 1.13

FW FW 01 Left encroachment station 9984 is more than left channel bank station 9982.41 and less than the right channel bank station 10013.93
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 1.13

FW FW 05 The 1% annual chance flood is contained within the channel.
Right encroachment station 10014 is outside the channel.
Right channel bank station is 10013.93
Right encroachment station and/or right channel bank station should be adjusted.

RS: 1.13

FW FW 06 The right station effective of 10013.13 for the floodway profile is less than the right channel bank station of 10013.93

The right side of the floodway boundary is within the channel.
 The right encroachment station of 10014 is greater than the right channel bank station.
 The right encroachment station should be the same as the right channel bank station.

RS: 1.019
 FW FW 01 Left encroachment station 9978 is more than left channel bank station 9977.33 and less than the right channel bank station 10031.29
 Left encroachment station is within the channel.
 The encroachment station or channel bank station should be adjusted.

RS: 1.019
 FW FW 03 The right channel bank station may not be at the proper location.

RS: 0.954
 FW FW 01 Left encroachment station 9933 is more than left channel bank station 9932.99 and less than the right channel bank station 10012.54
 Left encroachment station is within the channel.
 The encroachment station or channel bank station should be adjusted.

RS: 0.852
 FW FW 01 Left encroachment station 9957 is more than left channel bank station 9956.91 and less than the right channel bank station 10007.24
 Left encroachment station is within the channel.
 The encroachment station or channel bank station should be adjusted.

RS: 0.852
 FW FW 01 Right encroachment station 10007 is less than right channel bank station 10007.24 and greater than the left channel bank station 9956.91
 Right encroachment station is within the channel.
 The encroachment station or channel bank station should be adjusted.

RS: 0.852
 FW FW 03 The Left channel bank station may not be at the proper location.

RS: 0.852
 FW FW 03 The right channel bank station may not be at the proper location.

RS: 0.771
 FW FW 03 The Left channel bank station may not be at the proper location.

RS: 0.771
 FW FW 03 The right channel bank station may not be at the proper location.

RS: 0.771
 FW FW 04 The left station effective of 9983.46 for 1% annual chance floodplain is less than the left channel bank station 9987.17
 The 1% annual chance floodplain is outside the channel.
 However, the left encroachment station (9956) is outside of 1% annual chance floodplain.
 The left encroachment station should be adjusted.

RS: 0.771
 FW FW 04 The right station effective of 10053.31 for 1% annual chance floodplain is greater than the right channel bank station (10045.33).
 The 1% annual chance floodplain is outside the channel.
 However, the right encroachment station (10054) is outside of 1% annual chance floodplain.
 The right encroachment station should be adjusted.

RS: 0.701
 FW FW 03 The right channel bank station may not be at the proper location.

RS: 0.623
 FW FW 01 Left encroachment station 9980 is more than left channel bank station 9979.584 and less than the right channel bank station 10054.22
 Left encroachment station is within the channel.

The encroachment station or channel bank station should be adjusted.

RS: 0.623
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 0.426
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 0.426
FW FW 03 The right channel bank station may not be at the proper location.

RS: 0.283
FW FW 03 The right channel bank station may not be at the proper location.

RS: 0.23
FW FW 04 The right station effective of 10037.05 for 1% annual chance floodplain is greater than the right channel bank station (10032.89). The 1% annual chance floodplain is outside the channel. However, the right encroachment station (10055) is outside of 1% annual chance floodplain. The right encroachment station should be adjusted.

RS: 0.168
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 0.1
FW FW 03 The Left channel bank station may not be at the proper location.

 2. CulvWSIn of 1424.00 is greater than or equal to MxLoCdU of 1424.00.
 3. CulvWSOut of 1423.70 is greater than or equal to MxLoCdD of 1423.70.

DISTANCE CHECK

RS: 0.4405 This is CULVERT#1
 ST DT 01 'Culvert Upstrm Dist' of 0.01 is less than the height of the
 culvert opening of 3 .
 Section 3 should be placed at the foot of the road embankment or
 wing walls.
 Distances at Sections 4 & 3, and 'Distance from Upstream XS'
 should be adjusted.

RS: 0.4405 This is CULVERT#1
 ST DT 02 The channel distance of 2.676005 at Downstream Internal Section is less than
 the height of the culvert opening of 3
 Section 2 should be placed at the foot of the road embankment or
 wing walls.
 Distances at Sections 4, 3 & 2 should be adjusted.

CULVERT COEFFICIENT CHECK

CULVERT CRITERIA CHECK

INEFFECTIVE FLOW CHECK

RS: 0.426 This is Section 2
 ST IF 02 Weir flow occurs at Culvert Group 1
 However, the ineffective flow elevation of 1426.04 between stations 9635.99
 and 9971 is equal to or greater than the WSEL of 1425.01
 The LMnTpRdD is 1420.92 and the MxLoCdD is 1423.7
 The ineffective flow elevation should be between the LMnTpRdD and the MxLoCdD
 if LMnTpRdD is greater than MxLoCdD. Otherwise, It should be equal to LMnTpRdD.
 It should also be less than the WSEL.

RS: 0.426 This is Section 2
 ST IF 02 Weir flow occurs at Culvert Group 1
 However, the ineffective flow elevation of 1426.01 between stations 10017.9
 and 10051.65 is equal to or greater than the WSEL of 1425.01
 The RMnTpRdD is 1426.08 and the MxLoCdD is 1423.7
 The ineffective flow elevation should be between the RMnTpRdD and the MxLoCdD
 if RMnTpRdD is greater than MxLoCdD. Otherwise, It should be equal to RMnTpRdD.
 It should also be less than the WSEL.

FLOODWAY CHECK

RS: 0.4405 This is Culvert
 ST FW 01 Encroachment Method was not specified at this river station.
 For flood insurance studies Encroachment Methods 4 and 1
 should be used.

RS: 0.426 This is Section 2
ST FW 08 The left station effective of 9971 for the natural profile.
is less than the left channel bank station of 9971.5
The left encroachment station is outside the channel.
The left encroachment station of 9926 is less than the left
station effective of 9971 for the natural profile.
The left encroachment station should be adjusted.

RS: 0.455 This is Section 3
ST FW 04 The right encroachment station of 10022 is less than the
right bank station of 10024.18
The right encroachment station is within the channel.
The encroachment station and/or channel bank station should be reevaluated.

---Summary of Statistics---

	Minimum	Maximum
Left Overbank n Value:	0.045	0.052
Right Overbank n Value:	0.045	0.052
Channel n Value:	0.054	0.057
Contraction Coefficient:	0.1	0.2
Expansion Coefficient:	0.3	0.4

Typical desert washes have heavy vegetation in the wash and almost no vegetation in the overbanks. Therefore, most channel "n" values are larger than the overbanks.

ROUGHNESS COEFFICIENT CHECK

- RS: 4.666
NT RC 05 The left overbank n value of 0.052 and the right overbank n value of 0.052 are less than or equal to the channel n value of 0.057
The overbank n values should be reevaluated.
- RS: 4.652
NT RC 05 The left overbank n value of 0.052 and the right overbank n value of 0.052 are less than or equal to the channel n value of 0.057
The overbank n values should be reevaluated.
- RS: 4.618
NT RC 05 The left overbank n value of 0.052 and the right overbank n value of 0.052 are less than or equal to the channel n value of 0.057
The overbank n values should be reevaluated.
- RS: 4.596
NT RC 05 The left overbank n value of 0.052 and the right overbank n value of 0.052 are less than or equal to the channel n value of 0.057
The overbank n values should be reevaluated.
- RS: 4.558
NT RC 05 The left overbank n value of 0.052 and the right overbank n value of 0.052 are less than or equal to the channel n value of 0.057
The overbank n values should be reevaluated.
- RS: 4.536
NT RC 05 The left overbank n value of 0.052 and the right overbank n value of 0.052 are less than or equal to the channel n value of 0.057
The overbank n values should be reevaluated.
- RS: 4.524
NT RC 05 The left overbank n value of 0.052 and the right overbank n value of 0.052 are less than or equal to the channel n value of 0.057
The overbank n values should be reevaluated.
- RS: 4.471
NT RC 05 The left overbank n value of 0.052 and the right overbank n value of 0.052 are less than or equal to the channel n value of 0.057
The overbank n values should be reevaluated.
- RS: 4.442
NT RC 05 The left overbank n value of 0.052 and the right overbank n value of 0.052 are less than or equal to the channel n value of 0.057
The overbank n values should be reevaluated.
- RS: 4.386
NT RC 05 The left overbank n value of 0.052 and the right overbank n value of 0.052 are less than or equal to the channel n value of 0.057
The overbank n values should be reevaluated.
- RS: 4.338
NT RC 05 The left overbank n value of 0.052 and the right overbank n value of 0.052 are less than or equal to the channel n value of 0.057

RS: 1.538
 NT RC 05 The left overbank n value of 0.046 and the right overbank n value of 0.046 are less than or equal to the channel n value of 0.055
 The overbank n values should be reevaluated.

RS: 1.473
 NT RC 05 The left overbank n value of 0.046 and the right overbank n value of 0.046 are less than or equal to the channel n value of 0.055
 The overbank n values should be reevaluated.

RS: 1.4
 NT RC 05 The left overbank n value of 0.046 and the right overbank n value of 0.046 are less than or equal to the channel n value of 0.055
 The overbank n values should be reevaluated.

RS: 1.308
 NT RC 05 The left overbank n value of 0.046 and the right overbank n value of 0.046 are less than or equal to the channel n value of 0.055
 The overbank n values should be reevaluated.

RS: 1.244
 NT RC 05 The left overbank n value of 0.046 and the right overbank n value of 0.046 are less than or equal to the channel n value of 0.055
 The overbank n values should be reevaluated.

RS: 1.144
 NT RC 05 The left overbank n value of 0.046 and the right overbank n value of 0.046 are less than or equal to the channel n value of 0.055
 The overbank n values should be reevaluated.

RS: 1.05
 NT RC 05 The left overbank n value of 0.046 and the right overbank n value of 0.046 are less than or equal to the channel n value of 0.055
 The overbank n values should be reevaluated.

RS: 0.979
 NT RC 05 The left overbank n value of 0.046 and the right overbank n value of 0.046 are less than or equal to the channel n value of 0.055
 The overbank n values should be reevaluated.

TRANSITION LOSS COEFFICIENT CHECK

RS: 1.05
 NT TL 02 Contraction and expansion loss coefficients are 0.2 and 0.4 respectively. However, this cross section is not at the structure. They should be equal to 0.1 and 0.3.

RS: 0.979
 NT TL 02 Contraction and expansion loss coefficients are 0.2 and 0.4 respectively. However, this cross section is not at the structure. They should be equal to 0.1 and 0.3.

RS: 0.912
 NT TL 02 Contraction and expansion loss coefficients are 0.2 and 0.4 respectively. However, this cross section is not at the structure. They should be equal to 0.1 and 0.3.

SPACING CHECK

INEFFECTIVE FLOW CHECK

DISCHARGE CHECK

RS: 4.536
 XS DC 04 There is no flow on the left overbank at the downstream cross section. There is no flow on the right overbank at this section.

RS: 4.338
 XS DC 05 There is no flow on the right overbank at the downstream cross section. There is no flow on the left overbank at this section.

RS: 4.27
 XS DC 04 There is no flow on the left overbank at the downstream cross section. There is no flow on the right overbank at this section.

RS: 4.052
 XS DC 05 There is no flow on the right overbank at the downstream cross section. There is no flow on the left overbank at this section.

RS: 2.74
 XS DC 01 Discharge decreases in the downstream direction.

RS: 1.05
 XS DC 01 Discharge decreases in the downstream direction.

LOCATION CHECK

RS: 4.386
 XS LC 01 Lenchl Up/TopwdthAct Dn = 1.67
 MaxChlDpth Up/MaxChlDpth Dn = 1.18
 TopwdthAct Up/TopwdthAct Dn = 1.54
 This cross section is located too far upstream from the critical depth cross section.

BOUNDARY CONDITION CHECK

XS BC 02 The name of the stream is Reach #1,9 East
 Normal S = 0.005 is specified as the downstream boundary for profile Floodplain

XS BC 02 The name of the stream is Reach #1,9 East
 Normal S = 0.005 is specified as the downstream boundary

for profile Floodway

 FLOODWAY WIDTH CHECK

RS: 4.666
 FW FW 01 Right encroachment station 10012 is less than right channel bank station 10012.39 and greater than the left channel bank station 9971.28. Right encroachment station is within the channel. The encroachment station or channel bank station should be adjusted.

RS: 4.666
 FW FW 03 The Left channel bank station may not be at the proper location.

RS: 4.666
 FW FW 03 The right channel bank station may not be at the proper location.

RS: 4.652
 FW FW 06 The right station effective of 10027.33 for the floodway profile is less than the right channel bank station of 10027.47. The right side of the floodway boundary is within the channel. The right encroachment station of 10033 is greater than the right channel bank station. The right encroachment station should be the same as the right channel bank station.

RS: 4.618
 FW FW 01 Left encroachment station 9980 is more than left channel bank station 9979.692 and less than the right channel bank station 10020.77. Left encroachment station is within the channel. The encroachment station or channel bank station should be adjusted.

RS: 4.618
 FW FW 05 The 1% annual chance flood is contained within the channel. Right encroachment station 10025 is outside the channel. Right channel bank station is 10020.77. Right encroachment station and/or right channel bank station should be adjusted.

RS: 4.596
 FW FW 01 Left encroachment station 9989 is more than left channel bank station 9988.93 and less than the right channel bank station 10016.46. Left encroachment station is within the channel. The encroachment station or channel bank station should be adjusted.

RS: 4.596
 FW FW 03 The Left channel bank station may not be at the proper location.

RS: 4.596
 FW FW 04 The right station effective of 10020.85 for 1% annual chance floodplain is greater than the right channel bank station (10016.46). The 1% annual chance floodplain is outside the channel. However, the right encroachment station (10026) is outside of 1% annual chance floodplain. The right encroachment station should be adjusted.

RS: 4.558
 FW FW 06 The right station effective of 10010.73 for the floodway profile is less than the right channel bank station of 10010.76. The right side of the floodway boundary is within the channel. The right encroachment station of 10014 is greater than the right channel bank station. The right encroachment station should be the same as the right channel bank station.

RS: 4.536
 FW FW 01 Left encroachment station 9992 is more than left channel bank station 9991.66 and less than the right channel bank station 10021.45. Left encroachment station is within the channel. The encroachment station or channel bank station should be adjusted.

RS: 4.536
FW FW 04 The right station effective of 10021.81 for 1% annual chance floodplain is greater than the right channel bank station (10021.45). The 1% annual chance floodplain is outside the channel. However, the right encroachment station (10036) is outside of 1% annual chance floodplain. The right encroachment station should be adjusted.

RS: 4.524
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 4.524
FW FW 04 The left station effective of 9990.66 for 1% annual chance floodplain is less than the left channel bank station 9990.678. The 1% annual chance floodplain is outside the channel. However, the left encroachment station (9990) is outside of 1% annual chance floodplain. The left encroachment station should be adjusted.

RS: 4.524
FW FW 04 The right station effective of 10021.8 for 1% annual chance floodplain is greater than the right channel bank station (10020.58). The 1% annual chance floodplain is outside the channel. However, the right encroachment station (10029) is outside of 1% annual chance floodplain. The right encroachment station should be adjusted.

RS: 4.524
FW FW 06 The left station effective of 9990.73 for the floodway profile is more than the left channel bank station of 9990.678. The left side of the floodway boundary is within the channel. The left encroachment station of 9990 is less than the left channel bank station. The left encroachment station should be the same as the left channel bank station.

RS: 4.471
FW FW 03 The right channel bank station may not be at the proper location.

RS: 4.442
FW FW 03 The right channel bank station may not be at the proper location.

RS: 4.442
FW FW 06 The right station effective of 10036.3 for the floodway profile is less than the right channel bank station of 10037.04. The right side of the floodway boundary is within the channel. The right encroachment station of 10041 is greater than the right channel bank station. The right encroachment station should be the same as the right channel bank station.

RS: 4.338
FW FW 06 The left station effective of 9986.13 for the floodway profile is more than the left channel bank station of 9985.906. The left side of the floodway boundary is within the channel. The left encroachment station of 9984 is less than the left channel bank station. The left encroachment station should be the same as the left channel bank station.

RS: 4.206
FW FW 04 The right station effective of 10038.93 for 1% annual chance floodplain is greater than the right channel bank station (10015.74). The 1% annual chance floodplain is outside the channel. However, the right encroachment station (10054) is outside of 1% annual chance floodplain. The right encroachment station should be adjusted.

RS: 4.206
FW FW 06 The left station effective of 9986.52 for the floodway profile is more than the left channel bank station of 9983.311

The left side of the floodway boundary is within the channel.
 The left encroachment station of 9979 is less than the left channel bank station.
 The left encroachment station should be the same as the left channel bank station.

- RS: 4.092
 FW FW 04 The right station effective of 10037.8 for 1% annual chance floodplain is greater than the right channel bank station (10037.78).
 The 1% annual chance floodplain is outside the channel.
 However, the right encroachment station (10040) is outside of 1% annual chance floodplain.
 The right encroachment station should be adjusted.
- RS: 4.092
 FW FW 06 The left station effective of 9993.16 for the floodway profile is more than the left channel bank station of 9993.045
 The left side of the floodway boundary is within the channel.
 The left encroachment station of 9992 is less than the left channel bank station.
 The left encroachment station should be the same as the left channel bank station.
- RS: 4.092
 FW FW 06 The right station effective of 10037.55 for the floodway profile is less than the right channel bank station of 10037.78
 The right side of the floodway boundary is within the channel.
 The right encroachment station of 10040 is greater than the right channel bank station.
 The right encroachment station should be the same as the right channel bank station.
- RS: 4.052
 FW FW 01 Left encroachment station 9991 is more than left channel bank station 9990.34 and less than the right channel bank station 10024.02
 Left encroachment station is within the channel.
 The encroachment station or channel bank station should be adjusted.
- RS: 3.998
 FW FW 01 Right encroachment station 10011 is less than right channel bank station 10011.91 and greater than the left channel bank station 9979.99
 Right encroachment station is within the channel.
 The encroachment station or channel bank station should be adjusted.
- RS: 3.998
 FW FW 03 The Left channel bank station may not be at the proper location.
- RS: 3.998
 FW FW 03 The right channel bank station may not be at the proper location.
- RS: 3.927
 FW FW 01 Right encroachment station 10043 is less than right channel bank station 10043.3 and greater than the left channel bank station 9992.72
 Right encroachment station is within the channel.
 The encroachment station or channel bank station should be adjusted.
- RS: 3.927
 FW FW 03 The right channel bank station may not be at the proper location.
- RS: 3.927
 FW FW 06 The left station effective of 9993.49 for the floodway profile is more than the left channel bank station of 9992.72
 The left side of the floodway boundary is within the channel.
 The left encroachment station of 9991 is less than the left channel bank station.
 The left encroachment station should be the same as the left channel bank station.
- RS: 3.837
 FW FW 01 Left encroachment station 9984 is more than left channel bank station 9983.224 and less than the right channel bank station 10016.9

Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 3.837
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 3.837
FW FW 03 The right channel bank station may not be at the proper location.

RS: 3.76
FW FW 01 Right encroachment station 10022 is less than right channel bank station 10022.72 and greater than the left channel bank station 9979.818
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 3.76
FW FW 03 The right channel bank station may not be at the proper location.

RS: 3.617
FW FW 04 The right station effective of 10090.03 for 1% annual chance floodplain is greater than the right channel bank station (10039.16).
The 1% annual chance floodplain is outside the channel.
However, the right encroachment station (10101) is outside of 1% annual chance floodplain.
The right encroachment station should be adjusted.

RS: 3.617
FW FW 06 The left station effective of 9986.38 for the floodway profile is more than the left channel bank station of 9985.31
The left side of the floodway boundary is within the channel.
The left encroachment station of 9985 is less than the left channel bank station.
The left encroachment station should be the same as the left channel bank station.

RS: 3.545
FW FW 01 Left encroachment station 9979 is more than left channel bank station 9978.815 and less than the right channel bank station 10016.75
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

FLOODWAY WIDTH CHECK

RS: 4.466
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 4.423
FW FW 01 Left encroachment station 9983 is more than left channel bank station 9975.44 and less than the right channel bank station 10024.37
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 4.423
FW FW 01 Right encroachment station 10024 is less than right channel bank station 10024.37 and greater than the left channel bank station 9975.44
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 4.378
FW FW 01 Left encroachment station 9971 is more than left channel bank station 9970.77 and less than the right channel bank station 10010.43
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 4.378
FW FW 01 Right encroachment station 10010 is less than right channel bank station 10010.43 and greater than the left channel bank station 9970.77
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 4.378
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 4.314
FW FW 01 Left encroachment station 9985 is more than left channel bank station 9984.94 and less than the right channel bank station 10021.97
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 4.253
FW FW 01 Left encroachment station 9973 is more than left channel bank station 9972.85 and less than the right channel bank station 10018.52
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 4.223
FW FW 01 Right encroachment station 10013 is less than right channel bank station 10013.45 and greater than the left channel bank station 9984.24
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 4.223
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 4.172
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 3.984
FW FW 01 Left encroachment station 9976 is more than left channel bank station 9975.51 and less than the right channel bank station 10015.76
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 3.905
FW FW 01 Left encroachment station 9972 is more than left channel bank station 9971.73 and less than the right channel bank station 10010.42
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

FW 01 3.905
Right encroachment station 10010 is less than right channel bank station 10010.42 and greater than the left channel bank station 9971.73
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 3.852

FW FW 01 Left encroachment station 9992 is more than left channel bank station 9991.93 and less than the right channel bank station 10028.7
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 3.852

FW FW 03 The right channel bank station may not be at the proper location.

RS: 3.783

FW FW 03 The Left channel bank station may not be at the proper location.

RS: 3.724

FW FW 01 Right encroachment station 10024 is less than right channel bank station 10024.33 and greater than the left channel bank station 9977.47
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 3.724

FW FW 03 The Left channel bank station may not be at the proper location.

RS: 3.667

FW FW 04 The left station effective of 9987.04 for 1% annual chance floodplain is less than the left channel bank station 9987.053
The 1% annual chance floodplain is outside the channel.
However, the left encroachment station (9987) is outside of 1% annual chance floodplain.
The left encroachment station should be adjusted.

RS: 3.63

FW FW 01 Right encroachment station 10010 is less than right channel bank station 10010.18 and greater than the left channel bank station 9974.456
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 3.573

FW FW 05 The 1% annual chance flood is contained within the channel.
Left encroachment station 9974 is outside the channel.
Left channel bank station is 9992.386
Left encroachment station and/or left channel bank station should be adjusted.

RS: 3.573

FW FW 05 The 1% annual chance flood is contained within the channel.
Right encroachment station 10070 is outside the channel.
Right channel bank station is 10027.95
Right encroachment station and/or right channel bank station should be adjusted.

RS: 3.573

FW FW 06 The left station effective of 9993.56 for the floodway profile is more than the left channel bank station of 9992.386
The left side of the floodway boundary is within the channel.
The left encroachment station of 9974 is less than the left channel bank station.
The left encroachment station should be the same as the left channel bank station.

RS: 3.573

FW FW 06 The right station effective of 10011.96 for the floodway profile is less than the right channel bank station of 10027.95
The right side of the floodway boundary is within the channel.
The right encroachment station of 10070 is greater than the right channel bank station.
The right encroachment station should be the same as the right channel bank station.

RS: 3.538

FW FW 03 The Left channel bank station may not be at the proper location.

RS: 3.538

FW FW 04 The left station effective of 9990.35 for 1% annual chance floodplain is less than the left channel bank station 9990.42
The 1% annual chance floodplain is outside the channel.
However, the left encroachment station (9990) is outside of 1% annual chance floodplain.
The left encroachment station should be adjusted.

RS: 3.488

FW FW 06 The left station effective of 9980.02 for the floodway profile is more than the left channel bank station of 9974.51

The left side of the floodway boundary is within the channel.
 The left encroachment station of 9974 is less than the left channel bank station.
 The left encroachment station should be the same as the left channel bank station.

RS: 3.436
 FW FW 01 Left encroachment station 9992 is more than left channel bank station 9991.631 and less than the right channel bank station 10029.23
 Left encroachment station is within the channel.
 The encroachment station or channel bank station should be adjusted.

RS: 3.436
 FW FW 04 The right station effective of 10029.73 for 1% annual chance floodplain is greater than the right channel bank station (10029.23).
 The 1% annual chance floodplain is outside the channel.
 However, the right encroachment station (10040) is outside of 1% annual chance floodplain.
 The right encroachment station should be adjusted.

RS: 3.4
 FW FW 01 Left encroachment station 9981 is more than left channel bank station 9980.61 and less than the right channel bank station 10013.77
 Left encroachment station is within the channel.
 The encroachment station or channel bank station should be adjusted.

RS: 3.4
 FW FW 03 The right channel bank station may not be at the proper location.

RS: 3.349
 FW FW 01 Right encroachment station 10016 is less than right channel bank station 10016.05 and greater than the left channel bank station 9975.24
 Right encroachment station is within the channel.
 The encroachment station or channel bank station should be adjusted.

RS: 3.294
 FW FW 03 The right channel bank station may not be at the proper location.

RS: 3.294
 FW FW 06 The left station effective of 9979.86 for the floodway profile is more than the left channel bank station of 9977.36
 The left side of the floodway boundary is within the channel.
 The left encroachment station of 9977 is less than the left channel bank station.
 The left encroachment station should be the same as the left channel bank station.

RS: 3.235
 FW FW 01 Right encroachment station 10045 is less than right channel bank station 10045.42 and greater than the left channel bank station 9988.819
 Right encroachment station is within the channel.
 The encroachment station or channel bank station should be adjusted.

RS: 3.235
 FW FW 03 The right channel bank station may not be at the proper location.

RS: 3.235
 FW FW 04 The left station effective of 9988.78 for 1% annual chance floodplain is less than the left channel bank station 9988.819
 The 1% annual chance floodplain is outside the channel.
 However, the left encroachment station (9983) is outside of 1% annual chance floodplain.
 The left encroachment station should be adjusted.

RS: 3.2
 FW FW 01 Left encroachment station 9991 is more than left channel bank station 9990.584 and less than the right channel bank station 10013.3
 Left encroachment station is within the channel.
 The encroachment station or channel bank station should be adjusted.

RS: 3.2
 FW FW 01 Right encroachment station 10013 is less than right channel bank station 10013.3 and greater than the left channel bank station 9990.584
 Right encroachment station is within the channel.
 The encroachment station or channel bank station should be adjusted.

RS: 3.151
 FW FW 01 Left encroachment station 9971 is more than left channel bank station 9970.83 and less than the right channel bank station 10008.38

Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

3.151

FW 01 Right encroachment station 10008 is less than right channel bank station 10008.38 and greater than the left channel bank station 9970.83
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 3.151

FW FW 03 The Left channel bank station may not be at the proper location.

RS: 3.089

FW FW 03 The Left channel bank station may not be at the proper location.

RS: 3.057

FW FW 01 Left encroachment station 9980 is more than left channel bank station 9979.74 and less than the right channel bank station 10013.82
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 2.97

FW FW 01 Right encroachment station 10015 is less than right channel bank station 10015.28 and greater than the left channel bank station 9980.1
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 2.97

FW FW 03 The Left channel bank station may not be at the proper location.

RS: 2.896

FW FW 01 Left encroachment station 9968 is more than left channel bank station 9967.56 and less than the right channel bank station 10038.87
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

2.896

FW 03 The right channel bank station may not be at the proper location.

RS: 2.847

FW FW 01 Left encroachment station 9976 is more than left channel bank station 9975.56 and less than the right channel bank station 10054.32
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 2.847

FW FW 01 Right encroachment station 10054 is less than right channel bank station 10054.32 and greater than the left channel bank station 9975.56
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 2.795

FW FW 01 Left encroachment station 9945 is more than left channel bank station 9944.97 and less than the right channel bank station 10022.39
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 2.795

FW FW 01 Right encroachment station 10022 is less than right channel bank station 10022.39 and greater than the left channel bank station 9944.97
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 2.718

FW FW 03 The Left channel bank station may not be at the proper location.

RS: 2.718

FW FW 03 The right channel bank station may not be at the proper location.

2.654

FW 06 The right station effective of 10006.51 for the floodway profile is less than the right channel bank station of 10006.92
The right side of the floodway boundary is within the channel.
The right encroachment station of 10007 is greater than the right channel bank station.
The right encroachment station should be the same as the right

channel bank station.

RS: 2.578

FW FW 03 The Left channel bank station may not be at the proper location.

RS: 2.578

FW FW 04 The left station effective of 9977.61 for 1% annual chance floodplain is less than the left channel bank station 9979.11
The 1% annual chance floodplain is outside the channel.
However, the left encroachment station (9977) is outside of 1% annual chance floodplain.
The left encroachment station should be adjusted.

RS: 2.578

FW FW 04 The right station effective of 10018.63 for 1% annual chance floodplain is greater than the right channel bank station (10018.62).
The 1% annual chance floodplain is outside the channel.
However, the right encroachment station (10019) is outside of 1% annual chance floodplain.
The right encroachment station should be adjusted.

---Summary of Statistics---

	Minimum	Maximum
Left Overbank n Value:	0.037	0.037
Right Overbank n Value:	0.035	0.035
Channel n Value:	0.042	0.042
Contraction Coefficient:	0.1	0.1
Expansion Coefficient:	0.3	0.3

Typical desert washes have heavy vegetation in the wash and almost no vegetation in the overbanks. Therefore, most channel "n" values are larger than the overbanks.

ROUGHNESS COEFFICIENT CHECK

FLOODWAY WIDTH CHECK

RS: 0.83
 FW FW 01 Right encroachment station 10037 is less than right channel bank station 10037.29 and greater than the left channel bank station 9992.49
 Right encroachment station is within the channel.
 The encroachment station or channel bank station should be adjusted.

RS: 0.76
 FW FW 01 Left encroachment station 9986 is more than left channel bank station 9985.75 and less than the right channel bank station 10011.73
 Left encroachment station is within the channel.
 The encroachment station or channel bank station should be adjusted.

RS: 0.72
 FW FW 01 Left encroachment station 9973 is more than left channel bank station 9951.801 and less than the right channel bank station 10004.6
 Left encroachment station is within the channel.
 The encroachment station or channel bank station should be adjusted.

RS: 0.64
FW FW 01 Left encroachment station 9992 is more than left channel bank station 9991.6 and less than the right channel bank station 10019.46
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 0.64
FW FW 01 Right encroachment station 10019 is less than right channel bank station 10019.46 and greater than the left channel bank station 9991.6
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 0.57
FW FW 01 Left encroachment station 9991 is more than left channel bank station 9990.55 and less than the right channel bank station 10025.5
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 0.57
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 0.51
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 0.51
FW FW 03 The right channel bank station may not be at the proper location.

RS: 0.51
FW FW 04 The right station effective of 10009.98 for 1% annual chance floodplain is greater than the right channel bank station (10009.94).
The 1% annual chance floodplain is outside the channel.
However, the right encroachment station (10010) is outside of 1% annual chance floodplain.
The right encroachment station should be adjusted.

RS: 0.45
FW FW 01 Right encroachment station 10011 is less than right channel bank station 10011.08 and greater than the left channel bank station 9991.08
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 0.45
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 0.4
FW FW 01 Right encroachment station 10009 is less than right channel bank station 10009.8 and greater than the left channel bank station 9989.525
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 0.4
FW FW 03 The right channel bank station may not be at the proper location.

RS: 0.4
FW FW 04 The left station effective of 9989.46 for 1% annual chance floodplain is less than the left channel bank station 9989.525
The 1% annual chance floodplain is outside the channel.
However, the left encroachment station (9989) is outside of 1% annual chance floodplain.
The left encroachment station should be adjusted.

RS: 0.34
FW FW 01 Right encroachment station 10008 is less than right channel bank station 10008.1 and greater than the left channel bank station 9976.96
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 0.34
FW FW 03 The Left channel bank station may not be at the proper

location.

RS: 0.34
 FW FW 03 The right channel bank station may not be at the proper location.

RS: 0.29
 FW FW 01 Right encroachment station 10009 is less than right channel bank station 10009.37 and greater than the left channel bank station 9992.06
 Right encroachment station is within the channel.
 The encroachment station or channel bank station should be adjusted.

RS: 0.29
 FW FW 03 The Left channel bank station may not be at the proper location.

RS: 0.22
 FW FW 03 The Left channel bank station may not be at the proper location.

RS: 0.16
 FW FW 04 The right station effective of 10016.4 for 1% annual chance floodplain is greater than the right channel bank station (10011.1).
 The 1% annual chance floodplain is outside the channel.
 However, the right encroachment station (10050) is outside of 1% annual chance floodplain.
 The right encroachment station should be adjusted.

RS: 0.16
 FW FW 06 The left station effective of 9990.7 for the floodway profile is more than the left channel bank station of 9990.01
 The left side of the floodway boundary is within the channel.
 The left encroachment station of 9933 is less than the left channel bank station.
 The left encroachment station should be the same as the left channel bank station.

RS: 0.13
 FW FW 01 Left encroachment station 9992 is more than left channel bank station 9991.95 and less than the right channel bank station 10017.42
 Left encroachment station is within the channel.
 The encroachment station or channel bank station should be adjusted.

RS: 0.13
 FW FW 01 Right encroachment station 10017 is less than right channel bank station 10017.42 and greater than the left channel bank station 9991.95
 Right encroachment station is within the channel.
 The encroachment station or channel bank station should be adjusted.

RS: 0.1
 FW FW 01 Left encroachment station 9981 is more than left channel bank station 9980.69 and less than the right channel bank station 10013.32
 Left encroachment station is within the channel.
 The encroachment station or channel bank station should be adjusted.

RS: 0.1
 FW FW 05 The 1% annual chance flood is contained within the channel.
 Right encroachment station 10014 is outside the channel.
 Right channel bank station is 10013.32
 Right encroachment station and/or right channel bank station should be adjusted.

RS: 0.1
 FW FW 06 The right station effective of 10009.48 for the floodway profile is less than the right channel bank station of 10013.32
 The right side of the floodway boundary is within the channel.
 The right encroachment station of 10014 is greater than the right channel bank station.
 The right encroachment station should be the same as the right channel bank station.

---Summary of Statistics---

	Minimum	Maximum
Left Overbank n Value:	0.034	0.048
Right Overbank n Value:	0	0.048
Channel n Value:	0.037	0.037
Contraction Coefficient:	0.1	0.1
Expansion Coefficient:	0.3	0.3

Typical desert washes have heavy vegetation in the wash and almost no vegetation in the overbanks. Therefore, most channel "n" values are larger than the overbanks.

ROUGHNESS COEFFICIENT CHECK

RS: 2.634
 NT RC 01 Left overbank n value is less than 0.035
 The n value for overbank is usually larger than 0.035.
 The n value should be reevaluated.

RS: 2.634
 NT RC 01 Right overbank n value is less than 0.035
 The n value for overbank is usually larger than 0.035.
 The n value should be reevaluated.

RS: 2.634
 NT RC 05 The left overbank n value of 0.034 and the right overbank n value of 0.034 are less than or equal to the channel n value of 0.037
 The overbank n values should be reevaluated.

RS: 2.582
 NT RC 01 Left overbank n value is less than 0.035
 The n value for overbank is usually larger than 0.035.
 The n value should be reevaluated.

RS: 2.582
 NT RC 01 Right overbank n value is less than 0.035
 The n value for overbank is usually larger than 0.035.
 The n value should be reevaluated.

RS: 2.582
 NT RC 05 The left overbank n value of 0.034 and the right overbank n value of 0.034 are less than or equal to the channel n value of 0.037
 The overbank n values should be reevaluated.

RS: 2.54
 NT RC 01 Left overbank n value is less than 0.035
 The n value for overbank is usually larger than 0.035.
 The n value should be reevaluated.

RS: 2.54
 NT RC 01 Right overbank n value is less than 0.035
 The n value for overbank is usually larger than 0.035.
 The n value should be reevaluated.

RS: 2.54
 NT RC 05 The left overbank n value of 0.034 and the right overbank n value of 0.034 are less than or equal to the channel n value of 0.037
 The overbank n values should be reevaluated.

RS: 2.495
 NT RC 01 Left overbank n value is less than 0.035
 The n value for overbank is usually larger than 0.035.
 The n value should be reevaluated.

RS: 2.495
 NT RC 01 Right overbank n value is less than 0.035
 The n value for overbank is usually larger than 0.035.
 The n value should be reevaluated.

RS: 2.495
 NT RC 05 The left overbank n value of 0.034 and the right overbank n value of 0.034 are less than or equal to the channel n value of 0.037
 The overbank n values should be reevaluated.

RS: 2.437
 NT RC 01 Left overbank n value is less than 0.035
 The n value for overbank is usually larger than 0.035.

ENCROACHMENT METHOD CHECK

FLOODWAY WIDTH CHECK

RS: 2.582
FW FW 01 Left encroachment station 9983 is more than left channel bank station 9982.577 and less than the right channel bank station 10011.96
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 2.582
FW FW 05 The 1% annual chance flood is contained within the channel.
Right encroachment station 10012 is outside the channel.
Right channel bank station is 10011.96
Right encroachment station and/or right channel bank station should be adjusted.

RS: 2.582
FW FW 06 The right station effective of 10008.5 for the floodway profile is less than the right channel bank station of 10011.96
The right side of the floodway boundary is within the channel.
The right encroachment station of 10012 is greater than the right channel bank station.
The right encroachment station should be the same as the right channel bank station.

RS: 2.54
FW FW 01 Left encroachment station 9978 is more than left channel bank station 9977.6 and less than the right channel bank station 10024.94
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 2.495
FW FW 01 Right encroachment station 10019 is less than right channel bank station 10019.27 and greater than the left channel bank station 9985.977
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 2.495
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 2.495
FW FW 04 The left station effective of 9985.56 for 1% annual chance floodplain is less than the left channel bank station 9985.977
The 1% annual chance floodplain is outside the channel.
However, the left encroachment station (9985) is outside of 1% annual chance floodplain.
The left encroachment station should be adjusted.

RS: 2.437
FW FW 04 The left station effective of 9983.03 for 1% annual chance floodplain is less than the left channel bank station 9983.07
The 1% annual chance floodplain is outside the channel.
However, the left encroachment station (9983) is outside of 1% annual chance floodplain.
The left encroachment station should be adjusted.

RS: 2.437
FW FW 06 The right station effective of 10013.79 for the floodway profile is less than the right channel bank station of 10015.81
The right side of the floodway boundary is within the channel.
The right encroachment station of 10016 is greater than the right channel bank station.
The right encroachment station should be the same as the right channel bank station.

RS: 2.357
FW FW 01 Left encroachment station 9985 is more than left channel bank station 9984.63 and less than the right channel bank station 10007.78
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 2.357

FW FW 03 The Left channel bank station may not be at the proper location.

2.264

FW 05 The 1% annual chance flood is contained within the channel.
Left encroachment station 9984 is outside the channel.
Left channel bank station is 9984.412
Left encroachment station and/or left channel bank station should be adjusted.

RS: 2.264

FW FW 05 The 1% annual chance flood is contained within the channel.
Right encroachment station 10023 is outside the channel.
Right channel bank station is 10022.96
Right encroachment station and/or right channel bank station should be adjusted.

RS: 2.264

FW FW 06 The left station effective of 9984.58 for the floodway profile is more than the left channel bank station of 9984.412
The left side of the floodway boundary is within the channel.
The left encroachment station of 9984 is less than the left channel bank station.
The left encroachment station should be the same as the left channel bank station.

RS: 2.264

FW FW 06 The right station effective of 10021.28 for the floodway profile is less than the right channel bank station of 10022.96
The right side of the floodway boundary is within the channel.
The right encroachment station of 10023 is greater than the right channel bank station.
The right encroachment station should be the same as the right channel bank station.

RS: 2.176

FW FW 01 Left encroachment station 9980 is more than left channel bank station 9979.6 and less than the right channel bank station 10016.9
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

2.176

FW 03 The right channel bank station may not be at the proper location.

RS: 2.1

FW FW 03 The Left channel bank station may not be at the proper location.

RS: 2.1

FW FW 04 The left station effective of 9935.04 for 1% annual chance floodplain is less than the left channel bank station 9995.06
The 1% annual chance floodplain is outside the channel.
However, the left encroachment station (9806) is outside of 1% annual chance floodplain.
The left encroachment station should be adjusted.

RS: 2.1

FW FW 04 The right station effective of 10021 for 1% annual chance floodplain is greater than the right channel bank station (10019.41).
The 1% annual chance floodplain is outside the channel.
However, the right encroachment station (10047) is outside of 1% annual chance floodplain.
The right encroachment station should be adjusted.

RS: 2.034

FW FW 01 Left encroachment station 9982 is more than left channel bank station 9981.95 and less than the right channel bank station 10014.34
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 2.034

FW FW 01 Right encroachment station 10014 is less than right channel bank station 10014.34 and greater than the left channel bank station 9981.95
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

1.853

FW 01 Left encroachment station 9968 is more than left channel bank station 9967.84 and less than the right channel bank station 10030.74
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 1.853

FW FW 03 The Left channel bank station may not be at the proper location.

1.783

FW 01 Right encroachment station 10022 is less than right channel bank station 10022.43 and greater than the left channel bank station 9970.22
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 1.686

FW FW 01 Left encroachment station 9967 is more than left channel bank station 9966.6 and less than the right channel bank station 10029.34
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 1.686

FW FW 01 Right encroachment station 10029 is less than right channel bank station 10029.34 and greater than the left channel bank station 9966.6
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 1.612

FW FW 01 Left encroachment station 9930 is more than left channel bank station 9929.65 and less than the right channel bank station 10009.87
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 1.612

FW FW 03 The Left channel bank station may not be at the proper location.

RS: 1.535

FW FW 04 The right station effective of 10040.26 for 1% annual chance floodplain is greater than the right channel bank station (10033.03).
The 1% annual chance floodplain is outside the channel.
However, the right encroachment station (10054) is outside of 1% annual chance floodplain.
The right encroachment station should be adjusted.

1.475

FW 01 Left encroachment station 9984 is more than left channel bank station 9983.57 and less than the right channel bank station 10012.59
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 1.399

FW FW 01 Left encroachment station 9987 is more than left channel bank station 9986.96 and less than the right channel bank station 10012.64
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 1.306

FW FW 01 Right encroachment station 10019 is less than right channel bank station 10019.09 and greater than the left channel bank station 9979.24
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 1.237

FW FW 01 Right encroachment station 10039 is less than right channel bank station 10039.28 and greater than the left channel bank station 9968.05
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 1.15

FW FW 01 Left encroachment station 9960 is more than left channel bank station 9959.938 and less than the right channel bank station 10025.41
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 1.15

FW FW 04 The right station effective of 10025.48 for 1% annual chance floodplain is greater than the right channel bank station (10025.41).
The 1% annual chance floodplain is outside the channel.
However, the right encroachment station (10026) is outside of 1% annual chance floodplain.
The right encroachment station should be adjusted.

RS: 1.094

FW FW 01 Right encroachment station 10036 is less than right channel bank station 10036.37 and greater than the left channel bank station 9944.282
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 1.012
FW FW 01 Left encroachment station 9980 is more than left channel bank station 9979.956 and less than the right channel bank station 10057.69
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 1.012
FW FW 03 The right channel bank station may not be at the proper location.

RS: 0.934
FW FW 01 Left encroachment station 9963 is more than left channel bank station 9962.59 and less than the right channel bank station 10040.13
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 0.934
FW FW 01 Right encroachment station 10040 is less than right channel bank station 10040.13 and greater than the left channel bank station 9962.59
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 0.85
FW FW 01 Right encroachment station 10034 is less than right channel bank station 10034.38 and greater than the left channel bank station 9980.837
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 0.737
FW FW 04 The right station effective of 10020.55 for 1% annual chance floodplain is greater than the right channel bank station (10020.36).
The 1% annual chance floodplain is outside the channel.
However, the right encroachment station (10021) is outside of 1% annual chance floodplain.
The right encroachment station should be adjusted.

RS: 0.65
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 0.65
FW FW 03 The right channel bank station may not be at the proper location.

RS: 0.591
FW FW 01 Left encroachment station 9988 is more than left channel bank station 9987.051 and less than the right channel bank station 10053.01
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 0.591
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 0.531
FW FW 03 The right channel bank station may not be at the proper location.

RS: 0.365
FW FW 01 Right encroachment station 10014 is less than right channel bank station 10015.96 and greater than the left channel bank station 9932.701
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 0.365
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 0.3
FW FW 01 Left encroachment station 9897 is more than left channel bank station 9895.269 and less than the right channel bank station 10040.06
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

Through breach section
at Bonita Dam

---Summary of Statistics---

	Minimum	Maximum
Left Overbank n Value:	0.015	0.046
Right Overbank n Value:	0.015	0.046
Channel n Value:	0.015	0.061
Contraction Coefficient:	0.1	0.3
Expansion Coefficient:	0.3	0.5

Typical desert washes have heavy vegetation in the wash and almost no vegetation in the overbanks. Therefore, most channel "n" values are larger than the overbanks.

ROUGHNESS COEFFICIENT CHECK

- RS: 4.615
NT RC 05 The left overbank n value of 0.04 and the right overbank n value of 0.04 are less than or equal to the channel n value of 0.052
The overbank n values should be reevaluated.
- RS: 4.606
NT RC 05 The left overbank n value of 0.04 and the right overbank n value of 0.04 are less than or equal to the channel n value of 0.052
The overbank n values should be reevaluated.
- RS: 4.552
NT RC 05 The left overbank n value of 0.04 and the right overbank n value of 0.04 are less than or equal to the channel n value of 0.052
The overbank n values should be reevaluated.
- RS: 4.522
NT RC 05 The left overbank n value of 0.04 and the right overbank n value of 0.04 are less than or equal to the channel n value of 0.052
The overbank n values should be reevaluated.
- RS: 4.461
NT RC 05 The left overbank n value of 0.04 and the right overbank n value of 0.04 are less than or equal to the channel n value of 0.052
The overbank n values should be reevaluated.
- RS: 4.394
NT RC 05 The left overbank n value of 0.04 and the right overbank n value

RS: 2.076
 NT RC 05 The left overbank n value of 0.044 and the right overbank n value of 0.046 are less than or equal to the channel n value of 0.056
 The overbank n values should be reevaluated.

RS: 2.011
 NT RC 05 The left overbank n value of 0.044 and the right overbank n value of 0.046 are less than or equal to the channel n value of 0.056
 The overbank n values should be reevaluated.

RS: 1.947
 NT RC 05 The left overbank n value of 0.044 and the right overbank n value of 0.046 are less than or equal to the channel n value of 0.056
 The overbank n values should be reevaluated.

RS: 1.884
 NT RC 05 The left overbank n value of 0.044 and the right overbank n value of 0.046 are less than or equal to the channel n value of 0.056
 The overbank n values should be reevaluated.

RS: 1.836
 NT RC 05 The left overbank n value of 0.044 and the right overbank n value of 0.046 are less than or equal to the channel n value of 0.056
 The overbank n values should be reevaluated.

RS: 1.764
 NT RC 05 The left overbank n value of 0.044 and the right overbank n value of 0.046 are less than or equal to the channel n value of 0.056
 The overbank n values should be reevaluated.

RS: 1.693
 NT RC 05 The left overbank n value of 0.044 and the right overbank n value of 0.046 are less than or equal to the channel n value of 0.056
 The overbank n values should be reevaluated.

RS: 1.634
 NT RC 05 The left overbank n value of 0.044 and the right overbank n value of 0.046 are less than or equal to the channel n value of 0.056
 The overbank n values should be reevaluated.

RS: 1.598
 NT RC 01 Left overbank n value is less than 0.035
 The n value for overbank is usually larger then 0.035.
 The n value should be reevaluated.

RS: 1.598
 NT RC 01 Right overbank n value is less than 0.035
 The n value for overbank is usually larger then 0.035.
 The n value should be reevaluated.

RS: 1.598
 NT RC 03 Channel n value is equal to or less than 0.025
 The n value of the channel is usually larger than 0.025.
 The n value should be reevaluated it if is not representing a concrete lined channel.

RS: 1.598
 NT RC 05 The left overbank n value of 0.015 and the right overbank n value of 0.015 are less than or equal to the channel n value of 0.015
 The overbank n values should be reevaluated.

RS: 1.591
 NT RC 01 Left overbank n value is less than 0.035
 The n value for overbank is usually larger then 0.035.
 The n value should be reevaluated.

RS: 1.591
 NT RC 01 Right overbank n value is less than 0.035
 The n value for overbank is usually larger then 0.035.
 The n value should be reevaluated.

RS: 1.591
 NT RC 03 Channel n value is equal to or less than 0.025

11EAST

The n value of the channel is usually larger than 0.025.
The n value should be reevaluated if it is not representing a
concrete lined channel.

NT TL 02 Contraction and expansion loss coefficients are 0.2 and 0.4 respectively. However, this cross section is not at the structure. They should be equal to 0.1 and 0.3.

RS: 2.737

NT TL 02 Contraction and expansion loss coefficients are 0.2 and 0.4 respectively. However, this cross section is not at the structure. They should be equal to 0.1 and 0.3.

RS: 2.675

NT TL 02 Contraction and expansion loss coefficients are 0.2 and 0.4 respectively. However, this cross section is not at the structure. They should be equal to 0.1 and 0.3.

RS: 2.618

NT TL 02 Contraction and expansion loss coefficients are 0.2 and 0.4

11EAST

respectively. However, this cross section is not at the structure.
They should be equal to 0.1 and 0.3.

RS: 1.613

NT TL 02 Contraction and expansion loss coefficients are 0.2 and 0.4
respectively. However, this cross section is not at the structure.
They should be equal to 0.1 and 0.3.

RS: 1.598

NT TL 02 Contraction and expansion loss coefficients are 0.2 and 0.4
respectively. However, this cross section is not at the structure.
They should be equal to 0.1 and 0.3.

RS: 1.591

NT TL 02 Contraction and expansion loss coefficients are 0.2 and 0.4
respectively. However, this cross section is not at the structure.
They should be equal to 0.1 and 0.3.

RS: 1.578

NT TL 02 Contraction and expansion loss coefficients are 0.2 and 0.4
respectively. However, this cross section is not at the structure.
They should be equal to 0.1 and 0.3.

RS: 1.567

NT TL 02 Contraction and expansion loss coefficients are 0.2 and 0.4
respectively. However, this cross section is not at the structure.
They should be equal to 0.1 and 0.3.

RS: 1.557

NT TL 02 Contraction and expansion loss coefficients are 0.2 and 0.4
respectively. However, this cross section is not at the structure.
They should be equal to 0.1 and 0.3.

RS: 1.546

NT TL 02 Contraction and expansion loss coefficients are 0.2 and 0.4
respectively. However, this cross section is not at the structure.
They should be equal to 0.1 and 0.3.

ENCROACHMENT METHOD CHECK

FLOODWAY WIDTH CHECK

RS: 4.615
FW FW 01 Left encroachment station 9989 is more than left channel bank station 9988.7 and less than the right channel bank station 10011.66
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 4.615
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 4.615
FW FW 03 The right channel bank station may not be at the proper location.

RS: 4.606
FW FW 01 Right encroachment station 10021 is less than right channel bank station 10021.33 and greater than the left channel bank station 9972.01
Right encroachment station is within the channel.

The encroachment station or channel bank station should be adjusted.

RS: 4.606

FW FW 03 The Left channel bank station may not be at the proper location.

RS: 4.461

FW FW 04 The right station effective of 10052.66 for 1% annual chance floodplain is greater than the right channel bank station (10025.03). The 1% annual chance floodplain is outside the channel. However, the right encroachment station (10055) is outside of 1% annual chance floodplain. The right encroachment station should be adjusted.

RS: 4.394

FW FW 01 Left encroachment station 9968 is more than left channel bank station 9967.61 and less than the right channel bank station 10035.79. Left encroachment station is within the channel. The encroachment station or channel bank station should be adjusted.

RS: 4.394

FW FW 04 The right station effective of 10035.81 for 1% annual chance floodplain is greater than the right channel bank station (10035.79). The 1% annual chance floodplain is outside the channel. However, the right encroachment station (10040) is outside of 1% annual chance floodplain. The right encroachment station should be adjusted.

RS: 4.354

FW FW 03 The right channel bank station may not be at the proper location.

RS: 4.341

FW FW 03 The Left channel bank station may not be at the proper location.

RS: 4.323

FW FW 03 The Left channel bank station may not be at the proper location.

RS: 4.284

FW FW 01 Right encroachment station 10021 is less than right channel bank station 10021.36 and greater than the left channel bank station 9980.187. Right encroachment station is within the channel. The encroachment station or channel bank station should be adjusted.

RS: 4.284

FW FW 03 The Left channel bank station may not be at the proper location.

RS: 4.254

FW FW 06 The left station effective of 9981.71 for the floodway profile is more than the left channel bank station of 9980.04. The left side of the floodway boundary is within the channel. The left encroachment station of 9978 is less than the left channel bank station. The left encroachment station should be the same as the left channel bank station.

RS: 4.208

FW FW 04 The right station effective of 10044.9 for 1% annual chance floodplain is greater than the right channel bank station (10034.52). The 1% annual chance floodplain is outside the channel. However, the right encroachment station (10045) is outside of 1% annual chance floodplain. The right encroachment station should be adjusted.

RS: 4.208

FW FW 06 The left station effective of 9987.49 for the floodway profile is more than the left channel bank station of 9987.372. The left side of the floodway boundary is within the channel. The left encroachment station of 9987 is less than the left channel bank station. The left encroachment station should be the same as the left

channel bank station.

RS: 4.114
FW FW 03 The right channel bank station may not be at the proper location.

RS: 4.077
FW FW 01 Right encroachment station 10021 is less than right channel bank station 10021.24 and greater than the left channel bank station 9969.36 Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 4.077
FW FW 03 The right channel bank station may not be at the proper location.

RS: 3.991
FW FW 04 The right station effective of 10015.72 for 1% annual chance floodplain is greater than the right channel bank station (10015.7).
The 1% annual chance floodplain is outside the channel.
However, the right encroachment station (10016) is outside of 1% annual chance floodplain.
The right encroachment station should be adjusted.

RS: 3.885
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 3.78
FW FW 01 Left encroachment station 9926 is more than left channel bank station 9925.389 and less than the right channel bank station 10026.52
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 3.78
FW FW 01 Right encroachment station 10026 is less than right channel bank station 10026.52 and greater than the left channel bank station 9925.389
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 3.729
FW FW 01 Left encroachment station 9963 is more than left channel bank station 9962.722 and less than the right channel bank station 10017.71
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 3.629
FW FW 03 The right channel bank station may not be at the proper location.

RS: 3.629
FW FW 04 The right station effective of 10046.59 for 1% annual chance floodplain is greater than the right channel bank station (10045.15).
The 1% annual chance floodplain is outside the channel.
However, the right encroachment station (10051) is outside of 1% annual chance floodplain.
The right encroachment station should be adjusted.

RS: 3.592
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 3.534
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 3.479
FW FW 01 Right encroachment station 10036 is less than right channel bank station 10036.13 and greater than the left channel bank station 9974.76
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 3.373
FW FW 03 The Left channel bank station may not be at the proper

location.

RS: 3.332
 FW FW 04 The right station effective of 10056.08 for 1% annual chance floodplain is greater than the right channel bank station (10053.09). The 1% annual chance floodplain is outside the channel. However, the right encroachment station (10061) is outside of 1% annual chance floodplain. The right encroachment station should be adjusted.

RS: 3.054
 FW FW 01 Left encroachment station 9967 is more than left channel bank station 9966.558 and less than the right channel bank station 10026.27 Left encroachment station is within the channel. The encroachment station or channel bank station should be adjusted.

RS: 3.054
 FW FW 03 The Left channel bank station may not be at the proper location.

SURCHARGE CHECK

DISCHARGE CHECK

STARTING WATER-SURFACE ELEVATION CHECK

FW SW 05 The name of stream is Reach #1
Encroachment method 1 is used.
The floodway starting water-surface elevation of 1346.00 is equal to the
natural starting water-surface elevation of 1346.00
Normal depth option with the same energy slope as the natural
profile must be used for the floodway profile and rerun the plan.
This message is not applicable for the revisions.

0		0.046	0.061	0.046	0.1	0.3

---Summary of Statistics---

	Minimum	Maximum
Left Overbank n Value:	0.046	0.046
Right Overbank n Value:	0.046	0.046
Channel n Value:	0.061	0.061
Contraction Coefficient:	0.1	0.1
Expansion Coefficient:	0.3	0.3

Typical desert washes have heavy vegetation in the wash and almost no vegetation in the overbanks. Therefore, most channel "n" values are larger than the overbanks.

ROUGHNESS COEFFICIENT CHECK

RS: 0.337
 NT RC 05 The left overbank n value of 0.046 and the right overbank n value of 0.046 are less than or equal to the channel n value of 0.061
 The overbank n values should be reevaluated.

RS: 0.27

ENCROACHMENT METHOD CHECK

FLOODWAY WIDTH CHECK

RS: 4.554

FW FW 04 The left station effective of 9994.03 for 1% annual chance floodplain is less than the left channel bank station 9994.031
The 1% annual chance floodplain is outside the channel.
However, the left encroachment station (9991) is outside of 1% annual chance floodplain.
The left encroachment station should be adjusted.

RS: 4.494

FW FW 03 The right channel bank station may not be at the proper location.

RS: 4.423

FW FW 04 The left station effective of 9976.85 for 1% annual chance floodplain is less than the left channel bank station 9976.868
The 1% annual chance floodplain is outside the channel.
However, the left encroachment station (9976) is outside of 1% annual chance floodplain.
The left encroachment station should be adjusted.

RS: 4.423

FW FW 04 The right station effective of 10006.46 for 1% annual chance floodplain is greater than the right channel bank station (10006.45).
The 1% annual chance floodplain is outside the channel.
However, the right encroachment station (10007) is outside of 1% annual chance floodplain.
The right encroachment station should be adjusted.

RS: 4.365

FW FW 01 Right encroachment station 10021 is less than right channel bank station 10021.31 and greater than the left channel bank station 9987.01
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 4.332

FW FW 01 Left encroachment station 9978 is more than left channel bank station 9977.83 and less than the right channel bank station 10008.08
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 4.332

FW FW 01 Right encroachment station 10008 is less than right channel bank station 10008.08 and greater than the left channel bank station 9977.83
Right encroachment station is within the channel.

The encroachment station or channel bank station should be adjusted.

RS: 4.332

FW FW 03 The Left channel bank station may not be at the proper location.

RS: 4.299

FW FW 01 Right encroachment station 10027 is less than right channel bank station 10027.06 and greater than the left channel bank station 9979.67
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 4.239

FW FW 01 Right encroachment station 10018 is less than right channel bank station 10018.28 and greater than the left channel bank station 9980.192
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 4.239

FW FW 03 The Left channel bank station may not be at the proper location.

RS: 4.127

FW FW 01 Right encroachment station 10033 is less than right channel bank station 10034.21 and greater than the left channel bank station 9979.11
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 4.021

FW FW 03 The right channel bank station may not be at the proper location.

RS: 3.951

FW FW 01 Right encroachment station 10004 is less than right channel bank station 10004.65 and greater than the left channel bank station 9980.115
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 3.951

FW FW 03 The right channel bank station may not be at the proper location.

RS: 3.902

FW FW 01 Right encroachment station 10011 is less than right channel bank station 10011.17 and greater than the left channel bank station 9978.832
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 3.902

FW FW 03 The right channel bank station may not be at the proper location.

RS: 3.867

FW FW 01 Right encroachment station 10008 is less than right channel bank station 10009.12 and greater than the left channel bank station 9989.887
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 3.804

FW FW 01 Left encroachment station 9973 is more than left channel bank station 9972.709 and less than the right channel bank station 10008.62
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 3.804

FW FW 03 The Left channel bank station may not be at the proper location.

RS: 3.804

FW FW 06 The right station effective of 10008.23 for the floodway profile is less than the right channel bank station of 10008.62
The right side of the floodway boundary is within the channel.
The right encroachment station of 10013 is greater than the right channel bank station.

The right encroachment station should be the same as the right channel bank station.

RS: 3.716

FW FW 01 Right encroachment station 10014 is less than right channel bank station 10014.13 and greater than the left channel bank station 9984.036
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 3.716

FW FW 05 The 1% annual chance flood is contained within the channel.
Left encroachment station 9984 is outside the channel.
Left channel bank station is 9984.036
Left encroachment station and/or left channel bank station should be adjusted.

RS: 3.582

FW FW 01 Right encroachment station 10013 is less than right channel bank station 10013.09 and greater than the left channel bank station 9984.991
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 3.506

FW FW 05 The 1% annual chance flood is contained within the channel.
Left encroachment station 9968 is outside the channel.
Left channel bank station is 9970.676
Left encroachment station and/or left channel bank station should be adjusted.

RS: 3.506

FW FW 05 The 1% annual chance flood is contained within the channel.
Right encroachment station 10095 is outside the channel.
Right channel bank station is 10013.38
Right encroachment station and/or right channel bank station should be adjusted.

RS: 3.506

FW FW 06 The left station effective of 9970.7 for the floodway profile is more than the left channel bank station of 9970.676
The left side of the floodway boundary is within the channel.
The left encroachment station of 9968 is less than the left channel bank station.
The left encroachment station should be the same as the left channel bank station.

RS: 3.506

FW FW 06 The right station effective of 10013.34 for the floodway profile is less than the right channel bank station of 10013.38
The right side of the floodway boundary is within the channel.
The right encroachment station of 10095 is greater than the right channel bank station.
The right encroachment station should be the same as the right channel bank station.

RS: 3.46

FW FW 04 The left station effective of 9979.86 for 1% annual chance floodplain is less than the left channel bank station 9986.36
The 1% annual chance floodplain is outside the channel.
However, the left encroachment station (9973) is outside of 1% annual chance floodplain.
The left encroachment station should be adjusted.

RS: 3.46

FW FW 04 The right station effective of 10048.79 for 1% annual chance floodplain is greater than the right channel bank station (10020.27).
The 1% annual chance floodplain is outside the channel.
However, the right encroachment station (10097) is outside of 1% annual chance floodplain.
The right encroachment station should be adjusted.

RS: 3.41

FW FW 04 The left station effective of 9955.78 for 1% annual chance floodplain is less than the left channel bank station 9955.782
The 1% annual chance floodplain is outside the channel.
However, the left encroachment station (9950) is outside of 1% annual chance floodplain.
The left encroachment station should be adjusted.

RS: 3.342
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 3.342
FW FW 04 The left station effective of 9973.48 for 1% annual chance floodplain is less than the left channel bank station 9973.482
The 1% annual chance floodplain is outside the channel.
However, the left encroachment station (9972) is outside of 1% annual chance floodplain.
The left encroachment station should be adjusted.

RS: 3.283
FW FW 01 Left encroachment station 9975 is more than left channel bank station 9974.836 and less than the right channel bank station 10016.66
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 3.283
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 3.283
FW FW 06 The right station effective of 10016.65 for the floodway profile is less than the right channel bank station of 10016.66
The right side of the floodway boundary is within the channel.
The right encroachment station of 10023 is greater than the right channel bank station.
The right encroachment station should be the same as the right channel bank station.

RS: 3.262
FW FW 05 The 1% annual chance flood is contained within the channel.
Left encroachment station 9961 is outside the channel.
Left channel bank station is 9981.34
Left encroachment station and/or left channel bank station should be adjusted.

RS: 3.262
FW FW 05 The 1% annual chance flood is contained within the channel.
Right encroachment station 10031 is outside the channel.
Right channel bank station is 10022.52
Right encroachment station and/or right channel bank station should be adjusted.

RS: 3.262
FW FW 06 The left station effective of 9981.83 for the floodway profile is more than the left channel bank station of 9981.34
The left side of the floodway boundary is within the channel.
The left encroachment station of 9961 is less than the left channel bank station.
The left encroachment station should be the same as the left channel bank station.

RS: 3.129
FW FW 01 Right encroachment station 10015 is less than right channel bank station 10015.49 and greater than the left channel bank station 9977.453
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 3.09
FW FW 01 Left encroachment station 9967 is more than left channel bank station 9966.67 and less than the right channel bank station 10016.43
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 3.09
FW FW 01 Right encroachment station 10016 is less than right channel bank station 10016.43 and greater than the left channel bank station 9966.67
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 3.09
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 3.046
FW FW 01 Right encroachment station 10027 is less than right channel bank station 10027.39 and greater than the left channel bank station 9984.081
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 2.991
FW FW 01 Right encroachment station 10008 is less than right channel bank station 10008.2 and greater than the left channel bank station 9979.56
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 2.973
FW FW 01 Right encroachment station 10015 is less than right channel bank station 10015.02 and greater than the left channel bank station 9968.281
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 2.896
FW FW 04 The left station effective of 9995.23 for 1% annual chance floodplain is less than the left channel bank station 9995.402
The 1% annual chance floodplain is outside the channel.
However, the left encroachment station (9953) is outside of 1% annual chance floodplain.
The left encroachment station should be adjusted.

RS: 2.896
FW FW 04 The right station effective of 10034.25 for 1% annual chance floodplain is greater than the right channel bank station (10022.71).
The 1% annual chance floodplain is outside the channel.
However, the right encroachment station (10074) is outside of 1% annual chance floodplain.
The right encroachment station should be adjusted.

RS: 2.814
FW FW 01 Right encroachment station 10017 is less than right channel bank station 10020 and greater than the left channel bank station 9980
Right encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 2.77
FW FW 03 The right channel bank station may not be at the proper location.

RS: 2.712
FW FW 01 Left encroachment station 9982 is more than left channel bank station 9981.77 and less than the right channel bank station 10020.84
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 2.637
FW FW 06 The left station effective of 9975.12 for the floodway profile is more than the left channel bank station of 9975.06
The left side of the floodway boundary is within the channel.
The left encroachment station of 9975 is less than the left channel bank station.
The left encroachment station should be the same as the left channel bank station.

RS: 2.62
FW FW 01 Left encroachment station 9978 is more than left channel bank station 9977.902 and less than the right channel bank station 10032.3
Left encroachment station is within the channel.
The encroachment station or channel bank station should be adjusted.

RS: 2.62
FW FW 04 The right station effective of 10114.56 for 1% annual chance floodplain is greater than the right channel bank station (10032.3).
The 1% annual chance floodplain is outside the channel.
However, the right encroachment station (10120) is outside of 1% annual chance floodplain.
The right encroachment station should be adjusted.

3.716		0.046	0.06	0.046	0.1	0.3

---Summary of Statistics---

	Minimum	Maximum
Left Overbank n Value:	0.046	0.046
Right Overbank n Value:	0.046	0.046
Channel n Value:	0.06	0.06
Contraction Coefficient:	0.1	0.1
Expansion Coefficient:	0.3	0.3

Typical desert washes have heavy vegetation in the wash and almost no vegetation in the overbanks. Therefore, most channel "n" values are larger than the overbanks.

ROUGHNESS COEFFICIENT CHECK

RS: 4.109
 NT RC 05 The left overbank n value of 0.046 and the right overbank n value of 0.046 are less than or equal to the channel n value of 0.06
 The overbank n values should be reevaluated.

RS: 4.07
 NT RC 05 The left overbank n value of 0.046 and the right overbank n value of 0.046 are less than or equal to the channel n value of 0.06
 The overbank n values should be reevaluated.

RS: 3.997
 NT RC 05 The left overbank n value of 0.046 and the right overbank n value of 0.046 are less than or equal to the channel n value of 0.06
 The overbank n values should be reevaluated.

RS: 3.933
 NT RC 05 The left overbank n value of 0.046 and the right overbank n value of 0.046 are less than or equal to the channel n value of 0.06
 The overbank n values should be reevaluated.

---Summary of Statistics---

	Minimum	Maximum
Left Overbank n Value:	0.045	0.045
Right Overbank n Value:	0.045	0.045
Channel n Value:	0.056	0.056
Contraction Coefficient:	0.1	0.2
Expansion Coefficient:	0.3	0.4

Typical desert washes have heavy vegetation in the wash and almost no vegetation in the overbanks. Therefore, most channel "n" values are larger than the overbanks.

ROUGHNESS COEFFICIENT CHECK

- RS: 2.294
 NT RC 05 The left overbank n value of 0.045 and the right overbank n value of 0.045 are less than or equal to the channel n value of 0.056
 The overbank n values should be reevaluated.
- RS: 2.239
 NT RC 05 The left overbank n value of 0.045 and the right overbank n value of 0.045 are less than or equal to the channel n value of 0.056
 The overbank n values should be reevaluated.

FLOODWAY WIDTH CHECK

RS: 2.294
 FW FW 03 The Left channel bank station may not be at the proper location.

RS: 2.294
 FW FW 03 The right channel bank station may not be at the proper location.

RS: 2.137
 FW FW 03 The right channel bank station may not be at the proper location.

RS: 2.076
 FW FW 03 The Left channel bank station may not be at the proper location.

RS: 2.043
 FW FW 03 The Left channel bank station may not be at the proper location.

RS: 2.043
 FW FW 03 The right channel bank station may not be at the proper location.

RS: 2.027
 FW FW 03 The Left channel bank station may not be at the proper location.

RS: 2.006
 FW FW 04 The left station effective of 9991.34 for 1% annual chance floodplain is less than the left channel bank station 9991.749
 The 1% annual chance floodplain is outside the channel.
 However, the left encroachment station (9991) is outside of 1% annual chance floodplain.
 The left encroachment station should be adjusted.

RS: 2.006
 FW FW 06 The right station effective of 10009.49 for the floodway profile is less than the right channel bank station of 10009.72
 The right side of the floodway boundary is within the channel.
 The right encroachment station of 10010 is greater than the right channel bank station.
 The right encroachment station should be the same as the right channel bank station.

RS: 2.001
 FW FW 03 The right channel bank station may not be at the proper location.

RS: 1.934
 FW FW 06 The right station effective of 10063.03 for the floodway profile is less than the right channel bank station of 10064.02
 The right side of the floodway boundary is within the channel.
 The right encroachment station of 10065 is greater than the right channel bank station.
 The right encroachment station should be the same as the right channel bank station.

RS: 1.918
 FW FW 05 The 1% annual chance flood is contained within the channel.
 Left encroachment station 9972 is outside the channel.
 Left channel bank station is 9972.04
 Left encroachment station and/or left channel bank station should be adjusted.

RS: 1.918
 FW FW 05 The 1% annual chance flood is contained within the channel.
 Right encroachment station 10052 is outside the channel.

Right channel bank station is 10051.82
 Right encroachment station and/or right channel bank station should be adjusted.

RS: 1.918
 FW FW 06 The left station effective of 9975.92 for the floodway profile is more than the left channel bank station of 9972.04
 The left side of the floodway boundary is within the channel.
 The left encroachment station of 9972 is less than the left channel bank station.
 The left encroachment station should be the same as the left channel bank station.

RS: 1.918
 FW FW 06 The right station effective of 10051.39 for the floodway profile is less than the right channel bank station of 10051.82
 The right side of the floodway boundary is within the channel.
 The right encroachment station of 10052 is greater than the right channel bank station.
 The right encroachment station should be the same as the right channel bank station.

RS: 1.896
 FW FW 01 Left encroachment station 9970 is more than left channel bank station 9969.53 and less than the right channel bank station 10017.86
 Left encroachment station is within the channel.
 The encroachment station or channel bank station should be adjusted.

RS: 1.896
 FW FW 05 The 1% annual chance flood is contained within the channel.
 Right encroachment station 10018 is outside the channel.
 Right channel bank station is 10017.86
 Right encroachment station and/or right channel bank station should be adjusted.

RS: 1.896
 FW FW 06 The right station effective of 10016.03 for the floodway profile is less than the right channel bank station of 10017.86
 The right side of the floodway boundary is within the channel.
 The right encroachment station of 10018 is greater than the right channel bank station.
 The right encroachment station should be the same as the right channel bank station.

RS: 1.842
 FW FW 01 Left encroachment station 9990 is more than left channel bank station 9989.89 and less than the right channel bank station 10016.62
 Left encroachment station is within the channel.
 The encroachment station or channel bank station should be adjusted.

1.635		0.045	0.056	0.045	0.1	0.3

---Summary of Statistics---

	Minimum	Maximum
Left Overbank n Value:	0.045	0.045
Right Overbank n Value:	0.045	0.045
Channel n Value:	0.056	0.056
Contraction Coefficient:	0.1	0.1
Expansion Coefficient:	0.3	0.3

Typical desert washes have heavy vegetation in the wash and almost no vegetation in the overbanks. Therefore, most channel "n" values are larger than the overbanks.

ROUGHNESS COEFFICIENT CHECK

RS: 2.244
 NT RC 05 The left overbank n value of 0.045 and the right overbank n value of 0.045 are less than or equal to the channel n value of 0.056. The overbank n values should be reevaluated.

RS: 2.168

FLOODWAY WIDTH CHECK

RS: 2.168
 FW FW 05 The 1% annual chance flood is contained within the channel.
 Left encroachment station 0 is outside the channel.
 Left channel bank station is 276.547
 Left encroachment station and/or left channel bank station should be adjusted.

RS: 2.168
 FW FW 06 The left station effective of 279.66 for the floodway profile is more
 than the left channel bank station of 276.547
 The left side of the floodway boundary is within the channel.
 The left encroachment station of 0 is less than the left channel
 bank station.
 The left encroachment station should be the same as the left
 channel bank station.

RS: 2.135
 FW FW 05 The 1% annual chance flood is contained within the channel.

Left encroachment station 0 is outside the channel.
 Left channel bank station is 84.15
 Left encroachment station and/or left channel bank station should be adjusted.

RS: 2.135
 FW FW 06 The left station effective of 94.34 for the floodway profile is more than the left channel bank station of 84.15
 The left side of the floodway boundary is within the channel.
 The left encroachment station of 0 is less than the left channel bank station.
 The left encroachment station should be the same as the left channel bank station.

RS: 2.112
 FW FW 01 Right encroachment station 10018 is less than right channel bank station 10018.21 and greater than the left channel bank station 9978.25
 Right encroachment station is within the channel.
 The encroachment station or channel bank station should be adjusted.

RS: 2.089
 FW FW 01 Left encroachment station 9965 is more than left channel bank station 9964.879 and less than the right channel bank station 10031.96
 Left encroachment station is within the channel.
 The encroachment station or channel bank station should be adjusted.

RS: 2.089
 FW FW 03 The Left channel bank station may not be at the proper location.

RS: 2.089
 FW FW 03 The right channel bank station may not be at the proper location.

Errors Warnings and Notes for Plan : 310032 (Continued)

Warning:	The parabolic search method failed to converge on critical depth. The program will try the cross section slice/secant method to find critical depth.
Location:	River: Reach #1 Reach: Iona North RS: 4.584 Profile: Floodplain
Warning:	The energy equation could not be balanced within the specified number of iterations. The program used critical depth for the water surface and continued on with the calculations.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning:	During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.
Location:	River: Reach #1 Reach: Iona North RS: 4.584 Profile: Floodway
Warning:	The energy equation could not be balanced within the specified number of iterations. The program used critical depth for the water surface and continued on with the calculations.
Warning:	The velocity head has changed by more than 0.5 ft (0.15 m). This may indicate the need for additional cross sections.
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning:	The cross section had to be extended vertically during the critical depth calculations.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning:	During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.

Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section.
	This may indicate the need for additional cross sections.
Location:	River: Reach #1 Reach: Iona North RS: 0.305 Profile: Floodplain
Warning:	The cross-section end points had to be extended vertically for the computed water surface.
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section.

Errors Warnings and Notes for Plan : 310032 (Continued)

	This may indicate the need for additional cross sections.
Location:	River: Reach #1 Reach: Iona North RS: 0.305 Profile: Floodway
Warning:	The energy loss was greater than 1.0 ft (0.3 m), between the current and previous cross section.
	This may indicate the need for additional cross sections.
Location:	River: Reach #1 Reach: Iona North RS: 0.219 Profile: Floodplain
Warning:	The energy loss was greater than 1.0 ft (0.3 m), between the current and previous cross section.
	This may indicate the need for additional cross sections.
Note:	Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
Location:	River: Reach #1 Reach: Iona North RS: 0.219 Profile: Floodway
Warning:	The energy loss was greater than 1.0 ft (0.3 m), between the current and previous cross section.
	This may indicate the need for additional cross sections.
Note:	Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
Location:	River: Reach #1 Reach: Iona North RS: 0.104 Profile: Floodplain
Warning:	Divided flow computed for this cross-section.
Warning:	The energy loss was greater than 1.0 ft (0.3 m), between the current and previous cross section.
	This may indicate the need for additional cross sections.
Note:	Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
Location:	River: Reach #1 Reach: Iona North RS: 0.104 Profile: Floodway
Warning:	The energy equation could not be balanced within the specified number of iterations. The program used critical depth for the water surface and continued on with the calculations.
Warning:	The energy loss was greater than 1.0 ft (0.3 m), between the current and previous cross section.
	This may indicate the need for additional cross sections.
Warning:	The parabolic search method failed to converge on critical depth. The program will try the cross section slice/secant method to find critical depth.
Note:	Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
Location:	River: Reach #1 Reach: Iona North RS: 0 Profile: Floodplain
Warning:	Divided flow computed for this cross-section.
Location:	River: Reach #1 Reach: Iona North RS: 0 Profile: Floodway
Warning:	Divided flow computed for this cross-section.
Warning:	Slope too steep for slope area to converge during supercritical flow calculations (normal depth is below critical depth). Water surface set to critical depth.

IONA NORTH WEST SLPIT-1

Errors Warnings and Notes for Plan : Iona North W

Location:	River: Reach #2 Reach: Iona North WS-1 RS: 0.549 Profile: Floodplain
Warning:	The energy equation could not be balanced within the specified number of iterations. The program used critical depth for the water surface and continued on with the calculations.
Warning:	Divided flow computed for this cross-section.
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning:	During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.
Location:	River: Reach #2 Reach: Iona North WS-1 RS: 0.45 Profile: Floodplain
Warning:	Divided flow computed for this cross-section.
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Reach #2 Reach: Iona North WS-1 RS: 0.388 Profile: Floodplain
Warning:	The energy equation could not be balanced within the specified number of iterations. The program selected the water surface that had the least amount of error between computed and assumed values.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning:	During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.

Location:	River: Reach #1 Reach: 2 West Trib-2 RS: 0.726 Profile: Floodplain
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Reach #1 Reach: 2 West Trib-2 RS: 0.638 Profile: Floodplain
Warning:	Divided flow computed for this cross-section.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Note:	Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
Location:	River: Reach #1 Reach: 2 West Trib-2 RS: 0.508 Profile: Floodplain
Warning:	Divided flow computed for this cross-section.
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Reach #1 Reach: 2 West Trib-2 RS: 0.405 Profile: Floodplain
Warning:	The energy equation could not be balanced within the specified number of iterations. The program used critical depth for the water surface and continued on with the calculations.
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning:	During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.
Location:	River: Reach #1 Reach: 2 West Trib-2 RS: 0.313 Profile: Floodplain
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Reach #1 Reach: 2 West Trib-2 RS: 0.225 Profile: Floodplain
Warning:	The energy equation could not be balanced within the specified number of iterations. The program used critical depth for the water surface and continued on with the calculations.
Warning:	Divided flow computed for this cross-section.
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning:	During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.
Location:	River: Reach #1 Reach: 2 West Trib-2 RS: 0.154 Profile: Floodplain
Warning:	The cross-section end points had to be extended vertically for the computed water surface.
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Note:	Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
Location:	River: Reach #1 Reach: 2 West Trib-2 RS: 0.084 Profile: Floodplain
Note:	Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.

Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Reach #1 Reach: All elevations a RS: 0.291 Profile: Floodplain
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Reach #1 Reach: All elevations a RS: 0.198 Profile: Floodplain
Warning:	Divided flow computed for this cross-section.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Reach #1 Reach: All elevations a RS: 0.145 Profile: Floodplain
Warning:	Divided flow computed for this cross-section.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Note:	Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
Location:	River: Reach #1 Reach: All elevations a RS: 0.099 Profile: Floodplain
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Reach #1 Reach: All elevations a RS: 0.043 Profile: Floodplain
Warning:	Divided flow computed for this cross-section.

IONA EAST (SOUTH OF CAP CANAL)

Errors Warnings and Notes for Plan : 310.032

Location:	River: Reach #1 Reach: Iona East (South RS: 3.709 Profile: Floodplain
Warning:	The energy equation could not be balanced within the specified number of iterations. The program used critical depth for the water surface and continued on with the calculations.
Warning:	The cross-section end points had to be extended vertically for the computed water surface.
Warning:	The velocity head has changed by more than 0.5 ft (0.15 m). This may indicate the need for additional cross sections.
Warning:	The cross section had to be extended vertically during the critical depth calculations.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning:	During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.
Note:	Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
Location:	River: Reach #1 Reach: Iona East (South RS: 3.683 Profile: Floodplain
Warning:	The energy equation could not be balanced within the specified number of iterations. The program used critical depth for the water surface and continued on with the calculations.

Errors Warnings and Notes for Plan : 310.032

Location:	River: Reach #1 Reach: 1 West (South of RS: 6.497 Profile: Floodplain
Warning:	The energy equation could not be balanced within the specified number of iterations. The program used critical depth for the water surface and continued on with the calculations.
Warning:	The velocity head has changed by more than 0.5 ft (0.15 m). This may indicate the need for additional cross sections.
Warning:	The cross section had to be extended vertically during the critical depth calculations.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning:	During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.
Note:	Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
Location:	River: Reach #1 Reach: 1 West (South of RS: 6.453 Profile: Floodplain
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Note:	Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
Location:	River: Reach #1 Reach: 1 West (South of RS: 6.39 Profile: Floodplain
Warning:	The energy equation could not be balanced within the specified number of iterations. The program selected the water surface that had the least amount of error between computed and assumed values.
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning:	During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.
Note:	Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.

Errors Warnings and Notes for Plan : 310.032

Location:	River: Reach #1 Reach: 4 East (South of RS: 2.418 Profile: Floodplain
Warning:	The energy equation could not be balanced within the specified number of iterations. The program used critical depth for the water surface and continued on with the calculations.
Warning:	The velocity head has changed by more than 0.5 ft (0.15 m). This may indicate the need for additional cross sections.
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning:	The energy loss was greater than 1.0 ft (0.3 m), between the current and previous cross section. This may indicate the need for additional cross sections.
Warning:	During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.
Location:	River: Reach #1 Reach: 4 East (South of RS: 2.377 Profile: Floodplain
Warning:	The energy loss was greater than 1.0 ft (0.3 m), between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Reach #1 Reach: 4 East (South of RS: 2.336 Profile: Floodplain
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning:	The energy loss was greater than 1.0 ft (0.3 m), between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Reach #1 Reach: 4 East (South of RS: 2.305 Profile: Floodplain
Warning:	The energy loss was greater than 1.0 ft (0.3 m), between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Reach #1 Reach: 4 East (South of RS: 2.23 Profile: Floodplain
Warning:	The energy loss was greater than 1.0 ft (0.3 m), between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Reach #1 Reach: 4 East (South of RS: 2.17 Profile: Floodplain
Warning:	The energy loss was greater than 1.0 ft (0.3 m), between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Reach #1 Reach: 4 East (South of RS: 2.108 Profile: Floodplain
Warning:	The energy loss was greater than 1.0 ft (0.3 m), between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Reach #1 Reach: 4 East (South of RS: 2.078 Profile: Floodplain
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Location:	River: Reach #1 Reach: 4 East (South of RS: 2.051 Profile: Floodplain
Warning:	The velocity head has changed by more than 0.5 ft (0.15 m). This may indicate the need for additional cross sections.
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning:	The energy loss was greater than 1.0 ft (0.3 m), between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Reach #1 Reach: 4 East (South of RS: 1.992 Profile: Floodplain
Warning:	The velocity head has changed by more than 0.5 ft (0.15 m). This may indicate the need for additional cross sections.
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Location:	River: Reach #1 Reach: 4 East (South of RS: 1.938 Profile: Floodplain
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Note:	Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
Location:	River: Reach #1 Reach: 4 East (South of RS: 1.932 Profile: Floodplain

Warning:	The energy equation could not be balanced within the specified number of iterations. The program selected the water surface that had the least amount of error between computed and assumed values.
Warning:	Divided flow computed for this cross-section.
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning:	During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.
Location:	River: Reach #1 Reach: 6 East RS: 2.146 Profile: Floodplain
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Location:	River: Reach #1 Reach: 6 East RS: 2.116 Profile: Floodplain
Warning:	Divided flow computed for this cross-section.
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Note:	Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
Location:	River: Reach #1 Reach: 6 East RS: 2.08 Profile: Floodplain
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Note:	Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
Location:	River: Reach #1 Reach: 6 East RS: 2.054 Profile: Floodplain
Warning:	Divided flow computed for this cross-section.
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.

	surface was used.
Location:	River: Reach #1 Reach: 11 East (South o RS: 0 Profile: Floodplain
Warning:	Divided flow computed for this cross-section.
Warning:	The cross section had to be extended vertically during the critical depth calculations.
Note:	Multiple critical depths were found at this location. The critical depth with the lowest, valid, water
	surface was used.

11 EAST DIKE FAILURE

Errors Warnings and Notes for Plan : 310.032

Location:	River: Reach #1 Reach: 11 East (South o RS: 0.337 Profile: Floodplain
Warning:	Divided flow computed for this cross-section.
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Note:	Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
Location:	River: Reach #1 Reach: 11 East (South o RS: 0.27 Profile: Floodplain
Warning:	Divided flow computed for this cross-section.
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Note:	Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
Location:	River: Reach #1 Reach: 11 East (South o RS: 0.217 Profile: Floodplain
Warning:	Divided flow computed for this cross-section.
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Note:	Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
Location:	River: Reach #1 Reach: 11 East (South o RS: 0.189 Profile: Floodplain
Warning:	Divided flow computed for this cross-section.
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Note:	Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
Location:	River: Reach #1 Reach: 11 East (South o RS: 0.14 Profile: Floodplain
Warning:	Divided flow computed for this cross-section.
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Note:	Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
Location:	River: Reach #1 Reach: 11 East (South o RS: 0.064 Profile: Floodplain
Warning:	The cross-section end points had to be extended vertically for the computed water surface.
Warning:	The velocity head has changed by more than 0.5 ft (0.15 m). This may indicate the need for additional cross sections.
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Note:	Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
Location:	River: Reach #1 Reach: 11 East (South o RS: 0 Profile: Floodplain
Warning:	Divided flow computed for this cross-section.
Warning:	The cross section had to be extended vertically during the critical depth calculations.
Note:	Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.

BONITA DIKE CHANNEL

Errors Warnings and Notes for Plan : Bonita Dike

Location:	River: Reach #1 Reach: Bonita Dike Chan RS: 0.283 Profile: Floodplain
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Location:	River: Reach #1 Reach: Bonita Dike Chan RS: 0.241 Profile: Floodplain
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Reach #1 Reach: Bonita Dike Chan RS: 0.186 Profile: Floodplain
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Reach #1 Reach: Bonita Dike Chan RS: 0.148 Profile: Floodplain
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Reach #1 Reach: Bonita Dike Chan RS: 0.116 Profile: Floodplain
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Reach #1 Reach: Bonita Dike Chan RS: 0.059 Profile: Floodplain
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Reach #1 Reach: Bonita Dike Chan RS: 0.018 Profile: Floodplain
Warning:	The energy equation could not be balanced within the specified number of iterations. The program selected the water surface that had the least amount of error between computed and assumed values.
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning:	During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.

Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Reach #1 Reach: 12 East (South o RS: 2.814 Profile: Floodway
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Reach #1 Reach: 12 East (South o RS: 2.77 Profile: Floodplain
Warning:	Divided flow computed for this cross-section.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Note:	Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
Location:	River: Reach #1 Reach: 12 East (South o RS: 2.77 Profile: Floodway
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Note:	Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
Location:	River: Reach #1 Reach: 12 East (South o RS: 2.712 Profile: Floodplain
Warning:	Divided flow computed for this cross-section.
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Reach #1 Reach: 12 East (South o RS: 2.712 Profile: Floodway
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7

Errors Warnings and Notes for Plan : 310.032 (Continued)

	or greater than 1.4. This may indicate the need for additional cross sections.
Warning:	The cross section had to be extended vertically during the critical depth calculations.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning:	The parabolic search method failed to converge on critical depth. The program will try the cross section slice/secant method to find critical depth.
Location:	River: Reach #1 Reach: 12 East (South o RS: 2.637 Profile: Floodplain
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Reach #1 Reach: 12 East (South o RS: 2.637 Profile: Floodway
Warning:	The energy equation could not be balanced within the specified number of iterations. The program selected the water surface that had the least amount of error between computed and assumed values.
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning:	During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.
Location:	River: Reach #1 Reach: 12 East (South o RS: 2.62 Profile: Floodplain
Warning:	Divided flow computed for this cross-section.
Location:	River: Reach #1 Reach: 12 East (South o RS: 2.62 Profile: Floodway
Warning:	Divided flow computed for this cross-section.

12 EAST SPLIT

Location:	River: Reach #1 Reach: 14 East RS: 2.112 Profile: Floodway
Warning:	The velocity head has changed by more than 0.5 ft (0.15 m). This may indicate the need for additional cross sections.
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Reach #1 Reach: 14 East RS: 2.089 Profile: Floodplain
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Reach #1 Reach: 14 East RS: 2.089 Profile: Floodway
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Reach #1 Reach: 14 East RS: 2.026 Profile: Floodplain
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Reach #1 Reach: 14 East RS: 2.026 Profile: Floodway
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Reach #1 Reach: 14 East RS: 1.941 Profile: Floodplain
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Reach #1 Reach: 14 East RS: 1.941 Profile: Floodway
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Reach #1 Reach: 14 East RS: 1.894 Profile: Floodplain

Errors Warnings and Notes for Plan : 310.032 (Continued)

Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section.
	This may indicate the need for additional cross sections.
Location:	River: Reach #1 Reach: 14 East RS: 1.894 Profile: Floodway
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section.
	This may indicate the need for additional cross sections.
Location:	River: Reach #1 Reach: 14 East RS: 1.831 Profile: Floodplain
Warning:	The energy equation could not be balanced within the specified number of iterations. The program selected the water surface that had the least amount of error between computed and assumed values.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section.
	This may indicate the need for additional cross sections.
Warning:	During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.
Location:	River: Reach #1 Reach: 14 East RS: 1.831 Profile: Floodway
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section.
	This may indicate the need for additional cross sections.
Location:	River: Reach #1 Reach: 14 East RS: 1.772 Profile: Floodplain
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section.
	This may indicate the need for additional cross sections.
Location:	River: Reach #1 Reach: 14 East RS: 1.772 Profile: Floodway
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section.
	This may indicate the need for additional cross sections.

- ① River: "RIVER-1" Reach: "Reach-1" RS:18.087
 - Station and elevation data contains duplicate points. At point(s):2,3,4,5 The cross section points filter can be used to remove duplicate points.
- ① River: "RIVER-1" Reach: "Reach-1" RS:17.763
 - Station and elevation data contains duplicate points. At point(s):6 The cross section points filter can be used to remove duplicate points.
- ② River: "RIVER-1" Reach: "Reach-1" RS:17.513 BR
 - Bridge/Culvert has an upstream distance of zero, HEC-RAS requires a positive distance between the upstream cross section and the face of the bridge. A zero distance was allowed in versions prior to 3.0. A table was added to the geometric data editor to facilitate global editing of bridge distances and widths. Some length will need to be added to the upstream distance column and an amount greater than that will have to be subtracted from the bridge width column.
- ② River: "RIVER-1" Reach: "Reach-1" RS:17.482 BR
 - Bridge/Culvert has an upstream distance of zero, HEC-RAS requires a positive distance between the upstream cross section and the face of the bridge. A zero distance was allowed in versions prior to 3.0. A table was added to the geometric data editor to facilitate global editing of bridge distances and widths. Some length will need to be added to the upstream distance column and an amount greater than that will have to be subtracted from the bridge width column.

↑
Warning Messages from HEC-RAS when importing HEC-2 model.

① Action taken: Using the filter cross-section points option in HEC-RAS, the unnecessary points were removed. The modified cross sections were compared to the unchanged cross sections, and there were no differences.

② Action taken: The distance was changed to .01. The bridge widths were changed so that they were slightly narrower than the distance between cross sections upstream and downstream.

⇒ The water surface elevations did not change.
