paved road.*

---Summary of Statistics---

	Minimum	Maximum
Left Overbank n Value:	0.02	0.065
Right Overbank n Value:	0.02	0.065
Channel n Value:	0.02	0.065
Contraction Coefficient:	0.1	0.1
Expansion Coefficient:	0.3	0.3

ROUGHNESS COEFFICIENT CHECK

RS: 5.51

NT RC 05 The left overbank n value of 0.042 and the right overbank n value of 0.042 are less than or equal to the channel n value of 0.046
The overbank n values should be reevaluated.

*The channel has heavy
vegetation therefore
overbank n-values are
less.*

RS: 3.757

NT RC 05 The left overbank n value of 0.042 and the right overbank n value of 0.042 are less than or equal to the channel n value of 0.046
The overbank n values should be reevaluated.

RS: 2.142

NT RC 01 Left overbank n value is less than 0.035
The n value for overbank is usually larger than 0.035.
The n value should be reevaluated.

*Very clean, smooth,
well-maintained paved
road.*

---Summary of Statistics---

	Minimum	Maximum
Left Overbank n Value:	0.02	0.075
Right Overbank n Value:	0.02	0.075
Channel n Value:	0.02	0.075
Contraction Coefficient:	0.1	0.3
Expansion Coefficient:	0.3	0.5

General Note for RC05
The channel has heavy vegetation therefore overbank n-values are less.

ROUGHNESS COEFFICIENT CHECK

RS: 10.958
 NT RC 05 The left overbank n value of 0.037 and the right overbank n value of 0.037 are less than or equal to the channel n value of 0.037
 The overbank n values should be reevaluated.

RS: 9.184
 NT RC 05 The left overbank n value of 0.037 and the right overbank n value of 0.037 are less than or equal to the channel n value of 0.037
 The overbank n values should be reevaluated.

RS: 8.815
 NT RC 05 The left overbank n value of 0.037 and the right overbank n value of 0.037 are less than or equal to the channel n value of 0.037
 The overbank n values should be reevaluated.

RS: 5.864
 NT RC 01 Left overbank n value is less than 0.035
 The n value for overbank is usually larger then 0.035.
 The n value should be reevaluated.

RS: 4.295
 NT RC 05 The left overbank n value of 0.035 and the right overbank n value of 0.035 are less than or equal to the channel n value of 0.035
 The overbank n values should be reevaluated.

Very clean, smooth, well-maintained paved road.

RS: 1.515
NT RC 01 Left overbank n value is less than 0.035
The n value for overbank is usually larger than 0.035.
The n value should be reevaluated.

*Very clean, smooth,
well-maintained
paved road.*

TRANSITION LOSS COEFFICIENT CHECK

RS: 13.96
NT TL 02 Contraction and expansion loss coefficients are 0.3 and 0.5
respectively. However, this cross section is not at the structure.
They should be equal to 0.1 and 0.3.

*To account for CAP
overshoot.*

RS: 13.869
NT TL 02 Contraction and expansion loss coefficients are 0.3 and 0.5
respectively. However, this cross section is not at the structure.
They should be equal to 0.1 and 0.3.

RS: 4.835
NT TL 02 Contraction and expansion loss coefficients are 0.3 and 0.5
respectively. However, this cross section is not at the structure.
They should be equal to 0.1 and 0.3.

*Ok, Immediately
downstream of structure.*

RS: 4.778
NT TL 02 Contraction and expansion loss coefficients are 0.3 and 0.5
respectively. However, this cross section is not at the structure.
They should be equal to 0.1 and 0.3.

ROUGHNESS COEFFICIENT AT STRUCTURES

RS: 5.023
NT RS 01 This is Section 2.
Channel n value of 0.035 is less than the channel n value of 0.042
at Section 1.

---END---

Four Mile Wash

CHECK-RAS Program: Floodway Check
Encroachment Method, Starting WSEL, Floodway Width, and Surcharge Review

"C" flow due to x-sec cut along embankment to capture the most conservative floodplain upstream; embankment acts as a high point in the surrounding area affecting both upstream and downstream.
Fr=0.59

B=blocked obstruction XS SC 05
C=critical depth XS SC 03
D=divided flow XS SC 01
E=cross section extended XS SC 02
K=known water-surface XS SC 04

DISTANCE CHECK

XS JT 01 Junction option is used.

For flood insurance study, this option should be used if the tributary and main stream can have coincident peaks, or it may be used for the stream without floodway. It may also be used if the discharges at different time periods are known from the rainfall-runoff model. How to remove the junction is explained under Help.

SPACING CHECK

INEFFECTIVE FLOW CHECK

DISCHARGE CHECK

RS: 11.032
XS DC 01 Discharge decreases in the downstream direction.

Split east from hydrology.

RS: 10.265
XS DC 01 Discharge decreases in the downstream direction.

Incidental split west. See Appendix E for supporting documentation.

RS: 8.736
XS DC 01 Discharge decreases in the downstream direction.

Incidental split east. See Appendix E for supporting documentation.

XS DC 02 Constant discharge used for the Four Mile - W1, Four Mile - W1

XS DC 02 Constant discharge used for the Four Mile - W2, Four Mile - W2

XS DC 02 Constant discharge used for the Four Mile Wash, Four Mile Wash 4

XS DC 02 Constant discharge used for the Four Mile Wash, Four Mile Wash 5

LOCATION CHECK

RS: 0.112
XS LC 01 Lenchl Up/TopwdthAct Dn = 2.12
MaxChlDpth Up/MaxChlDpth Dn = 1.30
TopwdthAct Up/TopwdthAct Dn = 1.22
This cross section is located too far upstream from the critical depth cross section.

Adding additional cross sections did not remove the "C" depth warning; Reach lengths are less than 500 feet.

BOUNDARY CONDITION CHECK

XS BC 02 The name of the stream is Four Mile Wash, Four Mile Wash 5
Normal S = 0.0047 is specified as the downstream boundary for profile Floodplain

XS BC 03 Maximum number of iterations is 0
It should not be less than 20.

No iterations are required for slope area boundary condition.

LATERAL WEIRS CHECK

---Summary of Statistics---

	Minimum	Maximum
Left Overbank n Value:	0.02	0.065
Right Overbank n Value:	0.035	0.065
Channel n Value:	0.032	0.065
Contraction Coefficient:	0.1	0.1
Expansion Coefficient:	0.3	0.3

ROUGHNESS COEFFICIENT CHECK

RS: 1.66
NT RC 01 Left overbank n value is less than 0.035
The n value for overbank is usually larger than 0.035.
The n value should be reevaluated.

RS: 0.691
NT RC 01 Left overbank n value is less than 0.035
The n value for overbank is usually larger than 0.035.
The n value should be reevaluated.

*Very clean, smooth,
well-maintained paved
road approximately 30
ft wide and parallel to
cross section.*

E=cross section extended XS SC 02
K=known water-surface XS SC 04

DISTANCE CHECK

XS JT 01 Junction option is used.
For flood insurance study, this option should be used if the tributary and main stream can have coincident peaks, or it may be used for the stream without floodway. It may also be used if the discharges at different time periods are known from the rainfall-runoff model. How to remove the junction is explained under Help.

This junction was used to estimate the split flow using the optimization option.

SPACING CHECK

INEFFECTIVE FLOW CHECK

DISCHARGE CHECK

RS: 2.163
XS DC 01 Discharge decreases in the downstream direction.
RS: 2.097
XS DC 01 Discharge decreases in the downstream direction.
RS: 2.021

Incidental splits east and west. See App. E for supporting documentation.

XS DC 01 Discharge decreases in the downstream direction.

RS: 1.953

XS DC 01 Discharge decreases in the downstream direction.

RS: 1.888

XS DC 01 Discharge decreases in the downstream direction.

RS: 1.274

XS DC 01 Discharge decreases in the downstream direction.

RS: 1.177

XS DC 01 Discharge decreases in the downstream direction.

XS DC 02 Constant discharge used for the T1N-R6W-S17, T1N-R6W-S17

Incidental splits east and west. See App. E for supporting documentation.

Incidental splits east. See App. E for supporting documentation.

Ok, flow still stabilizing after lateral weirs.

Incidental split east. See App. E for supporting documentation.

Flow optimization. See App. E for supporting documentation.

LOCATION CHECK

RS: 1.208

XS LC 01 Lenchl Up/TopwdthAct Dn = 2.18
MaxChlDpth Up/MaxChlDpth Dn = 1.44
TopwdthAct Up/TopwdthAct Dn = 3.88
This cross section is located too far upstream from the critical depth cross section.

RS: 0.832

XS LC 01 Lenchl Up/TopwdthAct Dn = 14.46
MaxChlDpth Up/MaxChlDpth Dn = 1.86
TopwdthAct Up/TopwdthAct Dn = 1.38
This cross section is located too far upstream from the critical depth cross section.

RS: 0.256

XS LC 01 Lenchl Up/TopwdthAct Dn = 15.15
MaxChlDpth Up/MaxChlDpth Dn = 2.46
TopwdthAct Up/TopwdthAct Dn = 2.48
This cross section is located too far upstream from the critical depth cross section.

Adding additional cross sections did not remove the "C" depth warning; Reach lengths are less than 500 feet.

BOUNDARY CONDITION CHECK

XS BC 02 The name of the stream is T1N-R6W-S17, T1N-R6W-S17
Normal S = 0.002677 is specified as the downstream boundary for profile PF 1

XS BC 02 The name of the stream is T1N-R6W-S18, S18-SOUTH
Normal S = 0.0086 is specified as the downstream boundary for profile PF 1

XS BC 03 Maximum number of iterations is 0
It should not be less than 20.

No iterations are required for slope area boundary condition.

LATERAL WEIRS CHECK

---Summary of Statistics---

	Minimum	Maximum
Left Overbank n Value:	0.035	0.065
Right Overbank n Value:	0.035	0.065
Channel n Value:	0.035	0.065
Contraction Coefficient:	0.1	0.2
Expansion Coefficient:	0.3	0.4

ROUGHNESS COEFFICIENT CHECK

RS: 2.836
 NT RC 05 The left overbank n value of 0.035 and the right overbank n value of 0.035 are less than or equal to the channel n value of 0.035
 The overbank n values should be reevaluated.

RS: 2.783
 NT RC 05 The left overbank n value of 0.035 and the right overbank n value of 0.035 are less than or equal to the channel n value of 0.035
 The overbank n values should be reevaluated.

RS: 0.821

The channel has heavy vegetation therefore the overbank n-values are less then or equal.

NT RC 05 The left overbank n value of 0.035 and the right overbank n value of 0.035 are less than or equal to the channel n value of 0.035. The overbank n values should be reevaluated.

TRANSITION LOSS COEFFICIENT CHECK

RS: 5.334

NT TL 02 Contraction and expansion loss coefficients are 0.2 and 0.4 respectively. However, this cross section is not at the structure. They should be equal to 0.1 and 0.3.

RS: 5.273

NT TL 02 Contraction and expansion loss coefficients are 0.2 and 0.4 respectively. However, this cross section is not at the structure. They should be equal to 0.1 and 0.3.

ROUGHNESS COEFFICIENT AT STRUCTURES

---END---

To account for sudden decrease in conveyance area at x section 5.197; also dip in roadway (Salome HWY) crossing upstream of x section 5.328.

---Summary of Statistics---

	Minimum	Maximum
Left Overbank n Value:	0.02	0.06
Right Overbank n Value:	0.02	0.06
Channel n Value:	0.02	0.06
Contraction Coefficient:	0.1	0.3
Expansion Coefficient:	0.3	0.5

ROUGHNESS COEFFICIENT CHECK

RS: 13.461
 NT RC 01 Left overbank n value is less than 0.035
 The n value for overbank is usually larger than 0.035.
 The n value should be reevaluated.

Very clean, smooth, well-maintained paved road.

RS: 9.218
 NT RC 05 The left overbank n value of 0.035 and the right overbank n value of 0.035 are less than or equal to the channel n value of 0.035
 The overbank n values should be reevaluated.

The channel has heavy vegetation

RS: 9.15
 NT RC 05 The left overbank n value of 0.035 and the right overbank n value of 0.035 are less than or equal to the channel n value of 0.035
 The overbank n values should be reevaluated.

therefore the overbank n-values are less.

RS: 7.886
 NT RC 01 Left overbank n value is less than 0.035
 The n value for overbank is usually larger than 0.035.
 The n value should be reevaluated.

Very clean, smooth, well-maintained paved road.

TRANSITION LOSS COEFFICIENT CHECK

RS: 12.508
 NT TL 01 This is section 4
 Contraction and expansion loss coefficients are 0.1 and 0.3
 They should be equal to 0.3 and 0.5 respectively.

Ok, just upstream of structure.

RS: 10.258
 NT TL 02 Contraction and expansion loss coefficients are 0.3 and 0.5 respectively. However, this cross section is not at the structure.
 They should be equal to 0.1 and 0.3.

To account for decrease in

RS: 10.214
 NT TL 02 Contraction and expansion loss coefficients are 0.2 and 0.4 respectively. However, this cross section is not at the structure.
 They should be equal to 0.1 and 0.3.

conveyance area.

ROUGHNESS COEFFICIENT AT STRUCTURES

---END---

DISTANCE CHECK

XS JT 01 Junction option is used.
 For flood insurance study, this option should be used if the tributary and main stream can have coincident peaks, or it may be used for the stream without floodway. It may also be used if the discharges at different time periods are known from the rainfall-runoff model.
 How to remove the junction is explained under Help.

SPACING CHECK

INEFFECTIVE FLOW CHECK

DISCHARGE CHECK

RS: 12.408
 XS DC 03 Discharge is different between the upstream side and downstream side of the structure

RS: 7.874
 XS DC 01 Discharge decreases in the downstream direction.

XS DC 02 Constant discharge used for the dummy reach, dummy reach

XS DC 02 Constant discharge used for the T2N-R6W-S22S, T2N-R6W-S22S

There is flow change due to hydrology at this location.

Incidental split to the east. See App. E for supporting documentation.

LOCATION CHECK

BOUNDARY CONDITION CHECK

XS BC 02 The name of the stream is T1S-R6W-S27, T1S-R6W-S27
 Normal S = 0.006 is specified as the downstream boundary for profile dummy reach

XS BC 03 Maximum number of iterations is 0
 It should not be less than 20.

No iterations are required for slope area boundary condition.

LATERAL WEIRS CHECK

---Summary of Statistics---

	Minimum	Maximum
Left Overbank n Value:	0.02	0.066
Right Overbank n Value:	0.02	0.066
Channel n Value:	0.035	0.066
Contraction Coefficient:	0.1	0.1
Expansion Coefficient:	0.3	0.3

ROUGHNESS COEFFICIENT CHECK

RS: 2.257
 NT RC 05 The left overbank n value of 0.035 and the right overbank n value of 0.042 are less than or equal to the channel n value of 0.06
 The overbank n values should be reevaluated.

RS: 1.356
 NT RC 01 Left overbank n value is less than 0.035
 The n value for overbank is usually larger than 0.035.

The channel has heavy vegetation therefore overbank n-values are less.

Very clean, smooth, well-maintained dirt road app. 20 ft wide.

The n value should be reevaluated.

RS: 0.279

NT RC 05 The left overbank n value of 0.037 and the right overbank n value
of 0.037 are less than or equal to the channel n value of 0.066
The overbank n values should be reevaluated.

*The channel has heavy
vegetation therefore
overbank n-values are
less.*

⊙ — *"C" flow due to decrease in conveyance area at roadway.
Fr=0.77*

⊙ — *Supercritical flow due to decrease in conveyance area at roadway.
Fr=1.01*

B=blocked obstruction XS SC 05
C=critical depth XS SC 03
D=divided flow XS SC 01
E=cross section extended XS SC 02
K=known water-surface XS SC 04

DISTANCE CHECK

SPACING CHECK

INEFFECTIVE FLOW CHECK

DISCHARGE CHECK

RS: 1.284
XS DC 01 Discharge decreases in the downstream direction.

*Incidental split "T2N-R6W-S02 –
Split W1". See App. E for
supporting documentation.*

LOCATION CHECK

RS: 1.091
XS LC 01 Lenchl Up/TopwdthAct Dn = 1.81
MaxChlDpth Up/MaxChlDpth Dn = 2.36
TopwdthAct Up/TopwdthAct Dn = 1.37
This cross section is located too far upstream from the
critical depth cross section.

BOUNDARY CONDITION CHECK

XS BC 02 The name of the stream is T2N-R6W-S02,T2N-R6W-S02
Normal S = 0.0075 is specified as the downstream boundary
for profile Floodplain

XS BC 03 Maximum number of iterations is 0
It should not be less than 20.

*No iterations are required for
slope area boundary condition.*

DISTANCE CHECK

SPACING CHECK

INEFFECTIVE FLOW CHECK

DISCHARGE CHECK

RS: 4.049
 XS DC 01 Discharge decreases in the downstream direction.

RS: 2.499
 XS DC 01 Discharge decreases in the downstream direction.

RS: 0.902
 XS DC 01 Discharge decreases in the downstream direction.

RS: 0.288
 XS DC 01 Discharge decreases in the downstream direction.

LOCATION CHECK

RS: 1.191
 XS LC 01 Lenchl Up/TopwdthAct Dn = 1.46
 MaxChlDpth Up/MaxChlDpth Dn = 1.25
 TopwdthAct Up/TopwdthAct Dn = 1.43

*Critical due to decrease in
 flow area downstream;
 canal embankment. Fr=0.82*

(C)

*Critical due to decrease in
 flow area in the
 downstream cross sections.*

D(C)
 D(C)

X-Sec 0.918 Fr=0.95

X-Sec 0.902 Fr=0.75

X-Sec 0.757 Fr=0.88

*Blocked area due to
 structure in the middle
 of the floodzone.*

(B)
 (C)

*Critical due to decrease
 and increase in flow area
 in the neighboring cross
 sections.*

(C)
 D(C)

X-Sec 0.288 Fr=0.71

X-Sec 0.062 Fr=0.76

X-Sec 0.031 Fr=0.15

*Incidental split to the east and
 west; See Appendix E for
 supporting documentation.*

Decrease in discharge due to hydrology.

This cross section is located too far upstream from the critical depth cross section.

RS: 0.83
XS LC 01 Lenchl Up/TopwdthAct Dn = 2.29
MaxChlDpth Up/MaxChlDpth Dn = 1.23
TopwdthAct Up/TopwdthAct Dn = 1.68
This cross section is located too far upstream from the critical depth cross section.

Adding additional cross sections did not remove the "C" depth warning; Reach lengths are less than 500 feet.

BOUNDARY CONDITION CHECK

XS BC 02 The name of the stream is T2N_R6W_S05E,T2N_R6W_S05E
Known WS = 1198.59 is specified as the downstream boundary for profile Floodplain

XS BC 03 Maximum number of iterations is 0
It should not be less than 20.

No iterations are required for slope area boundary condition.

 ---Summary of Statistics---

	Minimum	Maximum
Left Overbank n Value:	0.044	0.072
Right Overbank n Value:	0.044	0.072
Channel n Value:	0.044	0.072
Contraction Coefficient:	0.1	0.3
Expansion Coefficient:	0.3	0.5

ROUGHNESS COEFFICIENT CHECK

RS: 3.763
 NT RC 05 The left overbank n value of 0.044 and the right overbank n value of 0.044 are less than or equal to the channel n value of 0.072
 The overbank n values should be reevaluated.

RS: 3.675
 NT RC 05 The left overbank n value of 0.044 and the right overbank n value of 0.044 are less than or equal to the channel n value of 0.044
 The overbank n values should be reevaluated.

RS: 3.635
 NT RC 05 The left overbank n value of 0.044 and the right overbank n value of 0.044 are less than or equal to the channel n value of 0.072
 The overbank n values should be reevaluated.

RS: 3.546
 NT RC 05 The left overbank n value of 0.044 and the right overbank n value of 0.044 are less than or equal to the channel n value of 0.072
 The overbank n values should be reevaluated.

RS: 0.751
 NT RC 05 The left overbank n value of 0.044 and the right overbank n value of 0.044 are less than or equal to the channel n value of 0.044
 The overbank n values should be reevaluated.

RS: 0.631
 NT RC 05 The left overbank n value of 0.044 and the right overbank n value of 0.044 are less than or equal to the channel n value of 0.044
 The overbank n values should be reevaluated.

RS: 0.411
 NT RC 05 The left overbank n value of 0.044 and the right overbank n value of 0.044 are less than or equal to the channel n value of 0.058
 The overbank n values should be reevaluated.

The channel has heavy vegetation therefore overbank n-values are less.

TRANSITION LOSS COEFFICIENT CHECK

RS: 0.591
 NT TL 02 Contraction and expansion loss coefficients are 0.3 and 0.5 respectively. However, this cross section is not at the structure. They should be equal to 0.1 and 0.3.

To account for sudden decrease in conveyance area at x-section 0.581; canal embankment at this location.

RS: 0.581
NT TL 02 Contraction and expansion loss coefficients are 0.3 and 0.5
respectively. However, this cross section is not at the structure.
They should be equal to 0.1 and 0.3.

RS: 0.568
NT TL 02 Contraction and expansion loss coefficients are 0.3 and 0.5
respectively. However, this cross section is not at the structure.
They should be equal to 0.1 and 0.3.

ROUGHNESS COEFFICIENT AT STRUCTURES

---END---

To account for sudden decrease in conveyance area at x-section 0.581; canal embankment at this location.

 ---Summary of Statistics---

	Minimum	Maximum
Left Overbank n Value:	0.02	0.06
Right Overbank n Value:	0.02	0.06
Channel n Value:	0.02	0.06
Contraction Coefficient:	0.1	0.1
Expansion Coefficient:	0.3	0.3

ROUGHNESS COEFFICIENT CHECK

RS: 4.043
 NT RC 05 The left overbank n value of 0.035 and the right overbank n value of 0.035 are less than or equal to the channel n value of 0.06
 The overbank n values should be reevaluated.

RS: 3.134 a
 of 0.035 are less than or equal to the channel n value of 0.035
 The overbank n values should be reevaluated.

RS: 2.802
 NT RC 05 The left overbank n value of 0.035 and the right overbank n value of 0.035 are less than or equal to the channel n value of 0.035
 The overbank n values should be reevaluated.

RS: 1.986
 NT RC 05 The left overbank n value of 0.035 and the right overbank n value of 0.035 are less than or equal to the channel n value of 0.035
 The overbank n values should be reevaluated.

General Note
The channel has heavy vegetation therefore the overbank n-values are less.

RS: 0.751
NT RC 01 Left overbank n value is less than 0.035
The n value for overbank is usually larger then 0.035.
The n value should be reevaluated.

FW FW 03 The right channel bank station may not be at the proper location.

RS: 1.046
FW FW 03 The right channel bank station may not be at the proper location.

RS: 0.99
FW FW 03 The right channel bank station may not be at the proper location.

RS: 0.902
FW FW 03 The right channel bank station may not be at the proper location.

RS: 0.888
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 0.888
FW FW 04 The left station effective of 9929.18 for 1% annual chance floodplain is less than the left channel bank station 9965.14
The 1% annual chance floodplain is outside the channel.
However, the left encroachment station (9719.55) is outside of 1% annual chance floodplain.
The left encroachment station should be adjusted.

RS: 0.888
FW FW 04 The right station effective of 10095.86 for 1% annual chance floodplain is greater than the right channel bank station (10039.74).
The 1% annual chance floodplain is outside the channel.
However, the right encroachment station (10194.89) is outside of 1% annual chance floodplain.
The right encroachment station should be adjusted.

RS: 0.879
FW FW 03 The Left channel bank station may not be at the proper location.

RS: 0.879
FW FW 03 The right channel bank station may not be at the proper location.

RS: 0.855
FW FW 03 The Left channel bank station may not be at the proper location.

The encroachments stations were checked and verified; Also, since this cross section is between the structures along I-10 the floodway is assumed to be equal to floodplain. The change in water surface elv between floodplain and floodway would either be above 1.0 or be negative surcharge by using Method 4 to get 1 foot of surcharge, therefore, the FP was set to equal FW.

RS: 0.855
FW FW 03 The right channel bank station may not be at the proper
location.

RS: 0.71
FW FW 03 The Left channel bank station may not be at the proper
location.

RS: 0.445
FW FW 03 The right channel bank station may not be at the proper
location.

RS: 0.392
FW FW 03 The Left channel bank station may not be at the proper
location.

RS: 0.312
FW FW 03 The right channel bank station may not be at the proper
location.

RS: 0.189
FW FW 03 The right channel bank station may not be at the proper
location.

RS: 0.073
FW FW 03 The Left channel bank station may not be at the proper
location.

RS: 0.008
FW FW 03 The Left channel bank station may not be at the proper
location.

---Summary of Statistics---

	Minimum	Maximum
Left Overbank n Value:	0.02	0.065
Right Overbank n Value:	0.042	0.065
Channel n Value:	0.042	0.065
Contraction Coefficient:	0.1	0.3
Expansion Coefficient:	0.3	0.5

ROUGHNESS COEFFICIENT CHECK

RS: 1.73

NT RC 05 The left overbank n value of 0.042 and the right overbank n value of 0.042 are less than or equal to the channel n value of 0.046
The overbank n values should be reevaluated.

RS: 1.579

NT RC 05 The left overbank n value of 0.042 and the right overbank n value of 0.042 are less than or equal to the channel n value of 0.042
The overbank n values should be reevaluated.

RS: 1.529

NT RC 05 The left overbank n value of 0.042 and the right overbank n value of 0.042 are less than or equal to the channel n value of 0.042
The overbank n values should be reevaluated.

RS: 1.471

NT RC 05 The left overbank n value of 0.042 and the right overbank n value of 0.042 are less than or equal to the channel n value of 0.046
The overbank n values should be reevaluated.

RS: 1.002

NT RC 05 The left overbank n value of 0.042 and the right overbank n value of 0.042 are less than or equal to the channel n value of 0.046
The overbank n values should be reevaluated.

RS: 0.935

NT RC 05 The left overbank n value of 0.042 and the right overbank n value of 0.042 are less than or equal to the channel n value of 0.046
The overbank n values should be reevaluated.

RS: 0.862

NT RC 05 The left overbank n value of 0.042 and the right overbank n value of 0.042 are less than or equal to the channel n value of 0.046
The overbank n values should be reevaluated.

RS: 0.785

NT RC 05 The left overbank n value of 0.042 and the right overbank n value of 0.042 are less than or equal to the channel n value of 0.065
The overbank n values should be reevaluated.

General Note

The channel has heavy vegetation therefore overbank n-values are less.

RS: 0.713
NT RC 05 The left overbank n value of 0.042 and the right overbank n value of 0.042 are less than or equal to the channel n value of 0.046
The overbank n values should be reevaluated.

RS: 0.438
NT RC 05 The left overbank n value of 0.042 and the right overbank n value of 0.042 are less than or equal to the channel n value of 0.046
The overbank n values should be reevaluated.

RS: 0.255
NT RC 05 The left overbank n value of 0.042 and the right overbank n value of 0.042 are less than or equal to the channel n value of 0.046
The overbank n values should be reevaluated.

TRANSITION LOSS COEFFICIENT CHECK

RS: 2.386
NT TL 02 Contraction and expansion loss coefficients are 0.3 and 0.5 respectively. However, this cross section is not at the structure. They should be equal to 0.1 and 0.3.

I-10 North

RS: 2.374
NT TL 02 Contraction and expansion loss coefficients are 0.3 and 0.5 respectively. However, this cross section is not at the structure. They should be equal to 0.1 and 0.3.

---Summary of Statistics---

	Minimum	Maximum
Left Overbank n Value:	0.02	0.065
Right Overbank n Value:	0.02	0.065
Channel n Value:	0.042	0.065
Contraction Coefficient:	0.1	0.1
Expansion Coefficient:	0.3	0.3

ROUGHNESS COEFFICIENT CHECK

RS: 2.411
 NT RC 05 The left overbank n value of 0.042 and the right overbank n value of 0.042 are less than or equal to the channel n value of 0.065. The overbank n values should be reevaluated.

RS: 1.358
 NT RC 05 The left overbank n value of 0.042 and the right overbank n value of 0.042 are less than or equal to the channel n value of 0.065. The overbank n values should be reevaluated.

The channel has heavy vegetation therefore the overbank n-values are less.

Very clean, smooth, well-maintained dirt road; approximate roadway width is 30 feet.

---Summary of Statistics---

	Minimum	Maximum
Left Overbank n Value:	0.02	0.072
Right Overbank n Value:	0.04	0.072
Channel n Value:	0.04	0.072
Contraction Coefficient:	0.1	0.1
Expansion Coefficient:	0.3	0.3

ROUGHNESS COEFFICIENT CHECK

RS: 1.219
 NT RC 05 The left overbank n value of 0.044 and the right overbank n value of 0.044 are less than or equal to the channel n value of 0.044. The overbank n values should be reevaluated.

The channel has heavy vegetation therefore the overbank n-values are less.

*Very clean, smooth,
well-maintained paved
road approximately 50
ft wide and parallel to
cross section.*

---Summary of Statistics---

	Minimum	Maximum
Left Overbank n Value:	0.02	0.065
Right Overbank n Value:	0.042	0.065
Channel n Value:	0.042	0.065
Contraction Coefficient:	0.1	0.1
Expansion Coefficient:	0.3	0.3

ROUGHNESS COEFFICIENT CHECK

RS: 2.678
 NT RC 01 Left overbank n value is less than 0.035
 The n value for overbank is usually larger than 0.035.
 The n value should be reevaluated.

*Very clean, smooth,
well-maintained paved
road approximately 50
ft wide and parallel to
cross section.*

TRANSITION LOSS COEFFICIENT CHECK

ROUGHNESS COEFFICIENT AT STRUCTURES

 K=known water-surface XS SC 04

DISTANCE CHECK

----- RS: 3.011
 XS DT 01 Both right and left overbank distances are longer than the channel distance.

This cross section was checked and verified. This is mainly due to wide shallow flow in the area that results in long reach lengths for the overbanks.

SPACING CHECK

INEFFECTIVE FLOW CHECK

DISCHARGE CHECK

XS DC 02 Constant discharge used for the River #1, Reach #1

LOCATION CHECK

BOUNDARY CONDITION CHECK

XS BC 02 The name of the stream is Winters Wash, Winters Wash
Normal S = 0.004 is specified as the downstream boundary
for profile PF 1

XS BC 03 Maximum number of iterations is 0
It should not be less than 20.

*No iterations are required for
slope area boundary condition.*

E.8 Summary of Errors and Warnings

Delaney Wash

Errors Warnings and Notes for Plan : Current mode

Location:	River: Delaney Split1 Reach: SouthSplit RS: 0.663 Profile: Floodplain
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Delaney Split1 Reach: SouthSplit RS: 0.579 Profile: Floodplain
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Delaney Split1 Reach: SouthSplit RS: 0.491 Profile: Floodplain
Warning:	Divided flow computed for this cross-section.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Delaney Split1 Reach: SouthSplit RS: 0.403 Profile: Floodplain
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Delaney Split1 Reach: SouthSplit RS: 0.309 Profile: Floodplain
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Delaney Split1 Reach: SouthSplit RS: 0.221 Profile: Floodplain
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Delaney Split1 Reach: SouthSplit RS: 0.157 Profile: Floodplain
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Delaney Wash Reach: DelaneyUpstream RS: 5.579 Profile: Floodplain
Warning:	Divided flow computed for this cross-section.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Delaney Wash Reach: DelaneyUpstream RS: 5.510 Profile: Floodplain
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Note:	Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
Location:	River: Delaney Wash Reach: DelaneyUpstream RS: 5.440 Profile: Floodplain
Warning:	Divided flow computed for this cross-section.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Note:	Manning's n values were composited to a single value in the main channel.
Note:	Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
Location:	River: Delaney Wash Reach: DelaneyUpstream RS: 5.357 Profile: Floodplain

	surface was used.
Location:	River: T2N_R6W_S05E Reach: Reach1 RS: 1.314 Profile: Floodplain
Warning:	Divided flow computed for this cross-section.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Note:	Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
Location:	River: T2N_R6W_S05E Reach: Reach1 RS: 1.272 Profile: Floodplain
Warning:	Divided flow computed for this cross-section.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Note:	Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
Location:	River: T2N_R6W_S05E Reach: Reach1 RS: 1.191 Profile: Floodplain
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Note:	Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
Location:	River: T2N_R6W_S05E Reach: Reach1 RS: 1.112 Profile: Floodplain
Warning:	The energy equation could not be balanced within the specified number of iterations. The program used critical depth for the water surface and continued on with the calculations.
Warning:	The velocity head has changed by more than 0.5 ft (0.15 m). This may indicate the need for additional cross sections.
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning:	During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.
Location:	River: T2N_R6W_S05E Reach: Reach1 RS: 1.085 Profile: Floodplain
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Location:	River: T2N_R6W_S05E Reach: Reach1 RS: 1.054 Profile: Floodplain
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Note:	Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
Location:	River: T2N_R6W_S05E Reach: Reach1 RS: 1.008 Profile: Floodplain
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Location:	River: T2N_R6W_S05E Reach: Reach1 RS: 0.918 Profile: Floodplain
Warning:	The energy equation could not be balanced within the specified number of iterations. The program used critical depth for the water surface and continued on with the calculations.
Warning:	Divided flow computed for this cross-section.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning:	During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.
Location:	River: T2N_R6W_S05E Reach: Reach1 RS: 0.902 Profile: Floodplain
Warning:	The energy equation could not be balanced within the specified number of iterations. The program used critical depth for the water surface and continued on with the calculations.

T3N-R6W-S27W

Errors Warnings and Notes for Plan : S27W

Location:	River: T3N-R6W-S27W Reach: T3N-R6W-S27W RS: 1.675 Profile: Floodplain
Warning:	The velocity head has changed by more than 0.5 ft (0.15 m). This may indicate the need for additional cross sections.
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Note:	Manning's n values were composited to a single value in the main channel.
Location:	River: T3N-R6W-S27W Reach: T3N-R6W-S27W RS: 1.612 Profile: Floodplain
Warning:	The velocity head has changed by more than 0.5 ft (0.15 m). This may indicate the need for additional cross sections.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: T3N-R6W-S27W Reach: T3N-R6W-S27W RS: 1.586 Profile: Floodplain
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Note:	Manning's n values were composited to a single value in the main channel.
Location:	River: T3N-R6W-S27W Reach: T3N-R6W-S27W RS: 1.516 Profile: Floodplain
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.

Errors Warnings and Notes for Plan : Current mode (Continued)

Warning:	The parabolic search method failed to converge on critical depth. The program will try the cross section slice/secant method to find critical depth.
Location:	River: WintersWash Reach: WintersWithEmban RS: 3.064 Profile: FP
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: WintersWash Reach: WintersWithEmban RS: 2.975 Profile: FP
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: WintersWash Reach: WintersWithEmban RS: 2.895 Profile: FP
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: WintersWash Reach: WintersWithEmban RS: 2.825 Profile: FP
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: WintersWash Reach: WintersWithEmban RS: 2.751 Profile: FP
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Location:	River: WintersWash Reach: WintersWithEmban RS: 2.678 Profile: FP
Note:	Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
Location:	River: WintersWash Reach: WintersWithEmban RS: 2.652 Profile: FP
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Note:	Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.

Winters Wash without Embankment

Errors Warnings and Notes for Plan : Current mode

Location:	River: Winters Wash Reach: Winters Wash RS: 3.520 Profile: PF 1
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Location:	River: Winters Wash Reach: Winters Wash RS: 3.479 Profile: PF 1
Warning:	Divided flow computed for this cross-section.
Location:	River: Winters Wash Reach: Winters Wash RS: 3.440 Profile: PF 1
Warning:	Divided flow computed for this cross-section.
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Location:	River: Winters Wash Reach: Winters Wash RS: 3.401 Profile: PF 1
Warning:	Divided flow computed for this cross-section.
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Winters Wash Reach: Winters Wash RS: 3.341 Profile: PF 1
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Winters Wash Reach: Winters Wash RS: 3.270 Profile: PF 1
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Winters Wash Reach: Winters Wash RS: 3.179 Profile: PF 1
Warning:	Divided flow computed for this cross-section.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Winters Wash Reach: Winters Wash RS: 3.099 Profile: PF 1
Warning:	Divided flow computed for this cross-section.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Winters Wash Reach: Winters Wash RS: 3.011 Profile: PF 1
Warning:	Divided flow computed for this cross-section.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Winters Wash Reach: Winters Wash RS: 2.930 Profile: PF 1
Warning:	Divided flow computed for this cross-section.
Location:	River: Winters Wash Reach: Winters Wash RS: 2.844 Profile: PF 1
Warning:	Divided flow computed for this cross-section.
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning:	The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Location:	River: Winters Wash Reach: Winters Wash RS: 2.754 Profile: PF 1
Warning:	Divided flow computed for this cross-section.
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Location:	River: Winters Wash Reach: Winters Wash RS: 2.652 Profile: PF 1
Warning:	Divided flow computed for this cross-section.
Warning:	The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Location:	River: Winters Wash Reach: Winters Wash RS: 2.602 Profile: PF 1
Warning:	Divided flow computed for this cross-section.

E.9 Effective FIS models

As part of this study, there were no effective hydraulic models utilized.

APPENDIX F: DVD
