EXECUTIVE SUMMARY

EXECUTIVE SUMMARY

This report presents data for the Phase I Environmental Site Assessment (ESA) of an approximate 300-foot wide strip of land generally located southeast of Maricopa County Route 85, between Citrus Road and Perryville Road, in Maricopa County, Arizona (Site). Information obtained for this assessment has been used to evaluate the Site for the presence of recognized environmental conditions (RECs) resulting from past or present uses. Our scope of services included a Site reconnaissance; a review of the physical setting of the Site and regulatory agency listings for the Site and vicinity; a review of the Site ownership and history; evaluation of the data; and preparation of this report.

At the time of our reconnaissance, the majority of the Site was vacant land located along the north bank of the Gila River. The southern portions of the Site, south of the proposed bank protection/stabilization alignment, were located within the Gila River flood plain. These portions of the Site had a moderate to dense growth of vegetation. We also observed some areas of standing water with the river's flood plain. Numerous tires were observed in the Gila River flood plain on or near the southern portion of the Site. We did not observe indications of gravel mining on or adjacent to the Site.

The eastern portion of the northern border of the Site extended along the South Extension of the Buckeye Irrigation Canal. A dirt access road extended along the south side of the canal. We observed trash and debris along the access road, including a portion of a boat, scrap wood and metal, concrete rubble, a muffler, rope, landscaping debris, shingles, carpet, and clothing. The shingles are suspect asbestos-containing materials (ACMs). The trash and debris appeared limited to the surface of the Site; we did not observe indications of buried trash and debris. We did not observe indications of significant quantities of other hazardous or petroleum substances in the trash and debris. We recommend sampling and testing of the suspect ACMs and proper disposal of the trash and debris.

The eastern border of the Site, which is located within the Citrus Road alignment, encroached onto a fenced yard for Dos Rios Materials. We observed piles of rock and aggregate materials located within the fenced yard. The southern portion of the Site was also located within a fenced area for Dos Rios Materials. We observed sand and soil stockpiled along the northern bank of the Gila River. We also observed concrete rubble, brick, and metal debris along the northern bank of the river on this portion of the Site.

The northern portions of the Site, north of the proposed bank protection/stabilization alignment, encroached onto several developed parcels of land. We understand that some of the developed parcels are exclusions to the Site. The northern portion of the Site also extended onto a developed parcel (Parcel 502-57-014Z), which included a office/garage building, a furniture shop building, a mobile trailer, a canopy, and open storage areas. The office/garage building included an enclosed office area, a single garage bay, and an open canopied area. We observed various tools and retail-sized containers of typical household cleaning and maintenance products stored within the garage. The garage had a concrete floor, and we did not observe indications of floor drains, cracks, or significant amounts of staining on the concrete floor. We observed additional tools and miscellaneous items stored on shelving in the open canopied area. The canopied area had an

exposed dirt floor, and we observed a large piece of equipment parked in this area. We observed numerous 5-gallon containers of hydraulic fluid, motor oil, and other vehicle maintenance products stored on shelving and the exposed dirt surface to the rear of the office/garage building (west). We observed some staining on the wooden shelving and the ground surface around the containers.

The furniture shop building was located on the east-central portion of the developed parcel, and it included two large work areas/rooms with various wood working tools. A small finishing area was located in the southern portion of the building. A flammable storage cabinet was observed within this area of the building. We observed small (5 gallons or less) containers of various finishes, stains, enamels, and lacquers stored within the cabinet and on shelving in the room. Reportedly, no wastes requiring special disposal are generated by these operations. Waste rags are placed in a flammable waste container within the finishing room, and they are reportedly disposed as regular waste.

We observed numerous items stored in the open areas of the developed parcel, including boats, vehicle/equipment parts, hosing, and scrap metal and wood. Some of the equipment parts were stored on wooden pallets. Two approximately 1,000-gallon aboveground storage tanks (ASTs) were also observed on the southwestern portion of the developed parcel. Reportedly, the ASTs are empty and have not been used to store fuel on the Site. We also observed one 55-gallon drum of antifreeze and four containers (including two five-gallon containers) of used oil in the open storage areas of the developed parcel. We observed some oily staining on the ground surface in this area of the Site. We also observed several additional areas of soil staining in the open yard areas of the developed parcel. The soil staining appeared to be a result of minor leaks or releases from parked cars and equipment.

We observed soil stockpiled along the border of the developed parcel, along the northern bank of the Gila River. We also observed some gray material stockpiled and some domestic trash and debris, including scrap wooden, cabinets, and landscaping debris, along the bank of the river. Based on our review, the gray material is metal and salt waste from the reprocessing of aluminum scrap which was brought on to the Site from the Aleris aluminum recycling plant by the parcel owner. We also understand that the soil stockpiles observed on the Site were imported onto the developed parcel. Based on our observations and review, the gray aluminum waste material and soil imported from undocumented origins represent RECs at the Site.

Municipal water and wastewater services are not provided to the Site. A groundwater well was observed on the central portion of the developed parcel of the Site. We also understand that a septic system is located in central portion of the developed parcel. Based on our review and observations, a hand sink located within the furniture shop appears to discharge to the septic system. Based on our experience, septic systems designed to receive only domestic wastewater would not represent a significant environmental cleanup liability. However, since the sink is associated with the furniture operations, there is the potential for chemicals, paints, and solvents to have been discharged to the septic system. Therefore, we believe the hand sink and associated septic system represents a REC at the Site.

Historically, the Site was primarily vacant land along the Gila River flood plain since at least 1937. Portions of the Site have been utilized as agricultural land since at least the 1940s. Based on our review, a small parcel (Parcel 014Z) in the central portion of the Site has been developed since the

1950s. The initial development on the parcel appeared to include a residence and small associated livestock pens/facilities. The workshop was constructed on the eastern portion of the developed parcel in the mid-1990s. Additions to the workshop were constructed on the Site between 2000 and 2002. The office/garage building was constructed on the western portion of the parcel in approximately 2004.

In addition to the development on Parcel 014Z of the Site, we observed structural development on or near the southwestern border of the Site in the photographs dated between 2000 and 2006. This development was located along the south side of Maricopa County Route 85, and it appeared to include several long rectangular canopies arranged side-by-side. We observed shallow PVC water piping in this area during our Site reconnaissance. Based on our review, these structures were former shade canopies over calf pens associated with a dairy located immediately southwest of the Site, and water lines observed on this portion of the Site during our reconnaissance were used to convey water to the livestock.

Our assessment included a review of pertinent regulatory records readily available from local, State, and Federal sources and databases. The Site was not identified in the records reviewed, and no facilities were identified in the immediate Site vicinity that would indicate the presence of RECs at the Site.

We performed this Phase I Environmental Site Assessment in general conformance with the scope and limitations of ASTM E1527-05. The information summarized in this report is not sufficient to guarantee the absence of RECs at the Site. However, our assessment did not reveal indications of RECs associated with the Site, except for the following RECs:

- the hand sink within the furniture shop and associated septic system on Parcel 014Z of the Site;
- the gray aluminum waste material and imported soil on Parcel 014Z of the Site; and
- the staining observed in various areas on Parcel 014Z of the Site, including around the 5-gallon containers of hydraulic and motor oil along the western border of the parcel.

We believe these issues warrant further assessment before an informed opinion regarding the environmental condition of the Site may be rendered.

REPORT

1. INTRODUCTION

Geotechnical and Environmental Consultants, Inc. (d.b.a. GEC) was retained by the Flood Control District of Maricopa County (FCDMC) to perform a Phase I Environmental Site Assessment (ESA) on an approximate 300-foot wide strip of land generally located southeast of Maricopa County Route 85, between Citrus Road and Perryville Road, in Maricopa County, Arizona (Site).

The objective of this Phase I ESA was to obtain data to aid in evaluating the Site for the presence of recognized environmental conditions (RECs) resulting from past or present uses, as defined by ASTM Standard Practice for ESAs (E1527-05), and as described in our Phase I ESA proposal dated January 29, 2009 (GEC Proposal No. P09-0047.P01). The services performed for this assessment included a Site reconnaissance to develop a description of the Site and current Site usage; a review of the physical setting of the Site and regulatory agency listings for the Site and vicinity; a review of the Site ownership and history; evaluation of the data; and preparation of this report.

GEC personnel involved in the preparation of this report have Phase I ESA experience and are supervised by senior-level personnel with extensive experience in conducting Phase I ESAs. Chet L. Pearson, P.E. and Stephanie J. French are qualified Environmental Professionals as defined by ASTM E1527-05. Mr. Pearson, a GEC Principal, provided overall supervision and reviewed this Phase I ESA. Ms. French, a GEC Project Manager, conducted the Site reconnaissance and provided supervision and review of this Phase I ESA. Christopher Lanter, a GEC Staff Scientist, compiled historical and regulatory information for this report and prepared this Phase I ESA report. We, Chet L. Pearson and Stephanie J. French, declare that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professionals* as defined in §312.10 of 40 CFR 312, and we have specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject Site. The Phase I ESA services were performed in general conformance with applicable sections of ASTM E1527-05 for all appropriate inquiries. Business environmental risks, vapor intrusion, and other non-scope issues as defined in ASTM E1527-05 were not investigated as part of this assessment.

The emphasis of this review was to identify uses of the Site which might indicate the presence of RECs. A REC is defined in ASTM E1527-05 as "the presence or likely presence of any hazardous substances or petroleum products on a [site] under conditions that indicate an existing release, past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the [site] or into ground, ground water, or surface water of the [site]. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include de minimis conditions that generally do not represent a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies." We believe ASTM's definition of REC is vague and subject to interpretation; therefore, we have used our experience, judgement, and conversations with our client to identify those conditions we believe are significant in this report.

Information concerning the Site and vicinity was provided to GEC by a number of agencies, published documents, and interviews with individuals who are familiar with the Site and its history.

As part of our quality control procedures, we try to independently verify information obtained. However, we cannot always obtain independent verification. GEC is not responsible for the accuracy of information provided to us by others.

2. SITE INFORMATION

2.1 Site Location and Zoning

The Site is generally located southeast of Maricopa County Route 85, between Citrus Road and Perryville Road, and between Southern Avenue and Baseline Road alignment, in Maricopa County, Arizona, as shown on Figure 1. It is located in Section 34, Township 1 North, Range 2 West of the Gila and Salt River Baseline and Meridian, Maricopa County, Arizona. The Site is identified by the Maricopa County Assessor's Office as a portion of Parcels 005F, 010E, 012D, 012E, 012F, 012G, 014R, 014S, 014Y, 014Z, 017, and 018 on Map 57 in Book 502, as shown on Figure 2. Based on our review, the parcel which comprise the Site have not been assigned street addresses.

According to Maricopa County Planning and Development Department, land containing the Site is zoned RU-43, rural zoning district.

2.2 Site Description

Our Site reconnaissance was conducted on February 25, 2009, by Mike Delaney and Stephanie J. French of GEC. Our identification of the Site boundaries was based on a map of the Gila River Bank Stabilization/Protection Project provided by the FCDMC, an Assessor's parcel map with an aerial photograph overlay, and on observations made during our Site reconnaissance. We were able to identify the general Site boundaries in the field based on the presence of adjacent roadways and development in the Site vicinity. Selected photographs of the Site taken during our reconnaissance are presented in Appendix A. A Site plan, utilizing an aerial photograph dated November 2007 available from the Maricopa County Assessor's Office website, is presented as Figure 3.

The Site is irregular in shape, and it is comprised of an approximate 300-foot wide strip of land centered along the proposed bank protection/stabilization alignment for the north bank of the Gila River, located between the Citrus Road alignment and Baseline Road alignment. You indicated that the Site (proposed bank stabilization work area) will remain south of the adjacent South Extension of the Buckeye Irrigation Canal, and the Site will not include any structures. Several parcels of the planned bank protection/stabilization work area were excluded from the Site for this report, because the FCDMC did not have access to these parcels.

At the time of our reconnaissance, the majority of the Site was vacant land located along the north bank of the Gila River. The southern portions of the Site, south of the proposed bank protection/stabilization alignment, were located within the Gila River flood plain. These portions of the Site had a moderate to dense growth of vegetation. We also observed some areas of standing water with the river's flood plain. Numerous tires were observed in the Gila River flood plain on or near the southern portion of the Site.

The eastern portion of the northern border of the Site extended along the South Extension of the Buckeye Irrigation Canal. We understand that the Site does not extend north of the canal. A dirt access road extended along the south side of the canal. We observed trash and debris along the access road, including a portion of a boat, scrap wood and metal, concrete rubble, a muffler, rope,

landscaping debris, shingles, carpet, and clothing. The shingles are suspect asbestos-containing materials (ACMs). The trash and debris appeared limited to the surface of the Site; we did not observe indications of buried trash and debris. We did not observe indications of significant quantities of other hazardous or petroleum substances in the trash and debris. We recommend sampling and testing of the suspect ACMs and proper disposal of the trash and debris.

We observed a concrete standpipe approximately three feet in diameter and two feet high on the northeastern portion of the Site. Based on our review, this portion of the Site was formerly agricultural farmland, and this feature is likely a former irrigation standpipe structure. We also observed a small opening in the ground surface near the concrete pipe. We observed a portion of a concrete pipe in the hole, but bees limited close observation of this area. We did not observe any oily staining or residues in or around the hole. Based on our review, this portion of the Site was formerly agricultural farmland. We identified numerous groundwater wells registered within the ten-acre subsections which include the Site, as discussed in Section 3.1. Based on our review and observations, this feature may be an area of collapsed irrigation piping or an old groundwater well. If a groundwater well is encountered at the Site, we recommend it be capped or abandoned in accordance with ADWR guidelines.

The northern portions of the Site, north of the proposed bank protection/stabilization alignment, encroached onto several developed parcels of land. We understand that some of the developed parcels are exclusions to the Site. The eastern border of the Site (Parcel 005F), which is located within the Citrus Road alignment, encroached onto a fenced yard for Dos Rios Materials. We observed piles of rock and aggregate materials located within the fenced yard. The southern portion of the Site (Parcel 010E) was also located within a fenced area for Dos Rios Materials. We observed sand and soil stockpiled along the northern bank of the Gila River. We also observed concrete rubble, brick, and metal debris along the northern bank of the river on this portion of the Site. Two soil stockpiles were observed in this area and appeared to be located northwest of the Site. We also observed partially buried PVC piping and broken PVC piping across this area. At the time of our reconnaissance, the partially buried PVC piping was broken, and clear water was discharging from the piping. The water released from the piping was observed to be discharging to the Gila River flood plain. Based on our review, the PVC water lines were associated with calf pens formerly located in this area between approximately 2000 and 2006.

The northern portion of the Site extended onto a developed parcel (Parcel 014Z), which included a office/garage building, a furniture shop building, a mobile trailer, a canopy, and open storage areas. The office/garage building was located on the west-central border of the developed parcel, and it included an enclosed office area, a single garage bay, and an open canopied area. We observed various tools and retail-sized containers of typical household cleaning and maintenance products stored within the garage. The garage had a concrete floor, and we did not observe indications of floor drains, cracks, or significant amounts of staining on the concrete floor. According to Carl LeRoy Wolfe, owner and occupant of the developed parcel for approximately 15 to 19 years, no floor drains or sinks are located within the office/garage building. We observed additional tools and miscellaneous items stored on shelving in the open canopied area. The canopied area had an exposed dirt floor, and we observed a large piece of equipment parked in this area.

To the rear of the office/garage building (west), we observed numerous 5-gallon containers of hydraulic fluid, motor oil, and other vehicle maintenance products stored on shelving and the exposed dirt surface. We observed some staining on the wooden shelving and the ground surface around the containers. We also observed several (5 gallons or less) gasoline containers stored on shelving along the rear wall of the building. We did not observe staining or other indications of a significant spill or release of fuel in this area of the Site. A small pipe was observed to extend from the northern portion of the office/garage building, and it appeared to be associated with the office portion of the building. We did not access this portion of the building, and we do not know the purpose of the piping; however, as mentioned, we understand that no floor drains or sinks are associated with the building. The ground surface appeared to be moist in this area; however, we did not observe staining or note unusual odors or other indications of hazardous or petroleum substances on the ground surface in this area of the developed parcel.

The furniture shop building was located on the east-central portion of the developed parcel, and it included two large work areas/rooms with various wood working tools. A small finishing area was located in the southern portion of the building. A flammable storage cabinet was observed within this area of the building. We observed small (5 gallons or less) containers of various finishes, stains, enamels, and lacquers stored within the cabinet and on shelving in the room. Reportedly, no wastes requiring special disposal are generated by these operations. Waste rags are placed in a flammable waste container within the finishing room, and they are reportedly disposed as regular waste. A small hand sink was observed in the northernmost work rooms of the furniture shop building. We observed some staining within the hand sink. Reportedly, the hand sink is not used regularly, it is only used for hand washing, and no chemicals or liquids are discharged to the sink. Based on our review and observations, the hand sink appears to discharge to a septic system located to the west of the building on the central portion of the Site, near the mobile trailer. Based on our experience, septic systems designed to receive only domestic wastewater would not represent a significant environmental cleanup liability. However, since the sink is associated with the furniture operations, there is the potential for chemicals, paints, and solvents to have been discharged to the septic system. Therefore, we believe the hand sink and associated septic system represents a REC at the Site.

We observed a domestic groundwater well located in the central portion of the developed parcel. A small canopy was observed north of the groundwater well. The canopied area had a concrete floor. We did not observe indications of floor drains or significant amounts of staining on the concrete floor. A furnace was located beneath the canopy. A small concrete pad was also observed southwest of the canopy on the central portion of the developed parcel.

We observed numerous items stored in the open areas of the developed parcel, including boats, vehicle/equipment parts, hosing, and scrap metal and wood. Some of the equipment parts were stored on wooden pallets. Two approximately 1,000-gallon aboveground storage tanks (ASTs) were also observed on the southwestern portion of the developed parcel. According to Mr. Wolfe, the ASTs are empty and have not been used to store fuel on the Site. He indicated that a small AST for diesel fuel was temporarily located near the residence on the northern portion of the parcel, north of the canal, for approximately two months. However, no ASTs were used to store fuel on the Site.

We observed a large furnace located in the open yard of the developed parcel. According to Mr. Wolfe, he installs high temperature linings for furnaces. He indicated that the majority of his

operations are performed at the customer's property and that no manufacturing activities are performed on the Site. Mr. Wolfe also informed us that the furnace lining material was not an asbestos-containing material. He also indicated that his operations at the Site do not include the storage or use of significant amounts of chemicals. We observed one 55-gallon drum of antifreeze and four containers (including two five-gallon containers) of used oil near the furnace. We observed some oily staining on the ground surface in this area of the Site. We also observed several additional areas of soil staining in the open yard areas of the developed parcel. The soil staining appeared to be a result of minor leaks or releases from parked cars and equipment.

We observed soil stockpiled along the border of the developed parcel, along the northern bank of the Gila River. We also observed some gray material stockpiled and some domestic trash and debris, including scrap wooden, cabinets, and landscaping debris, along the bank of the river. A haul truck was observed on the developed parcel, and according to Mrs. Wolfe, her husband performs some hauling activities, including hauling for Aleris, a aluminum recycling plant. She indicated that hauled material is not brought to or stored on the Site. Mrs. Wolfe did indicate that her husband had brought some material on the Site from a hauling job for Aleris once, and that the gray material observed on the Site was from the Aleris plant. Based on our review, the gray material is metal and salt waste from the reprocessing of aluminum scrap. Mrs. Wolfe also indicated that soil had been imported onto the developed parcel. Based on our observations and review, the gray aluminum waste material and soil imported from undocumented origins represent RECs at the Site.

Arizona Public Service (APS) provides electricity to the Site. We observed two APS pole-mounted transformers (APS Pole No. 1003862) along the south side of the South Extension of the Buckeye Irrigation Canal on the northeastern border of the Site. We also observed one pole-mounted transformer (APS Pole No. 1003851) on the developed parcel in the central portion of the Site. The transformers appeared to be in good condition, and we did not observe corrosion or other indications of leakage. We contacted APS regarding the PCB-content of the transformers. At the time of this report, we had not received a response from APS. However, based on previous conversations, APS is responsible for clean-up of leaks that occur from their transformers. Based on our observations and the previous information obtained from APS, we believe the transformers do not represent a REC at the Site.

2.3 Site Vicinity

In general, the Site vicinity can be characterized as a rural agricultural area in an unincorporated area of Maricopa County. The Site is generally bounded to the north by the South Extension of the Buckeye Irrigation Canal on the eastern portion and a rural residence on the central portion, followed by a vacant dairy farm development and agricultural farmland; on the east by Dos Rios Materials fenced yard and facilities; on the south by vacant land within the Gila River flood plain; on the west by a residence; and on the north by vacant land on the western portion.

We did not have access to three developed parcels which lie within the approximate 300-foot wide strip of land centered along the proposed bank protection alignment for the north bank of the Gila River; therefore, these parcels are exclusions to the Site for this assessment. Based on our review, two small parcels (Parcels 014B and 014P) owned by Robert Mendoza are exclusions to the Site. Based on our observations from the Site boundaries, these parcels include a rural residential

development. We observed a large amount of stored vehicles and other items associated with the development. Based on our review, the stored vehicles and items also extend onto Parcels 012D and 014R of the Site. We could not determine the nature of the entire development, which may likely include the maintenance and salvaging of vehicles and the storage and used of automotive fuels and maintenance fluids associated with these activities.

We also understand that Parcel 009B owned by John Charles Brown is an exclusion to the Site. Based on our observations for the Site boundaries, this parcel is residentially and agriculturally developed. We observed pasture land, livestock pens, corrals, barns, and other livestock related facilities; however, we were unable to determine the nature of the entire development on this exclusion to the Site, and it may include a small maintenance shop and the storage and use of fuels, automotive maintenance fluids, and agricultural chemicals.

Based on our observations of the surrounding properties, we did not identify indications of RECs at the Site resulting from activities on the adjacent properties.

3. ENVIRONMENTAL SETTING

3.1 Geology and Hydrogeology

The Site is situated on relatively flat land within the Salt River Valley. The Salt River Valley is located in the Basin and Range Province which includes the southern and western portions of Arizona. The Basin and Range Province is characterized by elongated mountain ranges trending northwest to southeast that are separated by broad alluvial valleys. The mountains in this province consist of tilted blocks of Precambrian, Paleozoic, Mesozoic, and Cenozoic rocks that are bounded by faults (Refs. 1 and 2).

In general, the Salt River Valley is an extensive basin containing alluvial soils often over 1,500 feet thick, with areas known to exceed thickness of 10,000 feet. The alluvial soils are highly variable and range from dense sand, gravel, and cobbles to silts and clays. In many areas, deposits of heavily calcareous-cemented sandy clay and clayey sand (“caliche”) are encountered, often having the engineering characteristics of rock. The alluvial soils are typically divided into three units based on lithographic changes. The Upper Alluvial Unit (UAU) generally consists of coarse-grained deposits of sand, gravel, and cobbles extending at least as deep as 1,200 feet in some areas. This unit is underlain by the Middle Fine-Grained Unit (MFU) composed primarily of silts and clays. The deepest unit is called the Lower Conglomerate Unit (LCU) with deposits of clay, silt, and sand interbedded with gravel and evaporites (Refs. 1 and 2).

The principal drainage feature through the Salt River Valley is the Salt River. The Salt River drains westerly and is one of the four principal tributaries of the Gila River, which extends along the southern border of the Site. The Salt River flows into the Gila River approximately 7 miles east of the Site. The Salt and Gila Rivers are usually dry through Phoenix due to numerous flood control/water retention structures upstream. However, water does occasionally flow in the Salt and Gila Rivers after heavy rain and/or water releases from the upstream structures.

Groundwater in the Salt River Valley is managed as the Phoenix Active Management Area (AMA). The Salt River Valley is divided into seven sub-basins, and the Site is located within the southwestern portion of the West Salt River Valley Hydrologic Basin. The primary source of groundwater in the Phoenix AMA is the alluvial soils between the mountain blocks. Groundwater in the Phoenix AMA is typically derived from the Upper Alluvial Unit and is usually unconfined. Groundwater data provided by the Arizona Department of Water Resources (ADWR) indicate the depth to groundwater in 2002-2003 in the Site vicinity ranged from approximately 75 to 100 feet below the ground surface (bgs)(Ref. 1). Based on the groundwater contours shown on Figure 4, the Site is located with an area of relatively flat groundwater gradient; however, the general direction of groundwater flow in the Site vicinity appeared to be northwesterly in 2002-2003. The general direction of groundwater flow in the Phoenix Metropolitan area is westerly; however, mountains, groundwater recharge areas, flow in the Gila River, and pumping of local groundwater wells can alter groundwater flow direction.

We contacted ADWR regarding wells on the Site and in the near Site vicinity. According to ADWR, numerous registered wells are located within the ten-acre subsections which include the Site.

Several wells (ADWR Registration Nos. 55-610418, 55-610419, 55-910411, 55-904550, and 55-906062) are registered to the current owner of the majority of the parcels of the Site, Dos Rios Materials. Two of the wells (55-610418 and 55-610419) were originally registered as existing irrigation, stockwater, and domestic wells by John Virgil Ezell, a former Site owner, in 1982. The other three wells (55-910411, 55-904550, and 55-906062) were registered as geotechnical or mineral exploration wells by Dos Rios Materials. We also identified several wells (ADWR Registration Nos. 55-638273, 55-602770, and 55-602771) registered by former owners of the Site. One well (55-638273) was registered by Prudencio M. and Luce (Lucy) S. Galindo, former owners of the developed parcel (014Z), as an existing domestic stockwater well in 1982. This well appears to be the well observed on this portion of the Site during our reconnaissance. Based on the well records, the well was installed on the Site prior to 1955 and depth to water was reportedly 96 feet bgs in 1982. Two wells are listed as owned by Steven V. Ratliff. Raymond V. and Kay C. Ratcliff were identified as previous owners of Parcel 018. These wells were originally registered by Paul and Fred Treguboff as existing domestic and industrial wells in 1982. These wells were reportedly installed in 1974 and 1980, and depth to water was reportedly 19 feet bgs in 1982.

Several additional wells (ADWR Registration Nos. 55-640738, 55-567483, 55-608352, and 55-623372) were identified within the same ten-acre subsections and were listed as owned by John C. Brown, Robert Mendoza, Tumbleweed Dairy LLC, and Floyd Schulz. Based on the ownership of the wells, three of these wells (55-640738, 55-567483, and 55-608352) appear to be located on adjacent parcels and not located on the Site. One additional well was identified in the Site vicinity registered to LeRoy Wolfe, the owner of Parcel 014Z of the Site. Based on the well records, this well was located further north of the Site and should not be located on or adjacent to on the Site.

During our reconnaissance, we observed one groundwater well on the developed parcel (Parcel 014Z) of the Site as mentioned above. We did not observe indications of other wells on the Site, with the exception of the small opening observed in the ground surface near the concrete irrigation standpipe on the northeastern portion of the Site. We also observed a well located along the north side of the South Extension of the Buckeye Canal, north of the Site. Based on our review of available well records, several additional wells may be located on or near the Site. If a well is encountered at the Site, we recommend it be capped or abandoned in accordance with ADWR guidelines. Copies of the ADWR well registry list and well records for the above mentioned wells are presented in Appendix B.

3.2 Environmental FirstSearch

We subcontracted TRACK-Info Services, LLC to prepare an Environmental FirstSearch Report (FirstSearch) on environmental data found in Federal and State records for the Site and properties in the vicinity of the Site. A copy of the report is presented in Appendix C. The date of each database checked by FirstSearch is shown on the second page of the FirstSearch report. The distance radius used by FirstSearch for each data search is also shown on this page. Information regarding each facility found in the database search is presented in the FirstSearch report.

We have summarized pertinent data from the FirstSearch report in the following sections. Other data found in the FirstSearch report should be considered for informational purposes only and has not

been closely reviewed by GEC. Where applicable, we also reference GEC's review of environmental databases for quality control purposes and for additional information.

3.3 CERCLA Facilities

The United States Environmental Protection Agency (EPA) investigates known or suspected uncontrolled or abandoned hazardous substance/hazardous waste facilities under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). EPA maintains a comprehensive list of these facilities in a database known as the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS). Facilities listed in CERCLIS may also be placed on the National Priorities List (NPL). The NPL identifies facilities with known contamination which are given priority for remedial action. An NPL facility is also known as a Federal "Superfund" facility. Facilities that were removed from the Superfund list are identified as NPL delisted facilities. Facilities that were on CERCLIS, but where, following an initial investigation, no contamination was found, contamination was removed, or the contamination was not serious enough for NPL consideration, are called No Further Remedial Action Planned (NFRAP) facilities.

FirstSearch reviewed CERCLIS for facilities within an approximate 1/2-mile radius of the Site. No facilities were identified within this search radius.

FirstSearch reviewed the NPL for facilities within an approximate 1-mile radius of the Site. No NPL facilities were identified within this search radius.

FirstSearch reviewed the NPL Delisted Database for facilities within an approximate 1/2-mile radius of the Site. No NPL delisted facilities were identified within this search radius.

FirstSearch reviewed the NFRAP List for facilities within an approximate 1/2-mile radius of the Site. No NFRAP facilities were identified within this search radius.

The Site was not identified on CERCLIS, NPL, NPL Delisted Database, or NFRAP Database.

3.4 WQARF Facilities

The Water Quality Assurance Revolving Fund (WQARF) program was established to investigate contaminated or potentially contaminated hazardous substance facilities in Arizona. The WQARF program is the State equivalent to the Federal CERCLA program. Some facilities are placed on the WQARF Registry List. These facilities are the State equivalent to the Federal NPL facilities. In the FirstSearch report, the WQARF Registry List is identified as the State/Tribal Sites List. The State/Tribal Sites List also includes facilities identified on the Arizona Superfund Program List. This list includes WQARF registry facilities, NPL facilities, and Department of Defense facilities.

FirstSearch reviewed the State/Tribal Sites List for facilities within an approximate 1-mile radius of the Site. No facilities were identified on the State/Tribal Sites List within the search radius.

The Site was not identified in the State/Tribal Sites List.

The Arizona Department of Environmental Quality (ADEQ) maintains a list of facilities pending investigation under the WQARF program. ADEQ's list is known as the WQARF Pending Investigation (PI) List. At the time of this report, ADEQ had not publically distributed this list. ADEQ indicated that currently the list is only updated when a facility status changes. ADEQ provided us a copy of the list dated June 2007 (Ref. 3a). We did not identify the Site or facilities in the near Site vicinity on this list.

ADEQ previously maintained a list of other State WQARF and Federal CERCLA facilities known as the Arizona CERCLA Investigation and Data Systems (ACIDS). In the FirstSearch report, the ACIDS List is identified as the State Other Database. The ACIDS List includes facilities with known or suspected soil, surface water, or groundwater contamination. An ADEQ memorandum dated July 5, 2000 indicated the ACIDS list has been archived and will no longer be distributed or updated. The memorandum also indicated "...the listing of properties on the ACIDS list is *not* an indication of liability or potential liability. Many of the properties on this list have no present involvement in WQARF or Federal Superfund."

FirstSearch reviewed the ACIDS List for facilities within a 1/2-mile radius of the Site.

FirstSearch identified no facilities on the ACIDS List within this search radius.

The Site was not identified in the ACIDS List.

3.5 RCRA Facilities

EPA regulates hazardous waste under the Resource Conservation and Recovery Act (RCRA). EPA maintains a database of facilities which generate hazardous waste or treat, store, and/or dispose (TSD) of hazardous wastes. The database is known as the Resource Conservation and Recovery Information System (RCRIS). In addition to identifying generators of hazardous waste and TSD facilities, this database includes the RCRA Administrative Action Tracking System (RAATS), the Compliance Monitoring and Enforcement List (CMEL), facilities undergoing corrective action (CORRACTS), and facilities no longer regulated by RCRA.

The FirstSearch report identifies generator facilities as RCRA GEN, TSD facilities as RCRA TSD, facilities no longer regulated as RCRA NLR, and facilities undergoing corrective action as RCRA COR ACT facilities. FirstSearch includes available RAATS and CMEL information within specific facility information.

FirstSearch reviewed RCRIS for generator and no-longer-regulated (NLR) facilities within an approximate 1/20-mile radius of the Site, TSD facilities within an approximate 1/2-mile radius, and facilities undergoing corrective actions within an approximate 1-mile radius of the Site.

FirstSearch identified no generator facilities, NLR facilities, TSD facilities, or facilities undergoing corrective actions on RCRIS within the specified search radii.

The Site was not identified by FirstSearch on RCRIS.

ADEQ also maintains a list of facilities that are, or have been, under investigation for violation of RCRA regulations. ADEQ's list is known as the RCRA Compliance Log. Once a facility is no longer under investigation, it can be removed from the list. GEC reviewed ADEQ's Compliance Log dated November 26, 2007 (Ref. 3b) for the Site.

GEC did not identify the Site on ADEQ's RCRA Compliance Log.

3.6 UST Facilities

USTs containing hazardous or petroleum substances are also regulated under RCRA. ADEQ maintains a list of registered USTs within the State. This list was reviewed by FirstSearch for facilities with registered USTs located within an approximate 1/20-mile radius of the Site.

FirstSearch identified no UST facilities within a 1/20-mile radius of the Site.

The Site was not identified on the UST List. Additionally, we did not observe indications of USTs on the Site during our reconnaissance.

ADEQ also maintains a list of leaking USTs (LUSTs) within the State. This list was checked by FirstSearch for reported LUSTs located within an approximate 1/2-mile radius of the Site.

FirstSearch identified no facilities with reported LUSTs within this search radius.

The Site was not identified on the LUST List.

3.7 Solid Waste Facilities

Solid waste facilities are also regulated under RCRA and State solid waste programs. ADEQ maintains several lists of active and closed landfills and other solid waste facilities which are located throughout the State. FirstSearch reviewed these lists for solid waste facilities located within an approximate 1/2-mile radius of the Site.

FirstSearch identified no solid waste facilities within this search radius.

The Site was not identified on the solid waste facilities lists.

3.8 ERNS/Hazardous Materials Incident Logs

Spills of oil or hazardous substances are required to be reported to various Federal and State agencies under numerous regulations. The Emergency Response Notification System (ERNS) is a national database used to collect information on reported releases of oil and hazardous substances. ADEQ also maintained a Hazardous Materials Logbook which was used to collect similar information regarding releases and threats of releases of oil and hazardous substances. ADEQ discontinued this logbook in 2001. In the FirstSearch report, the ADEQ Hazardous Materials Logbook and ERNS are identified as State Spills-90 and ERNS, respectively. These databases include information reported to EPA, the U.S. Coast Guard, the National Response Center, the Department of Transportation,

and/or ADEQ. FirstSearch checked the ERNS and ADEQ's Hazardous Materials Logbook for incidents within an approximate 1/20-mile radius of the Site.

FirstSearch identified no spill incidents within the search radius.

The Site was not identified on ERNS or the State Spills-90 List.

3.9 Drywells

Beginning in the 1970s, many municipalities in the Phoenix metropolitan area required storm water on newly developed commercial or industrial properties be retained and disposed on the property. Depending upon specific development and drainage conditions, one common method used to dispose of storm water is the use of a drywell. Drywells are typically circular shafts in the ground, 4 to 6 feet in diameter, and 20 feet to 80 feet or more deep, that are used to dispose of storm water.

Drywells are regulated under the Federal Safe Drinking Water Act and several State regulations. ADEQ maintains a list of drywells in the State. In the FirstSearch report, the drywell list is identified as the State Permits List. FirstSearch reviewed the drywell list for registered and unregistered drywells within an approximate 1/20-mile radius of the Site.

No properties with registered drywells were identified by FirstSearch within this search radius.

The Site was not identified on the drywells list. Additionally, we did not observe drywells on the Site during our reconnaissance.

3.10 Arizona Voluntary Remediation Program Project Status List

The ADEQ Waste Programs Division maintains a list of Voluntary Remediation Program (VRP) facilities. A VRP facility is an eligible facility on which voluntary investigation and cleanup measures are taken by property owners, prospective purchasers and other interested parties in cooperation with ADEQ. In the FirstSearch report, the VRP List is identified as the State/Tribal VCP List in the summary report. FirstSearch reviewed the ADEQ VRP List for facilities within an approximate 1/2-mile radius of the Site.

FirstSearch identified no VRP facilities within a 1/2-mile radius of the Site.

The Site was not identified on the VRP List.

We reviewed ADEQ's Brownfields Tracking System, which includes facilities within the ADEQ VRP and the ADEQ Brownfields Program, for the Site (Ref. 3c).

The Site was not identified in this list.

3.11 Brownfields Program List

A brownfield facility is an abandoned or under-used property with an active redevelopment potential that is complicated by either real or perceived environmental contamination. The ADEQ Waste Programs Division maintains a list of brownfield facilities as part of its VRP. To be listed by the ADEQ as a brownfield facility, a property must be an underutilized commercial or industrial facility, possess redevelopment potential, and redevelopment potential must be complicated by known or perceived contamination with a hazardous substance as defined by CERCLA. The Brownfields Management System (BMS) is a database designed to assist the EPA in collecting, tracking, and updating information, as well as reporting on the major activities and accomplishments of the various brownfield grant programs. FirstSearch reviewed the ADEQ Brownfields Program List within an approximate 1/2-mile radius of the Site.

FirstSearch identified no brownfield facilities within a 1/2-mile radius of the Site.

The Site was not identified on the Brownfields Program List.

3.12 Control Registries

The BMS includes Superfund facilities that use institutional (i.e., administrative) and/or engineering (i.e., physical) controls to meet remediation goals. The ADEQ Declaration of Environmental Use Restriction (DEUR) and Voluntary Environmental Mitigation Use Restriction (VEMUR) Program Lists include facilities that use institutional and/or engineering controls to meet remediation goals. A DEUR is a restrictive covenant that must be recorded when the owner of a facility with known contamination uses institutional or engineering controls to prevent or minimize exposure to contaminants on the property, or when an owner elects to leave contamination on the property that exceeds applicable residential soil remediation standards for the property. The VEMUR program has been replaced by the DEUR program, but historic VEMUR data is provided by ADEQ. In the FirstSearch report, the Federal Institutional and Engineering Control Registry List is identified as Federal IC/EC List in the summary report, the State Institutional and Engineering Control Registry List is identified as the State/Tribal IC and State/Tribal EC Lists. FirstSearch reviewed the Federal IC/EC, State/Tribal IC, and State/Tribal EC Lists for facilities at the Site.

The Site was not identified on the Federal IC/EC, State/Tribal IC, or State/Tribal EC Lists.

We searched the online ADEQ's Remediation and DEUR Tracking System for institutional or engineering controls on the Site (Ref. 3d).

The Site was not identified in this database.

3.13 Tribal Lands

The Indian Lands of the United States database includes areas with boundaries established by treaty, statute, and/or executive or court order, recognized by the Federal government as territory in which Native American tribes have primary governmental authority. The Indian Lands of the United States map layer shows areas of 640 acres or more administered by the Bureau of Indian Affairs. Included

are Federally-administered lands within a reservation which may or may not be considered part of the reservation. FirstSearch reviewed the Tribal Lands database for facilities within an approximate 1-mile radius of the Site.

FirstSearch identified no tribal land facilities within this search radius. The Site was not identified on the Tribal Lands Database.

3.14 Unmapped Facilities

FirstSearch will identify facilities that could not be plotted due to inadequate or missing information as “non-geocoded” (NON GC) in the distance and direction column of the Sites Summary Report. We reviewed the FirstSearch non-geocoded list. Based on our review, no non-geocoded facilities were identified within the applicable search radii of the Site, and the identified listings were removed from the FirstSearch report.

4. HISTORICAL LAND USE

4.1 General

As part of this assessment, GEC reviewed reasonably available engineering and historical records for the Site. The emphasis of the review was to identify previous uses of the Site that might indicate the presence of a REC on the Site. This section summarizes the findings of GEC's review.

Information concerning the history of the Site and/or vicinity was provided to GEC by a number of agencies, firms, and people, as outlined below and as detailed on our contact log presented in Appendix D.

Arizona Department of Environmental Quality
Arizona Department of Water Resources
Arizona State Fire Marshal's Office
Maricopa County Assessor's Office
Maricopa County Environmental Services Department
Maricopa County Planning and Development Department
Flood Control District of Maricopa County
Allands
Landiscor Aerial Information, Inc.
TRACK-Info Services, LLC
Bob Stevens, Flood Control District of Maricopa County
Carl LeRoy and Jennifer Wolfe, Site owners
Leger Stecker, Stecker Brothers Holdings
Eddie Duran, Stecker Brothers Holdings

4.2 Site Ownership

According to Maricopa County Assessor's Office, the Site is identified as portions of Parcels 005F, 010E, 012D, 012E, 012F, 012G, 014R, 014S, 014Y, 014Z, 017, and 018 on Map 57 of Book 502. We subcontracted Allands to prepare a historical chain-of-ownership report for Parcels 502-57-010E, 502-57-014Z, and 502-57-018, which we believe to be generally representative of the Site as a whole. A copy of the chain-of-ownership report is presented in Appendix E. The ownership histories of these parcels are summarized in the following subsections.

Parcel 502-57-010E

According to the Allands chain-of-ownership report, Parcel 502-57-010E is owned by Dos Rios Materials, LLC (Dos Rios Materials), an Arizona limited liability company. Dos Rios Materials acquired the parcel from Edelweiss Condo Partnership and S. C. P. Construction in 2005. Edelweiss Condo Partnership acquired partial interest in the parcel from Robert M. Wagner in 2005. Robert M. Wagner acquired partial interest in the parcel from Gene D. Shelton in 1984. S. C. P. Construction also acquired partial interest in the parcel from Gene D. Shelton in 1984. Prior to the acquisition of the parcel by Gene D. Shelton, the parcel was owned by numerous private individuals.

The earliest record of ownership for the parcel identified in the Allands report was a warranty deed from C. N. Towner and Bessie E. Towner to Don Paul Jones and David Jay Jones dated 1927.

Parcel 502-57-014Z

According to the Allands chain-of-ownership report, Parcel 502-57-014Z is owned by Carl Leroy Wolfe and Jennifer F. Wolfe. The Wolfes acquired the parcel in 1994 from Sally Dungan and Marcia L. Taylor. Prior to the acquisition of the parcel by Sally Dungan and Marcia L. Taylor, the parcel was owned by numerous private individuals. The earliest record of ownership for the parcel identified in the Allands report was a quit-claim deed from Norberto Mariscal to Reyes Mariscal, dated 1940.

Parcel 502-57-018

According to the Allands chain-of-ownership report, Parcel 502-57-018 is owned by Dos Rios Materials. Dos Rios Materials acquired the parcel from Edelweiss Condo Partnership and S. C. P. Construction in 2005. Edelweiss Condo Partnership acquired partial interest in the parcel in 2005 from Robert M. Wagner. Both Robert M. Wagner and S. C. P. Construction acquired partial interests in the parcel (both partial interests totaling full interest) from John Virgil Ezell and Connie Luann Ezell in 1984. The Ezells acquired the parcel in 1981 from the United States of America through the Farmer Home Administration. The United States of America acquired the parcel from Raymond V. Ratcliff and Kay C. Ratcliff in 1980. The Ratcliffs acquired the parcel from Air Services International, Inc. (Air Services International) in 1979. Air Services International was awarded the parcel in 1979 through a trustee's deed upon sale of deed of trust. Prior to the awarding of the parcel to Air Services International, Inc., ownership of the parcel was held by Western A G Service, Inc. (Western A G Service). Western A G Service acquired the parcel from Beverley J. Zweibel, Charlotte E. King, Helen Beirgy, and Ruth E. Styles in 1974. Prior to the acquisition of the parcel by these individuals, the parcel was owned by numerous private individuals. The earliest record of ownership for the parcel identified in the Allands report was a grant deed from Gaspar F. Vieyra and Refugio Saldate Vieyra to Marvin P. Perry, dated 1938.

The chain-of-ownership report identified several previous owners of the Site with potential commercial or industrial usages, including Air Services International, Western A G Service, S. C. P. Construction, and Dos Rios Materials. However, based our review, corporate ownership of the Site appears to have been primarily for agricultural or investment purposes. Based on the ownership report, Air Services International only held ownership in the Site for a very brief period of time in June 1979. S. C. P. Construction owned portions of the Site from 1984 until 2005. Based on our aerial review, these portions of the Site have been primarily agricultural farmland or vacant land along the Gila River. We did not observe structural development on these portions of the Site, with the exception of several long rectangular canopies which were observed to be arranged side-by-side in aerial photographs dated between 2000 and 2006. Based on our review, these structures were shade canopies over calf pens associated with a dairy located immediately southwest of the Site. Dos Rios Materials currently owns the majority of the parcels which comprise the Site. Dos Rios Materials yard and facilities are located adjacent and east of the Site. We did not observe indications of gravel mining operations on or adjacent to the Site.

The historical title review also included a search for recorded leases, environmental liens, DEURs, and VEMURs. No environmental liens, DEURs, or VEMURs were identified in the Allands chain-of-ownership report. One lease dated 1970 was identified for Parcel 502-57-018 by and between the executrix of the estate of Marguerite E. Iverson, Ruth E. Styles, and Helen A. Buirgy, lessors, and Western A G Service, Inc., lessee. Based on our review, this lease appeared to be for agricultural purposes. An unrecorded lease for Parcel 502-57-010E, dated 1970, was also disclosed by a 1971 joint tenancy deed. We did not identify indications of potential RECs at the Site.

4.3 Aerial Photographs

A review of aerial photographs was conducted using aerial photographs at Landiscor Aerial Information, Inc. (Landiscor) and using aerial photographs available online from the Maricopa County Assessor's Office website and the FCDMC website. Thirteen photographs dated between 1963 and 2000 were reviewed at Landiscor. Fifteen aerial photographs dated between 1937 and 2007 were reviewed on the FCDMC website, and ten aerial photographs dated between 1999 and 2007 were reviewed on the Maricopa County Assessor's Office website. The scale of the online aerial photographs was adjustable.

In the earliest aerial photograph available, dated 1937, the Site appeared to be a portion of the northern bank of the Gila River flood plain. Agricultural farm fields were observed generally north of the Site. Due to the relatively poor quality and resolution of the 1937 photograph, detailed features of the Site were unable to be distinguished. In the photographs dated 1949 and 1959, the Site appeared generally similar to its appearance in the 1937 photograph; however, agricultural farm fields that paralleled the south side of the canal were apparent on the central and southern portions of the Site. Development was apparent in the 1959 photograph on Parcel 014Z of the Site, and the development included four or five structures, canopies, or large features south of the canal, which appeared to include a residence and small associated livestock pens/facilities. In the photograph dated 1963, fewer structures/features were apparent on Parcel 014Z south of the canal, and in the photograph dated 1980, it appeared only two structures were present on the Parcel 014Z south of the canal. In the 1984 photograph, we observed a small structure/feature along the south side of the canal on the central portion of the Site; however, due to heavy vegetation within the Gila River flood plain, it was difficult to discern the exact nature of the feature, and the feature was not observed in the 1985 photograph.

The Site appeared relatively unchanged in the photographs dated between 1985 and 1993. In the 1995 photograph, we observed the furniture shop building and numerous stored items on Parcel 014Z. We observed additions to the south side of the furniture shop building in the photographs dated between 2000 and 2002. We also observed the canopy on the central portion of Parcel 014Z in the 2002 photograph. In the 2004 photograph, we observed the office/garage building on the western portion of Parcel 014Z.

In addition to the development on Parcel 014Z of the Site, we observed structural development on or near the southwestern border of the Site in the photographs dated between 2000 and 2006. We observed shallow PVC water piping in this area during our Site reconnaissance. Based on our review, these structures were shade canopies over former calf pens associated with an off-site dairy

located immediately southwest of the Site, and water lines observed on this portion of the Site during our reconnaissance were used to convey water to the livestock.

Our review of aerial photographs also included properties in the immediate vicinity of the Site. In the photographs reviewed, the Site vicinity appeared to be primarily agricultural farmland and vacant desert land located along the Gila River. Scattered residential development was observed in the general Site vicinity. We observed a dairy operation located north of the eastern portion of the Site in the photographs dated since 1980. We first observed structural development on the Brown parcel in 1980 photograph and on the Mendoza parcel in the 1991 photograph. We observed additional development and stored items on these parcels in later photographs.

4.4 Map Review

We reviewed the Perryville, Arizona 15-Minute Quadrangle USGS topographical map for land including the Site. The map was dated 1957, and photorevised 1982 (Ref. 4). The map indicated the elevation of the Site ranged from approximately 885 feet to 875 feet above mean sea level, generally sloping downward to the south and southwest. The map depicted the South Extension of the Buckeye Canal immediately north of the Site, an unpaved road that paralleled the south side of the canal, and the Gila River flood plain south of the Site. The map depicted three structures associated with the Wolfe property. Two of the structures were located on the Site, south of the canal. The other structure (the residence) was depicted north of the canal. The map also depicted two structures northeast of the Wolfe property, immediately south of the canal. As discussed in Section 4.3, one small feature was observed in this area of the Site in the photograph dated 1984; however, this feature was not observed in later photographs. We did not observe indications of former structural development in this area of the Site during our reconnaissance. The map did not identify gravel pits, mine shafts, landfills, or other features of potential environmental concern on the Site.

4.5 City Directories

City directories are telephone listings arranged by street address, rather than by surname or business name. The Site is located within an unincorporated portion of Maricopa County, and we did not identify historical addresses for the Site. Furthermore, based on our review, the Site has been primarily agricultural farmland or vacant desert land along the Gila River, with the exception of Parcel 014Z. Based on the rural location and lack of significant structural development, city directories would not have provided additional information regarding the Site. Therefore, city directories were not reviewed as a part of our assessment.

4.6 Site Development Records

Development records for the Site would have been maintained by the Maricopa County Planning and Development Department (MCPDD). Based on previous conversations with David Hill of the MCPDD, the MCPDD maintains records by street address and does not maintain records earlier than 2000. Based on our review, the Site has not been structurally developed in the past, with the exception of Parcel 502-57-014Z (Wolfe property). Based on our review, this property has not been

assigned a street address and was developed prior to 2000; therefore, we were unable to request development records for this portion of the Site from the MCPDD.

The Maricopa County Environmental Services Department (MCESD) maintains septic system records back to the early-1980s. Earlier records are maintained by ADEQ Water Quality Division. We understand ADEQ's septic system records date back to 1955. However, at this time, ADEQ has not made those records publicly available. The MCESD maintains septic records by street address. Because no street addresses have been assigned to the Site, we were unable to request septic system records associated with the Site from the MCESD. Based on our conversations with the owners of Parcel 014Z, we understand one or more septic systems are located on the parcel. As discussed in Section 2.2 of this report, a septic system, located on the central portion of the parcel, appeared to be associated with a hand sink within the furniture workshop. Since this septic system reportedly receives wastewater from an area where chemical products are stored and handled, we believe this septic system represents a REC at the Site and warrants further assessment.

4.7 Fire Records

We typically contact the Arizona State Fire Marshal's Office (ASFM) and the locally responding fire department regarding USTs, ASTs, and hazardous materials responses for the Site. These agencies maintain records by street address. Because street addresses have not been assigned to the parcels that include the Site, we were unable to request fire records from these agencies.

4.8 Interviews

We provided our client with a copy of a User Questionnaire for Phase I ESAs for user information as required by All Appropriate Inquiry (AAI, 40 CFR 312) guidelines. We received and reviewed the questionnaire as completed by Bob Stevens of FCDMC. Based on our review of the responses provided on the questionnaire, we did not identify indications of a REC at the Site. A copy of the questionnaire is presented in Appendix F.

During our Site reconnaissance, we spoke with Mr. and Mrs. Wolfe, the owners of the developed parcel of the Site (Parcel 014Z), regarding the history and usage of this portion of the Site, which has generally been incorporated into Section 2.2 of this report. Mr. Wolfe indicated that they have occupied the developed parcel of the Site since 1990. Mr. Wolfe indicated that he installs high temperature linings for furnaces. He indicated that the majority of his operations are performed at the customer's property and that no manufacturing activities are performed on the Site. Mrs. Wolfe indicated that her husband also performs some hauling activities, including hauling for Aleris, a aluminum recycling plant. She indicated that hauled material is not brought on-site or stored on the Site, with the exception of one haul load from Aleris, which included the gray material observed on the Site. She indicated that her husband does not perform maintenance activities on trucks or equipment at the Site. Mr. Wolfe indicated that no chemicals or fuels are stored on the Site. He did indicate that a small AST for diesel fuel was temporarily located near the residence on the northern portion of the parcel, north of the canal, for approximately two months. However, no ASTs were used to store fuel on the Site.

We also contacted Leger Stecker, the S.C.P. Construction Vice President of Operations, regarding the history and usage of the portions of the Site formerly owned by S.C.P. Construction. Mr. Stecker indicated that both S.C.P. Construction and Dos Rios Materials are owned by Stecker Brothers Holdings; however, the two companies are operationally distinct. Mr. Stecker had no information regarding the structures observed in aerial photographs from 2000 to 2006 on the southwest portion of the Site. Mr. Stecker spoke with Bob Evans of Sonoran Environmental, the environmental consulting firm retained by S.C.P. Construction, regarding the environmental condition of the Site. Mr. Stecker and Mr. Evans indicated they were unaware of ASTs; USTs; subsurface features such as sumps, drains, or septic systems; fill soil, buried or discarded materials; areas where chemical or petroleum-based products were used, stored, or handled in environmentally significant quantities; or other issues of potential environmental concern associated with the parcels.

We later spoke with Eddie Duran of Stecker Brothers Holding, who indicated the features observed on the southwest portion of the Site in aerial photographs were calf pens associated with a dairy located immediately southwest of the Site. He confirmed the water lines observed on this portion of the Site during our reconnaissance were used to convey water to the livestock. Additionally, he stated he was unaware of ASTs, USTs, or other containment features located or formerly located on this portion of the Site formerly occupied by the calf pens.

4.9 Site History

According to the 1939 Irrigation District Map of Central Arizona, land including the Site was brought under irrigation between 1887 and 1900. Therefore, portions of the Site and vicinity were likely part of agricultural farm fields in the late-1800s.

Historically, the Site was primarily vacant land along the Gila River flood plain since at least 1937. Portions of the Site have been utilized as agricultural land since at least the 1940s. Based on our review, a small parcel (Parcel 014Z) in the central portion of the Site has been developed since the 1950s. The initial development on the parcel appeared to include a residence and small associated livestock pens/facilities. A small workshop was constructed on the eastern portion of the developed parcel in the mid-1990s. Additions to the workshop were constructed on the Site between 2000 and 2002. The office/garage building was constructed on the western portion of the parcel in approximately 2004.

The Site is located in an unincorporated area of Maricopa County, and based on our review, municipal water and wastewater services are not available to the Site. The developed portion of the Site included a groundwater well and at least one septic system in the central portion of the developed parcel. Based on our observations and review, a small hand sink located within the furniture workshop building appears to discharge to the septic system. Based on our experience, septic systems designed to receive only domestic wastewater would not represent a significant environmental cleanup liability. However, since the sink is associated with the furniture operations, there is the potential for chemicals, paints, and solvents to have been discharged to the septic system. Therefore, we believe the hand sink and associated septic system represents a REC at the Site.

In addition to the development on Parcel 014Z of the Site, we observed structural development on or near the southwestern border of the Site in the photographs dated between 2000 and 2006. This

development was located along the south side of Maricopa County Route 85, and it appeared to include several long rectangular canopies arranged side-by-side. We observed shallow PVC water piping in this area during our Site reconnaissance. Based on our review, these structures were former shade canopies over calf pens associated with a dairy located immediately southwest of the Site, and water lines observed on this portion of the Site during our reconnaissance were used to convey water to the livestock.

5. CONCLUSIONS

We have performed a Phase I ESA in general conformance with the scope and limitations of ASTM E1527-05 on an approximate 300-foot wide strip of land generally located southeast of Maricopa County Route 85, between Citrus Road and Perryville Road, in Maricopa County, Arizona.. The information summarized in this report is not sufficient to guarantee the absence of RECs at the Site. However, our assessment did not reveal indications of RECs associated with the Site, except for the following RECs:

- the hand sink within the furniture shop and associated septic system on Parcel 014Z of the Site;
- the gray aluminum waste material and imported soil on Parcel 014Z of the Site; and
- the staining observed in various areas on Parcel 014Z of the Site, including around the 5-gallon containers of hydraulic and motor oil along the western border of the parcel.

We believe these issues warrant further assessment before an informed opinion regarding the environmental condition of the Site may be rendered.

6. LIMITATIONS

This report has been prepared exclusively for the use of the Flood Control District of Maricopa County (the "Client") and should only be reviewed and used in its entirety. No other person or entity may rely on the information, data, findings, recommendations, or conclusions presented in this report without the prior written consent of Geotechnical and Environmental Consultants, Inc. (d.b.a. GEC). If this report is reused by anyone, or relied upon by anyone other than our Client, GEC will not be held responsible for any claims, damages, losses, or expenses resulting from such reuse or reliance.

The results of services described in this report were provided in substantial conformance with the scope of services in our proposal/contract. We did not perform a limitless investigation or assessment of all possible conditions or circumstances that may exist at the Site. Rather, GEC's scope of services was limited to our Client's specific requirements in light of their objectives, schedule, budget, and risk management preferences. The opinions, conclusions, and recommendations presented in this report are based solely on the information and data generated and/or obtained by GEC for this project and our discussions with our client considering the Client's tolerance for risk and the Client's stated plans for the Site. We used our experience, judgment, and discussions with the client to specifically list those RECs that we believe are important to our Client.

The information, data, findings, recommendations, and conclusions presented in this report are based on conditions that existed at the Site at time of our services. The passage of time may affect the information presented in this report, and conditions at the Site may be affected by natural processes or human activity. Accordingly, decisions should not be based on information, recommendations, and conclusions contained in this report whose adequacy may be affected by these various factors. Additional information not readily available to GEC at the time of this report may result in a modification of the opinions, conclusions, or recommendations presented herein. If there are discrepancies between the Executive Summary and the text of the report, the report text will govern.

INSTRUCTIONS FOR COMPLETING REGISTRATION FORM

General Instructions

1. A person who owns an "Existing Well" shall register the well, pursuant to A.R.S. 45-593, by filing this form in duplicate with the Department of Water Resources not later than midnight June 14, 1982. The form must be completed and signed. Failure to do so will constitute a violation of A.R.S. 45-593, and may subject the well owner to injunction and/or civil penalties, pursuant to A.R.S. Title 45, Article 12.
2. An "Existing Well" means, (1) a well which was drilled on or before June 12, 1980 and which is not abandoned or sealed, or (2) a well which was not completed on or before June 12, 1980, but for which a Notice of Intention to Drill was on file with the Arizona Water Commission on or before June 12, 1980.
3. No registration fee is required for Exempt Wells. A \$10.00 registration fee must accompany registration forms for all Non-Exempt Wells.
4. An "Exempt Well" means a well having a pump with a maximum capacity of not more than 35 gallons per minute which is used to withdraw groundwater. An Exempt Well may include the non-commercial irrigation of not more than 1 acre of land.
5. A "Non-Exempt Well" means a well that is not an "Exempt Well".

INSTRUCTIONS FOR REGISTRATION QUESTIONS

1. The Registrant must be the owner of the well and may be an individual, public or private corporation, company, partnership, firm, association, society, estate, trust, any other private organization or enterprise, the United States, any state, territory or country or a governmental entity, political subdivision or municipal corporation organized under or subject to the constitution and laws of this State.
2. If you own an existing irrigation well drilled at any time, or any other type of well drilled on or after June 20, 1968, you should have an assigned control and/or file number. Write these numbers in item 2. If you do not know the number, please explain the reason on the form or on an attached sheet.
3. a. Fill in the Section, Township and Range in all cases if it is available.
b. If the well is in a subdivision and you have this information, give the subdivision name, Lot Number, and Address.
4. Show all purposes for which the water is used.
5. If the well is used for irrigation, give the number of acres irrigated in 1980 from the well.
6. If the owner of the land is an individual, give the last name, first name, middle initial. If the owner of the land is a corporation, partnership, firm, etc., fill in the appropriate title.
7. Complete the section on Well Data with the most accurate information available to you. If the data is not available, write N/A in the blanks.
8. Give the legal description of the place of use of the water. If place of use is in a subdivision and legal description is not available, give the subdivision name, Lot Number and/or address on the blank line.
9. The person in whose name a well is registered shall notify the Department of any change in ownership and shall keep all information on the registration record current and accurate. A form entitled "Change of Well Information/Ownership" is available for this purpose. A blank form will be furnished with the returned duplicate copy of the registration form.

INSTRUCTIONS FOR COMPLETING REGISTRATION FORM

General Instructions

1. A person who owns an "Existing Well" shall register the well, pursuant to A.R.S. 45-593, by filing this form **in duplicate** with the Department of Water Resources not later than midnight June 14, 1982. The form must be completed and signed. Failure to do so will constitute a violation of A.R.S. 45-593, and may subject the well owner to injunction and/or civil penalties, pursuant to A.R.S. Title 45, Article 12.
2. An "Existing Well" means, (1) a well which was drilled on or before June 12, 1980 and which is not abandoned or sealed, or (2) a well which was not completed on or before June 12, 1980, but for which a Notice of Intention to Drill was on file with the Arizona Water Commission on or before June 12, 1980.
3. No registration fee is required for Exempt Wells. A \$10.00 registration fee must accompany registration forms for all Non-Exempt Wells.
4. An "Exempt Well" means a well having a pump with a maximum capacity of not more than 35 gallons per minute which is used to withdraw groundwater. An Exempt Well may include the non-commercial irrigation of not more than 1 acre of land.
5. A "Non-Exempt Well" means a well that is not an "Exempt Well".

INSTRUCTIONS FOR REGISTRATION QUESTIONS

1. The Registrant must be the owner of the well and may be an individual, public or private corporation, company, partnership, firm, association, society, estate, trust, any other private organization or enterprise, the United States, any state, territory or country or a governmental entity, political subdivision or municipal corporation organized under or subject to the constitution and laws of this State.
2. If you own an existing irrigation well drilled at any time, or any other type of well drilled on or after June 20, 1968, you should have an assigned control and/or file number. Write these numbers in item 2. If you do not know the number, please explain the reason on the form or on an attached sheet.
3.
 - a. Fill in the Section, Township and Range in all cases if it is available.
 - b. If the well is in a subdivision and you have this information, give the subdivision name, Lot Number, and Address.
4. Show all purposes for which the water is used.
5. If the well is used for irrigation, give the number of acres irrigated in 1980 from the well.
6. If the owner of the land is an individual, give the last name, first name, middle initial. If the owner of the land is a corporation, partnership, firm, etc., fill in the appropriate title.
7. Complete the section on Well Data with the most accurate information available to you. If the data is not available, write N/A in the blanks.
8. Give the legal description of the place of use of the water. If place of use is in a subdivision and legal description is not available, give the subdivision name, Lot Number and/or address on the blank line.
9. The person in whose name a well is registered shall notify the Department of any change in ownership and shall keep all information on the registration record current and accurate. A form entitled "Change of Well Information/Ownership" is available for this purpose. A blank form will be furnished with the returned duplicate copy of the registration form.

DRILLING CARD
VARIANCE GRANTED

THIS AUTHORIZATION SHALL BE IN POSSESSION OF THE DRILLER DURING ALL DRILLING OPERATIONS

WELL REGISTRATION NO: 55-910411

AUTHORIZED DRILLER: GEOMECHANICS SOUTHWEST, INC.

LICENSE NO: 498

NOTICE OF INTENT TO DRILL AND ABANDON GEOTECHNICAL WELLS HAS BEEN FILED WITH THE DEPARTMENT

WELL OWNER: Dos Rios Materials, LLC/Phillip Stecker, ATTN: Eddie Duran

ADDRESS: 5340 W. Luke Avenue, Glendale, AZ, 85301

THE WELL(S) IS/ARE TO BE LOCATED IN THE:

1/4 of the 1/4 of the 1/4 Section 34 Township 01 N Range 02 W

NO. OF WELLS IN THIS PROJECT: 10

THIS AUTHORIZATION EXPIRES AT MIDNIGHT ON THE DAY OF 2/5/2010

THE DRILLER MUST FILE A WELL DRILLER REPORT AND WELL LOG WITHIN 30 DAYS OF COMPLETION OF DRILLING

This drilling or abandonment authority was granted based upon the certifications made by the above-named Driller in the notice of intent to drill or abandon. Those certifications, along with any variances granted, are listed below. By drilling or abandoning the well pursuant to this authorization, the above-named driller acknowledges the accuracy of the driller certifications. If the certifications are in error, this authorization is invalid and driller must contact the Department of Water Resource's NOI Section in writing at the address above to correct.

Variance(s) Granted To Driller:

- 100' Setback Variance for Geotechnical Wells.

Certification(s) Made By Driller:

- By checking this box, I certify that I have all necessary Registrar of Contractor (ROC) licenses in all necessary license categories for this drilling or abandonment project and that those licenses are current.
- By checking this box, I certify that I have read the applicable substantive policy statement regarding each variance that I am requesting, and that I shall comply with all of the requirements set forth therein.
- By checking this box, I certify that this NOI application is not an application to replace, deepen, or modify an existing well.
- By checking this box, I certify that I have been authorized by the above-named well owner to submit this Notice of Intent on the well owner's behalf.
- By checking this box, I certify that the information above is complete and correct, and that the well shall be drilled or abandoned in compliance with all pertinent statutes and rules, including any special standards that may be required to protect the aquifer or other water sources.

Glendale, AZ 85301

Registration No. 55-910411
File No. B(1-2)34 000

Dear Applicant:

Enclosed is a copy of the Notice of Intent to Drill and Abandon an Exploration/Specialty Well ("NOI") which you recently filed with this Department pursuant to A.R.S. §45-596. This is to inform you that the Department has approved the NOI and has mailed (or otherwise provided) a drilling card authorizing the drilling and abandonment of the well to the well driller identified in the NOI. The driller may not begin drilling until he has received the drilling card which he must keep in his possession at the well site during drilling. Because the Department is not authorizing this well to be drilled for water production purposes, no pump equipment may be installed (except for heat pump wells).

Well drilling activities must be completed within one year after the date the NOI was filed with the Department. If drilling is not completed within one year, you must file a new NOI before proceeding with further drilling. If it is necessary to change the location of the proposed well, you may not proceed with drilling until you file a new NOI with the Department and the Department issues an amended drilling card to the driller. If you change drillers, you must notify the Department of the new driller's identity. A new driller may not begin drilling until he receives a new drilling card from the Department.

If applicable, a Mineral Exploration Project Completion Report (DWR form 55-57) must be filed within 30 days after the completion of drilling and abandonment of mineral exploration boreholes. A Well Driller Report and Well Log form (DWR form 55-55) must be filed within 30 days after the completion of geotechnical boreholes or specialty wells. A Well Abandonment Completion Report (DWR form 55-58) must be filed within 30 days after the abandonment of geotechnical or specialty wells. Copies of the applicable forms were mailed to your driller with the drilling card.

Please be advised that A.R.S. § 45-593(C) requires the person to whom a well is registered to notify the Department of a change in ownership of the well and/or information pertaining to the physical characteristics of the well in order to keep this well registration file current and accurate.

Any change in well information or a request to change well driller must be filed on a Request to Change Well Information form (DWR form 55-71A) that may be downloaded from the ADWR Internet website at http://www.azwater.gov/dwr/Content/Find_by_Category/Permits_Forms_Applications/default.htm.

DRILLING CARD
VARIANCE GRANTED

THIS AUTHORIZATION SHALL BE IN POSSESSION OF THE DRILLER DURING ALL DRILLING OPERATIONS

WELL REGISTRATION NO: 55-906062

AUTHORIZED DRILLER: LAYNE CHRISTENSEN COMPANY

LICENSE NO: 7

NOTICE OF INTENT TO DRILL AND ABANDON MINERAL EXPLORATION WELLS HAS BEEN FILED WITH THE

WELL OWNER: Dos Rios Materials,LLC.

ADDRESS: 5340 W. Luke, Glendale, AZ, 85301

THE WELL(S) IS/ARE TO BE LOCATED IN THE:

1/4 of the 1/4 of the 1/4 Section 34 Township 01 N Range 02 W

NO. OF WELLS IN THIS PROJECT: 20

THIS AUTHORIZATION EXPIRES AT MIDNIGHT ON THE DAY OF 11/30/2007

THE DRILLER MUST FILE A WELL DRILLER REPORT AND WELL LOG WITHIN 30 DAYS OF COMPLETION OF DRILLING

This drilling or abandonment authority was granted based upon the certifications made by the above-named Driller in the notice of intent to drill or abandon. Those certifications, along with any variances granted, are listed below. By drilling or abandoning the well pursuant to this authorization, the above-named driller acknowledges the accuracy of the driller certifications. If the certifications are in error, this authorization is invalid and driller must contact the Department of Water Resource's NOI Section in writing at the address above to correct.

Variance(s) Granted To Driller:

- 100' Setback Variance for Geotechnical Wells.

Certification(s) Made By Driller:

- By checking this box, I certify that I have all necessary Registrar of Contractor (ROC) licenses in all necessary license categories for this drilling or abandonment project and that those licenses are current.
- By checking this box, I certify that I have read the applicable substantive policy statement regarding each variance that I am requesting, and that I shall comply with all of the requirements set forth therein.
- By checking this box, I certify that this NOI application is not an application to replace, deepen, or modify an existing well.
- By checking this box, I certify that I have been authorized by the above-named well owner to submit this Notice of Intent on the well owner's behalf.
- By checking this box, I certify that the information above is complete and correct, and that the well shall be drilled or abandoned in compliance with all pertinent statutes and rules, including any special standards that may be required to protect the aquifer or other water sources.

Director

Dos Rios Materials,LLC.
5340 W. Luke
Glendale, AZ, 85301

Registration No. 55-906062
File No. B(1-2)34 000

Dear Applicant:

Enclosed is a copy of the Notice of Intent to Drill and Abandon an Exploration/Specialty Well ("NOI") which you recently filed with this Department pursuant to A.R.S. §45-596. This is to inform you that the Department has approved the NOI and has mailed (or otherwise provided) a drilling card authorizing the drilling and abandonment of the well to the well driller identified in the NOI. The driller may not begin drilling until he has received the drilling card which he must keep in his possession at the well site during drilling. Because the Department is not authorizing this well to be drilled for water production purposes, no pump equipment may be installed (except for heat pump wells).

Well drilling activities must be completed within one year after the date the NOI was filed with the Department. If drilling is not completed within one year, you must file a new NOI before proceeding with further drilling. If it is necessary to change the location of the proposed well, you may not proceed with drilling until you file a new NOI with the Department and the Department issues an amended drilling card to the driller. If you change drillers, you must notify the Department of the new driller's identity. A new driller may not begin drilling until he receives a new drilling card from the Department.

If applicable, a Mineral Exploration Project Completion Report (DWR form 55-57) must be filed within 30 days after the completion of drilling and abandonment of mineral exploration boreholes. A Well Driller Report and Well Log form (DWR form 55-55) must be filed within 30 days after the completion of geotechnical boreholes or specialty wells. A Well Abandonment Completion Report (DWR form 55-58) must be filed within 30 days after the abandonment of geotechnical or specialty wells. Copies of the applicable forms were mailed to your driller with the drilling card.

Please be advised that A.R.S. § 45-593(C) requires the person to whom a well is registered to notify the Department of a change in ownership of the well and/or information pertaining to the physical characteristics of the well in order to keep this well registration file current and accurate.

Any change in well information or a request to change well driller must be filed on a Request to Change Well Information form (DWR form 55-71A) that may be downloaded from the ADWR Internet website at http://www.azwater.gov/dwr/Content/Find_by_Category/Permits_Forms_Applications/default.htm.

INSTRUCTIONS FOR COMPLETING REGISTRATION FORM

General Instructions

1. A person who owns an "Existing Well" shall register the well, pursuant to A.R.S. 45-593, by filing this form in duplicate with the Department of Water Resources not later than midnight June 14, 1982. The form must be completed and signed. Failure to do so will constitute a violation of A.R.S. 45-593, and may subject the well owner to injunction and/or civil penalties, pursuant to A.R.S. Title 45, Article 12.
2. An "Existing Well" means, (1) a well which was drilled on or before June 12, 1980 and which is not abandoned or sealed, or (2) a well which was not completed on or before June 12, 1980, but for which a Notice of Intention to Drill was on file with the Arizona Water Commission on or before June 12, 1980.
3. No registration fee is required for Exempt Wells. A \$10.00 registration fee must accompany registration forms for all Non-Exempt Wells.
4. An "Exempt Well" means a well having a pump with a maximum capacity of not more than 35 gallons per minute which is used to withdraw groundwater. An Exempt Well may include the non-commercial irrigation of not more than 1 acre of land.
5. A "Non-Exempt Well" means a well that is not an "Exempt Well".

INSTRUCTIONS FOR REGISTRATION QUESTIONS

1. The Registrant must be the owner of the well and may be an individual, public or private corporation, company, partnership, firm, association, society, estate, trust, any other private organization or enterprise, the United States, any state, territory or country or a governmental entity, political subdivision or municipal corporation organized under or subject to the constitution and laws of this State.
2. If you own an existing irrigation well drilled at any time, or any other type of well drilled on or after June 20, 1968, you should have an assigned control and/or file number. Write these numbers in item 2. If you do not know the number, please explain the reason on the form or on an attached sheet.
3.
 - a. Fill in the Section, Township and Range in all cases if it is available.
 - b. If the well is in a subdivision and you have this information, give the subdivision name, Lot Number, and Address.
4. Show all purposes for which the water is used.
5. If the well is used for irrigation, give the number of acres irrigated in 1980 from the well.
6. If the owner of the land is an individual, give the last name, first name, middle initial. If the owner of the land is a corporation, partnership, firm, etc., fill in the appropriate title.
7. Complete the section on Well Data with the most accurate information available to you. If the data is not available, write N/A in the blanks.
8. Give the legal description of the place of use of the water. If place of use is in a subdivision and legal description is not available, give the subdivision name, Lot Number and/or address on the blank line.
9. The person in whose name a well is registered shall notify the Department of any change in ownership and shall keep all information on the registration record current and accurate. A form entitled "Change of Well Information/Ownership" is available for this purpose. A blank form will be furnished with the returned duplicate copy of the registration form.

Dear Sir or Madam:

The Department is contacting you to request your permission to obtain a depth-to-water measurement from your well(s). The purpose of the Department's water level measurement program is to collect groundwater level information that can be used to develop water level maps and databases that support scientific, planning and water management studies throughout the state. According to Department records, you are the owner or lessee of the wells listed on the enclosed postcard.

By signing and returning the enclosed postcard you would be granting permission to trained employees of the Arizona Department of Water Resources to obtain water level measurements from your wells. The Department greatly appreciates your cooperation in granting permission to measure the depth-to-water in your wells and please contact us if you have any questions concerning our request at:

ADWR
3550 N. Central Avenue
Phoenix, AZ 85012
Phone: (602) 771-8627
Fax: (602) 771-1520

or visit the ADWR website to view monitoring information at: www.azwater.gov.

If you are no longer the owner or lessee of the wells listed on the enclosed postcard, please mark the postcard accordingly and include current owner or lessee contact information if known. Please complete and return the self-addressed postage paid postcard at your earliest convenience.

Thank you,

Herb Guenther, Director

INSTRUCTIONS FOR COMPLETING REGISTRATION FORM

General Instructions

1. A person who owns an "Existing Well" shall register the well, pursuant to A.R.S. 45-593, by filing this form in duplicate with the Department of Water Resources not later than midnight June 14, 1982. The form must be completed and signed. Failure to do so will constitute a violation of A.R.S. 45-593, and may subject the well owner to injunction and/or civil penalties, pursuant to A.R.S. Title 45, Article 12.
2. An "Existing Well" means, (1) a well which was drilled on or before June 12, 1980 and which is not abandoned or sealed, or (2) a well which was not completed on or before June 12, 1980, but for which a Notice of Intention to Drill was on file with the Arizona Water Commission on or before June 12, 1980.
3. No registration fee is required for Exempt Wells. A \$10.00 registration fee must accompany registration forms for all Non-Exempt Wells.
4. An "Exempt Well" means a well having a pump with a maximum capacity of not more than 35 gallons per minute which is used to withdraw groundwater. An Exempt Well may include the non-commercial irrigation of not more than 1 acre of land.
5. A "Non-Exempt Well" means a well that is not an "Exempt Well".

INSTRUCTIONS FOR REGISTRATION QUESTIONS

1. The Registrant must be the owner of the well and may be an individual, public or private corporation, company, partnership, firm, association, society, estate, trust, any other private organization or enterprise, the United States, any state, territory or country or a governmental entity, political subdivision or municipal corporation organized under or subject to the constitution and laws of this State.
2. If you own an existing irrigation well drilled at any time, or any other type of well drilled on or after June 20, 1968, you should have an assigned control and/or file number. Write these numbers in item 2. If you do not know the number, please explain the reason on the form or on an attached sheet.
3.
 - a. Fill in the Section, Township and Range in all cases if it is available.
 - b. If the well is in a subdivision and you have this information, give the subdivision name, Lot Number, and Address.
4. Show all purposes for which the water is used.
5. If the well is used for irrigation, give the number of acres irrigated in 1980 from the well.
6. If the owner of the land is an individual, give the last name, first name, middle initial. If the owner of the land is a corporation, partnership, firm, etc., fill in the appropriate title.
7. Complete the section on Well Data with the most accurate information available to you. If the data is not available, write N/A in the blanks.
8. Give the legal description of the place of use of the water. If place of use is in a subdivision and legal description is not available, give the subdivision name, Lot Number and/or address on the blank line.
9. The person in whose name a well is registered shall notify the Department of any change in ownership and shall keep all information on the registration record current and accurate. A form entitled "Change of Well Information/Ownership" is available for this purpose. A blank form will be furnished with the returned duplicate copy of the registration form.

SCOTTSDALE AZ 85251

Dear Sir or Madam:

The Department is contacting you to request your permission to obtain a depth-to-water measurement from your well(s). The purpose of the Department's water level measurement program is to collect groundwater level information that can be used to develop water level maps and databases that support scientific, planning and water management studies throughout the state. According to Department records, you are the owner or lessee of the wells listed on the enclosed postcard.

By signing and returning the enclosed postcard you would be granting permission to trained employees of the Arizona Department of Water Resources to obtain water level measurements from your wells. The Department greatly appreciates your cooperation in granting permission to measure the depth-to-water in your wells and please contact us if you have any questions concerning our request at:

ADWR
3550 N. Central Avenue
Phoenix, AZ 85012
Phone: (602) 771-8627
Fax: (602) 771-1520

or visit the ADWR website to view monitoring information at: www.azwater.gov.

If you are no longer the owner or lessee of the wells listed on the enclosed postcard, please mark the postcard accordingly and include current owner or lessee contact information if known. Please complete and return the self-addressed postage paid postcard at your earliest convenience.

Thank you,

Herb Guenther, Director

INSTRUCTIONS FOR COMPLETING REGISTRATION FORM

General Instructions

- 6488NS
1. A person who owns an "Existing Well" shall register the well, pursuant to A.R.S. 45-593, by filing this form in duplicate with the Department of Water Resources not later than midnight June 14, 1982. The form must be completed and signed. Failure to do so will constitute a violation of A.R.S. 45-593, and may subject the well owner to injunction and/or civil penalties, pursuant to A.R.S. Title 45, Article 12.
 2. An "Existing Well" means, (1) a well which was drilled on or before June 12, 1980 and which is not abandoned or sealed, or (2) a well which was not completed on or before June 12, 1980, but for which a Notice of Intention to Drill was on file with the Arizona Water Commission on or before June 12, 1980.
 3. No registration fee is required for Exempt Wells. A \$10.00 registration fee must accompany registration forms for all Non-Exempt Wells.
 4. An "Exempt Well" means a well having a pump with a maximum capacity of not more than 35 gallons per minute which is used to withdraw groundwater. An Exempt Well may include the non-commercial irrigation of not more than 1 acre of land.
 5. A "Non-Exempt Well" means a well that is not an "Exempt Well".

INSTRUCTIONS FOR REGISTRATION QUESTIONS

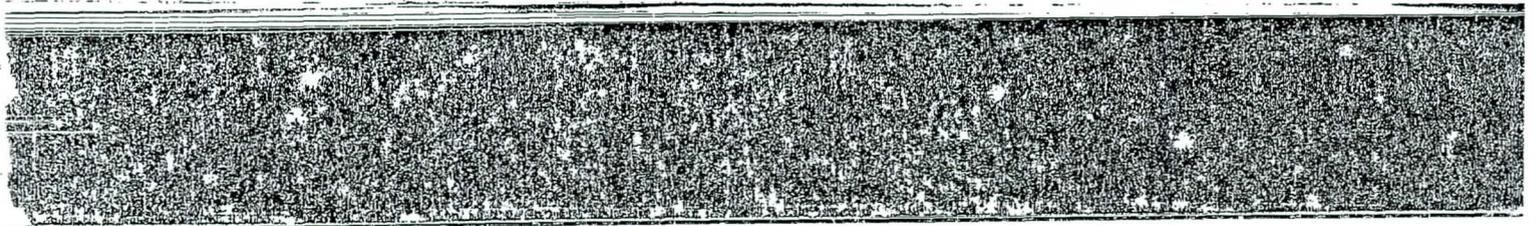

1. The Registrant must be the owner of the well and may be an individual, public or private corporation, company, partnership, firm, association, society, estate, trust, any other private organization or enterprise, the United States, any state, territory or country or a governmental entity, political subdivision or municipal corporation organized under or subject to the constitution and laws of this State.
2. If you own an existing irrigation well drilled at any time, or any other type of well drilled on or after June 20, 1968, you should have an assigned control and/or file number. Write these numbers in item 2. If you do not know the number, please explain the reason on the form or on an attached sheet.
3.
 - a. Fill in the Section, Township and Range in all cases if it is available.
 - b. If the well is in a subdivision and you have this information, give the subdivision name, Lot Number, and Address.
4. Show all purposes for which the water is used.
5. If the well is used for irrigation, give the number of acres irrigated in 1980 from the well.
6. If the owner of the land is an individual, give the last name, first name, middle initial. If the owner of the land is a corporation, partnership, firm, etc., fill in the appropriate title.
7. Complete the section on Well Data with the most accurate information available to you. If the data is not available, write N/A in the blanks.
8. Give the legal description of the place of use of the water. If place of use is in a subdivision and legal description is not available, give the subdivision name, Lot Number and/or address on the blank line.
9. The person in whose name a well is registered shall notify the Department of any change in ownership and shall keep all information on the registration record current and accurate. A form entitled "Change of Well Information/Ownership" is available for this purpose. A blank form will be furnished with the returned duplicate copy of the registration form.

FRANK WALTER LEWIS, a married man as his sole and separate property,

hereafter called the Grantor, whether one or more than one, hereby conveys to JOHN CHARLES BROWN AND CHARLES T. BROWN AND PAULINE BROWN, his wife,

all not as tenants in common and not as a community property estate, but as joint tenants with right of survivorship, the following described property situated in Maricopa County, Arizona, together with all rights and privileges appurtenant thereto, to wit:

Those parts of Tract No. 56 and Tract No. 57 and of the North half of Tract No. 58, Township 1 North, Range 2 West of the Gila and Salt River Base and Meridian bounded on the Northwest by the Southeasterly line of the land and right of way of the Phoenix-Yuma State Highway, U. S. Highway 80, on the South by the South line of the North half of Tract No. 58 and the South line of Tract No. 57 and on the East by the East line of Tract No. 57 and the prolongation Northerly of said East line of Tract No. 57 to its intersection with the Southeasterly line of the Phoenix-Yuma State Highway, U. GENERAL INSTRUCTIONS FOR FILING NOTICE WITH ADWR

Section §45-596(D) provides that the Director shall determine that all information required on this form has been submitted. If not, the person filing will be notified, and the drilling, deepening or modification of the well may not proceed.

Section §45-596(d) provides that the Department has 15 days after the receipt of a complete and correct notice of intention to record the notice and mail duplicate to owner. Drill card will be mailed directly to drilling firm as stated in item #14.

Please mail two original notices with original signatures, a site plan in DUPLICATE, and a check or money order (no cash) in the amount of \$10.00 to P.O. Box 458, Phoenix, Arizona 85001-0458 or hand deliver to 500 North Third Street, Phoenix, Arizona 85004-3903. USE BLACK OR BLUE INK. If the well is a replacement, deepening or modification of an existing well, provide the registration number of the existing well in item 2. Construction standards for wells, including abandonment, shall be in accordance with Department Rules.

Owner Robert K. Mendoza Robert P. Mendoza 2/20/98

SPECIFIC INSTRUCTIONS, LIMITATIONS AND CONDITIONS

1. Pursuant to Section §45-596, Arizona Revised Statutes, provides: a person may not drill, deepen, or modify any well, without first filing a Notice of Intention to Drill with the Department.
 - a. Will be on a 8½"x11" piece of plain paper with representation of the locations of all structures, septic tank or sewer system and the proximity of adjacent lot lines to scale.
 - b. Must show the proposed well location and the location of any septic or sewer system that is either located on the property or within one hundred feet of the proposed well site.
 - c. Shall demonstrate to the Director's satisfaction that the well will not be drilled within one hundred feet of any septic or sewer system.
 - d. Must be approved by the county health authority, or by a local health authority in areas where the county health authority has delegated authority to approve septic or sewer systems. Before approval, the health authority shall review the plan and determine whether the proposed well location complies with applicable state and local laws regarding the placement of wells. If so, the health authority shall endorse the site plan and the proposed well placement.
3. Endorsement by the county/local authority is based on the best available judgement that this well, as shown on the site plan submitted, is 100 feet or more from all known and visually identifiable sewage treatment systems. It is not a representation that a well placed at the site will be guaranteed as to quantity or quality. Information brought to light at a future date may render this determination invalid.
4. If a well which was originally drilled as an exploration well, a monitor well, a piezometer well or for any use other than domestic purposes is later proposed to be converted to use for domestic purposes, as defined in section §45-454, the well owner shall file a notice of intention to drill and comply with the requirements prescribed pursuant to this section before the well is converted and any water from that well shall be used for domestic purposes.
5. Only a well driller licensed in the State of Arizona is authorized to drill, deepen or modify a well. A well driller may commence drilling a well only if the well drilling contractor or licensee has possession of a drilling card at the well site, issued by the Director in the name of the well drilling contractor or licensee, authorizing the drilling of the specific well in the specific location.
6. An exempt well means a well having a pump with a maximum capacity of not more than thirty-five (35) gallons per minute and may be used for the application of water to less than two (2) acres of land in an Irrigation Non-Expansion Area or Active Management Area to produce crops or parts of plants for sale, human consumption or for use as feed for livestock, range livestock or poultry.
7. The drilling, deepening, or modification of this well shall be completed within one (1) year of the date of the notice (§45-596.E.)
8. Within thirty (30) days after the installation of pumping equipment on this well, the registered well owner shall file the prescribed Corrosion Report. A form for this purpose will be furnished to the registered owner with the return of an annotated copy of this notice.
9. The person to whom a well is registered shall notify the Department of a change in ownership or a change in data relating to the well. The prescribed form for these purposes will be furnished to the registered owner with the return of an annotated copy of this Notice.
10. If an individual other than the land owner or lessee signs this Notice, an original letter of authorization from the land owner/lessee, that the individual has permission to sign this specific Notice on their behalf, shall accompany the Notice.

Registration No. 55-567483
File No.B(1-2) 34 DBB

Dear Well Owner:

Enclosed is a copy of the Notice of Intention (NOI) to drill a well. This NOI, which was recently filed with this Department, is being returned to you as evidence of your compliance with ARS §45-596. The enclosed Completion Report is to be submitted when pump equipment is installed. The Drilling Card and Well Drilling Report form have been sent to your driller. He may not begin drilling until he has received the Drilling Card and it must be displayed on the rig during drilling. If you change drillers, you must supply this Department with the new driller's identity. Please ensure that the driller you select is licensed to drill the type of well you require. All well drillers must pass an examination proving they understand the drilling methods for that particular license, and are familiar with the laws and regulations which govern well construction in Arizona.

If it is necessary to change the location of the proposed well, immediately contact the Department of Water Resources to obtain written permission before proceeding with the drilling. A properly signed, amended Drilling Card must be in the possession of the driller before drilling commences at a different location than originally authorized.

ARS §45-600 requires the registered well owner to submit a completion report within thirty (30) days after the installation of pumping equipment. It also requires the driller to furnish this Department a complete and accurate log of the well within thirty (30) days after completion of drilling. You should insist, and ensure, that both of these are done.

If in the course of drilling a new well, it is determined that the new well cannot be successfully completed as initially intended (dry hole, cave in, lost tools, etc.), the new well must be properly abandoned and a Well Abandonment Completion Report submitted per R12-15-816.F.

Per ARS §45-593 (C), the person to whom a well is registered shall notify this Department of a change in ownership of the well and/or information pertaining to the physical characteristics of the well in order to keep this well registration file current and accurate. We have enclosed a Change of Well Information Form should it be needed in the future.

Sincerely,

Sylvia Valdez

INSTRUCTIONS FOR COMPLETING REGISTRATION FORM

General Instructions

1. A person who owns an "Existing Well" shall register the well, pursuant to A.R.S. 45-593, by filing this form in duplicate with the Department of Water Resources not later than midnight June 14, 1982. The form must be completed and signed. Failure to do so will constitute a violation of A.R.S. 45-593, and may subject the well owner to injunction and/or civil penalties, pursuant to A.R.S. Title 45, Article 12.
2. An "Existing Well" means, (1) a well which was drilled on or before June 12, 1980 and which is not abandoned or sealed, or (2) a well which was not completed on or before June 12, 1980, but for which a Notice of Intention to Drill was on file with the Arizona Water Commission on or before June 12, 1980.
3. No registration fee is required for Exempt Wells. A \$10.00 registration fee must accompany registration forms for all Non-Exempt Wells.
4. An "Exempt Well" means a well having a pump with a maximum capacity of not more than 35 gallons per minute which is used to withdraw groundwater. An Exempt Well may include the non-commercial irrigation of not more than 1 acre of land.
5. A "Non-Exempt Well" means a well that is not an "Exempt Well".

INSTRUCTIONS FOR REGISTRATION QUESTIONS

1. The Registrant must be the owner of the well and may be an individual, public or private corporation, company, partnership, firm, association, society, estate, trust, any other private organization or enterprise, the United States, any state, territory or country or a governmental entity, political subdivision or municipal corporation organized under or subject to the constitution and laws of this State.
2. If you own an existing irrigation well drilled at any time, or any other type of well drilled on or after June 20, 1968, you should have an assigned control and/or file number. Write these numbers in item 2. If you do not know the number, please explain the reason on the form or on an attached sheet.
3. a. Fill in the Section, Township and Range in all cases if it is available.
b. If the well is in a subdivision and you have this information, give the subdivision name, Lot Number, and Address.
4. Show all purposes for which the water is used.
5. If the well is used for irrigation, give the number of acres irrigated in 1980 from the well.
6. If the owner of the land is an individual, give the last name, first name, middle initial. If the owner of the land is a corporation, partnership, firm, etc., fill in the appropriate title.
7. Complete the section on Well Data with the most accurate information available to you. If the data is not available, write N/A in the blanks.
8. Give the legal description of the place of use of the water. If place of use is in a subdivision and legal description is not available, give the subdivision name, Lot Number and/or address on the blank line.
9. The person in whose name a well is registered shall notify the Department of any change in ownership and shall keep all information on the registration record current and accurate. A form entitled "Change of Well Information/Ownership" is available for this purpose. A blank form will be furnished with the returned duplicate copy of the registration form.

INSTRUCTIONS FOR COMPLETING REGISTRATION FORM

General Instructions

1. A person who owns an "Existing Well" shall register the well, pursuant to A.R.S. 45-593, by filing this form in duplicate with the Department of Water Resources not later than midnight June 14, 1982. The form must be completed and signed. Failure to do so will constitute a violation of A.R.S. 45-593, and may subject the well owner to injunction and/or civil penalties, pursuant to A.R.S. Title 45, Article 12.
2. An "Existing Well" means, (1) a well which was drilled on or before June 12, 1980 and which is not abandoned or sealed, or (2) a well which was not completed on or before June 12, 1980, but for which a Notice of Intention to Drill was on file with the Arizona Water Commission on or before June 12, 1980.
3. No registration fee is required for Exempt Wells. A \$10.00 registration fee must accompany registration forms for all Non-Exempt Wells.
4. An "Exempt Well" means a well having a pump with a maximum capacity of not more than 35 gallons per minute which is used to withdraw groundwater. An Exempt Well may include the non-commercial irrigation of not more than 1 acre of land.
5. A "Non-Exempt Well" means a well that is not an "Exempt Well".

INSTRUCTIONS FOR REGISTRATION QUESTIONS

1. The Registrant must be the owner of the well and may be an individual, public or private corporation, company, partnership, firm, association, society, estate, trust, any other private organization or enterprise, the United States, any state, territory or country or a governmental entity, political subdivision or municipal corporation organized under or subject to the constitution and laws of this State.
2. If you own an existing irrigation well drilled at any time, or any other type of well drilled on or after June 20, 1968, you should have an assigned control and/or file number. Write these numbers in item 2. If you do not know the number, please explain the reason on the form or on an attached sheet.
3.
 - a. Fill in the Section, Township and Range in all cases if it is available.
 - b. If the well is in a subdivision and you have this information, give the subdivision name, Lot Number, and Address.
4. Show all purposes for which the water is used.
5. If the well is used for irrigation, give the number of acres irrigated in 1980 from the well.
6. If the owner of the land is an individual, give the last name, first name, middle initial. If the owner of the land is a corporation, partnership, firm, etc., fill in the appropriate title.
7. Complete the section on Well Data with the most accurate information available to you. If the data is not available, write N/A in the blanks.
8. Give the legal description of the place of use of the water. If place of use is in a subdivision and legal description is not available, give the subdivision name, Lot Number and/or address on the blank line.
9. The person in whose name a well is registered shall notify the Department of any change in ownership and shall keep all information on the registration record current and accurate. A form entitled "Change of Well Information/Ownership" is available for this purpose. A blank form will be furnished with the returned duplicate copy of the registration form.

APPLICATION GUIDELINES

In accordance with Arizona Revised Statutes ("A.R.S.") §§ 41-1008 and 1079, the Department of Water Resources (Department) provides the following information regarding the application review process for authority to drill.

NECESSARY STEPS & INSTRUCTIONS TO OBTAIN DRILLING AUTHORITY

1. Pursuant to A.R.S. § 45-596, a person may not drill, cause to be drilled, deepen or modify any well for which a permit is not required without first filing a Notice of Intent to Drill with the Department. Only a well drilling contractor licensed in the State of Arizona or a single well licensee (a person licensed to drill or modify one exempt well on his or her own property) is authorized to drill, deepen or modify a well. Drilling may not begin until the well drilling contractor or licensee has possession of a drilling card at the well site, issued by the Director in the name of the well drilling contractor or licensee, and which authorizes the drilling of the specific well in a specific location. To assist you in understanding the requirements for this application, copies of A.R.S. § 45-596 and Arizona Administrative Code ("A.A.C.") R12-15-810 are available at the Department bookstore (602-417-2450 x7127).
2. If replacing, deepening, or modifying an existing well, provide the registration number of the existing well in item 2. A replacement well is one located no more than 660 feet from the original well and that is not expected to annually withdraw more groundwater than historically withdrawn from the original well.
3. Information to complete items 3, 4, 5 and 13 may be available from your driller.
4. Information to complete items 9 and 12 may be available from your County Assessor's Office.
5. For item 10, in an Active Management Area, A.R.S. § 45-454 only allows non-irrigation uses for "exempt" wells. If the proposed use includes the growing of 2 or more acres of plants for sale or human/animal consumption (irrigation use), the well does not qualify as an exempt well.
6. An exempt well, referred to in Item 10, means a well with a pump with a maximum capacity of not more than thirty-five gallons per minute and used for non-irrigation purposes.
7. For item 11, in an Active Management Area, A.R.S. § 45-454 allow up to 56 acre feet per year of pumping from a domestic (residential) or stock watering exempt well, and up to 10 acre ft per year from an exempt well used for other (usually commercial non-irrigation) purposes.
8. If any water from a proposed well on a parcel of twenty or fewer acres will be used for domestic purposes, as defined in § 45-454, the applicant must submit a well site plan of the property. The plan must be on an 8½" x 11" piece of plain paper with representation of the locations of all structures and proximity of adjacent lot lines, to scale. It must include the county assessor's parcel identification number. The plan must show the proposed well location and the location of any septic tank or sewer system that is either located on the property or within one hundred feet of the proposed well site, as well as indicating the measured shortest distance between the proposed well and existing septic tank system. **The plan must demonstrate that the well will not be drilled within one hundred feet of any septic or sewer system.**
9. The site plan must be approved by the county health authority, or by a local health authority in areas where the county health authority has delegated authority to approve septic or sewer systems. Endorsement by the county/local authority is based solely on the best available judgement that the proposed well, as shown on the site plan submitted, is 100 feet or more from all known and visually identifiable sewage treatment systems. It is not a representation that a well placed at this site will be guaranteed as to quantity or quality. In areas where there is no local or county authority that controls installation of septic tanks or sewer systems, or if the health authority is unable to determine whether the proposed well location complies with state and local requirements, the applicant must apply for approval directly to the Department of Water Resources.
10. If an individual other than the land owner or lessee signs this notice, an original letter of authorization from the land owner/lessee, stating that the individual has permission to sign this specific notice on his or her behalf, must accompany the notice.
11. Please mail **two original Notices with original signatures and two site plans** and, in accordance with A.R.S. § 45-113, a **check or money order (in cash) in the amount of \$10.00** to P. O. Box 458, Phoenix Arizona, 85001-0458, or hand deliver to 500 North Third Street, Phoenix, Arizona.
12. Arizona Revised Statute § 45-596(D) provides that the Director of the Department is to determine whether or not all information required on this form has been submitted. If not, the person filing the Notice will be notified, and the drilling or modification of the well may **not** proceed.
13. This form is not applicable for non-exempt wells (those yielding more than thirty-five gallons per minute) within an Active Management Area. Contact Groundwater Management for further information regarding the appropriate notice to file with the Department.

TIME FRAME FOR REVIEW OF YOUR APPLICATION

Within 15 days after receipt of your Notice of Intention the Arizona Department of Water Resources ("Department") will determine whether your application should be granted or denied, unless this time is extended for lack of a complete application. If your application is incomplete, the Department will notify you in writing and will specify what information is necessary to make the application complete. Until the missing information is received, the time frame for review of your application will be suspended. Your application will not be complete until all of the requested information is received. If you do not supply the missing information within sixty (60) days, the Department may deem your application withdrawn and close the file.

At the end of its review, the Department will send you a written notice either granting or denying your application for drilling authority. If your application is approved, the Drill Card will be mailed directly to the drilling contractor. If denied, the Department's notice will state justification for the denial and an explanation of your right to appeal.

CONSTRUCTION AND FOLLOW UP REQUIREMENTS

1. Construction and abandonment standards for wells, must be in accordance with Department Regulations. A.R.S. § 45-594 and Arizona Administrative Code R12-15-811 require the well to be constructed with a twenty foot steel surface seal casing, including a one foot steel stickup and one and one-half inches of grout seal around the casing from the surface to a depth of twenty feet, unless a variance is granted (see A.R.S. § 45-596 (G) for procedure to follow in requesting a variance).
2. Pursuant to § 45-596(E), the drilling, deepening or modification of the well must be completed within one year of the date of the Notice of Intent. If the well is not completed within one year, a new Notice of Intent must be filed before proceeding with further construction.
3. If a well which was originally drilled as an exploration well, a monitor well, a piezometer well or for any use other than domestic use is later proposed to be converted to use for domestic purposes as defined in § 45-454, the well owner must file a Notice of Intention to Drill and comply with the requirements of § 45-596 before the well is converted and any water from that well is used for domestic purposes.
4. Within thirty days after installation of pumping equipment, the registered well owner must file a Completion Report with the Department. The person to whom a well is registered also must notify the Department of a change in ownership or a change in data relating to this well.

Registration No. 55-581625

File No. B(1-2) 34 ACB

Dear Well Owner:

Enclosed is a copy of the Notice of Intention (NOI) to Drill a well. This NOI, which was recently filed with this Department, is being returned to you as evidence of your compliance with ARS §45-596. The enclosed Completion Report is to be submitted when pump equipment is installed. The Drilling Card and Well Drilling Report form have been sent to your driller. He may not begin drilling until he has received the Drilling Card and it must be displayed on the rig during drilling. If you change drillers, you must supply this Department with the new driller's identity. Please ensure that the driller you select is licensed to drill the type of well you require. All well drillers must pass an examination proving they understand the drilling methods for that particular license, and are familiar with the laws and regulations which govern well construction in Arizona.

If it is necessary to change the location of the proposed well, immediately contact the Department of Water Resources to obtain written permission before proceeding with the drilling. A properly signed, amended Drilling Card must be in the possession of the driller before drilling commences at a different location than originally authorized.

ARS §45-600 requires the registered well owner to submit a completion report within thirty (30) days after the installation of pumping equipment. It also requires the driller to furnish this Department a complete and accurate log of the well within thirty (30) days after completion of drilling. You should insist, and ensure, that both of these are done.

If in the course of drilling a new well, it is determined that the new well cannot be successfully completed as initially intended (dry hole, cave in, lost tools, etc.), the new well must be properly abandoned and a Well Abandonment Completion Report submitted per R12-15-816.F.

Per ARS §45-593 (C), the person to whom a well is registered shall notify this Department of a change in ownership of the well and/or information pertaining to the physical characteristics of the well in order to keep this well registration file current and accurate. We have enclosed a Change of Well Information Form should it be needed in the future.

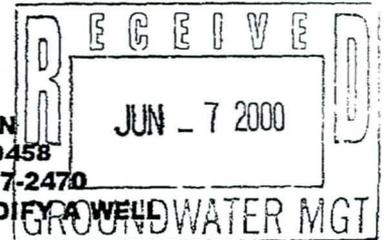

Sincerely,

A handwritten signature in cursive script, appearing to read "Sylvia Valdez".

APPLICATION GUIDELINES

In accordance with Arizona Revised Statutes ("A.R.S.") §§ 41-1008 and 1079, the Department of Water Resources (Department) provides the following information regarding the application review process for authority to drill.

NECESSARY STEPS & INSTRUCTIONS TO OBTAIN DRILLING AUTHORITY

1. Pursuant to A.R.S. § 45-596, a person may not drill, cause to be drilled, deepen or modify any well for which a permit is not required without first filing a Notice of Intent to Drill with the Department. Only a well drilling contractor licensed in the State of Arizona or a single well licensee (a person licensed to drill or modify one exempt well on his or her own property) is authorized to drill, deepen or modify a well. Drilling may not begin until the well drilling contractor or licensee has possession of a drilling card at the well site, issued by the Director in the name of the well drilling contractor or licensee, and which authorizes the drilling of the specific well in a specific location. To assist you in understanding the requirements for this application, copies of A.R.S. § 45-596 and Arizona Administrative Code ("A.A.C.") R12-15-810 are available at the Department bookstore (602-417-2450 x7127).
2. If replacing, deepening, or modifying an existing well, provide the registration number of the existing well in item 2. A replacement well is one located no more than 660 feet from the original well and that is not expected to annually withdraw more groundwater than historically withdrawn from the original well.
3. Information to complete items 3, 4, 5 and 13 may be available from your driller.
4. Information to complete items 9 and 12 may be available from your County Assessor's Office.
5. For item 10, in an Active Management Area, A.R.S. § 45-454 only allows non-irrigation uses for "exempt" wells. If the proposed use includes the growing of 2 or more acres of plants for sale or human/animal consumption (irrigation use), the well does not qualify as an exempt well.
6. An exempt well, referred to in Item 10, means a well with a pump with a maximum capacity of not more than thirty-five gallons per minute and used for non-irrigation purposes.
7. For item 11, in an Active Management Area, A.R.S. § 45-454 allow up to 56 acre feet per year of pumping from a domestic (residential) or stock watering exempt well, and up to 10 acre ft per year from an exempt well used for other (usually commercial non-irrigation) purposes.
8. If any water from a proposed well on a parcel of twenty or fewer acres will be used for domestic purposes, as defined in § 45-454, the applicant must submit a well site plan of the property. The plan must be on an 8½" x 11" piece of plain paper with representation of the locations of all structures and proximity of adjacent lot lines, to scale. It must include the county assessor's parcel identification number. The plan must show the proposed well location and the location of any septic tank or sewer system that is either located on the property or within one hundred feet of the proposed well site, as well as indicating the measured shortest distance between the proposed well and existing septic tank system. **The plan must demonstrate that the well will not be drilled within one hundred feet of any septic or sewer system.**
9. The site plan must be approved by the county health authority, or by a local health authority in areas where the county health authority has delegated authority to approve septic or sewer systems. Endorsement by the county/local authority is based solely on the best available judgement that the proposed well, as shown on the site plan submitted, is 100 feet or more from all known and visually identifiable sewage treatment systems. It is not a representation that a well placed at this site will be guaranteed as to quantity or quality. In areas where there is no local or county authority that controls installation of septic tanks or sewer systems, or if the health authority is unable to determine whether the proposed well location complies with state and local requirements, the applicant must apply for approval directly to the Department of Water Resources.
10. If an individual other than the land owner or lessee signs this notice, an original letter of authorization from the land owner/lessee, stating that the individual has permission to sign this specific notice on his or her behalf, must accompany the notice.
11. Please mail **two original Notices with original signatures and two site plans** and, in accordance with A.R.S. § 45-113, a **check or money order (no cash) in the amount of \$10.00** to P. O. Box 458, Phoenix Arizona, 85001-0458, or hand deliver to 500 North Third Street, Phoenix, Arizona.
12. Arizona Revised Statute § 45-596(D) provides that the Director of the Department is to determine whether or not all information required on this form has been submitted. If not, the person filing the Notice will be notified, and the drilling or modification of the well may **not** proceed.
13. This form is not applicable for non-exempt wells (those yielding more than thirty-five gallons per minute) within an Active Management Area. Contact Groundwater Management for further information regarding the appropriate notice to file with the Department.

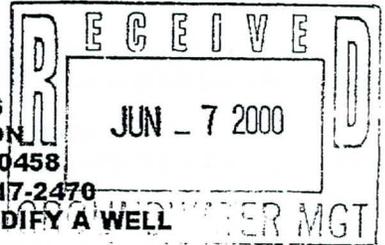

TIME FRAME FOR REVIEW OF YOUR APPLICATION

Within 15 days after receipt of your Notice of Intention the Arizona Department of Water Resources ("Department") will determine whether your application should be granted or denied, unless this time is extended for lack of a complete application. If your application is incomplete, the Department will notify you in writing and will specify what information is necessary to make the application complete. Until the missing information is received, the time frame for review of your application will be suspended. Your application will not be complete until all of the requested information is received. If you do not supply the missing information within sixty (60) days, the Department may deem your application withdrawn and close the file.

At the end of its review, the Department will send you a written notice either granting or denying your application for drilling authority. If your application is approved, the Drill Card will be mailed directly to the drilling contractor. If denied, the Department's notice will state justification for the denial and an explanation of your right to appeal.

CONSTRUCTION AND FOLLOW UP REQUIREMENTS

1. Construction and abandonment standards for wells, must be in accordance with Department Regulations. A.R.S. § 45-594 and Arizona Administrative Code R12-15-811 require the well to be constructed with a twenty foot steel surface seal casing, including a one foot steel stickup and one and one-half inches of grout seal around the casing from the surface to a depth of twenty feet, unless a variance is granted (see A.R.S. § 45-596 (G) for procedure to follow in requesting a variance).
2. Pursuant to § 45-596(E), the drilling, deepening or modification of the well must be completed within one year of the date of the Notice of Intent. If the well is not completed within one year, a new Notice of Intent must be filed before proceeding with further construction.
3. If a well which was originally drilled as an exploration well, a monitor well, a piezometer well or for any use other than domestic use is later proposed to be converted to use for domestic purposes as defined in § 45-454, the well owner must file a Notice of Intention to Drill and comply with the requirements of § 45-596 before the well is converted and any water from that well is used for domestic purposes.
4. Within thirty days after installation of pumping equipment, the registered well owner must file a Completion Report with the Department. The person to whom a well is registered also must notify the Department of a change in ownership or a change in data relating to this well.

APPLICATION GUIDELINES

In accordance with Arizona Revised Statutes ("A.R.S.") §§ 41-1008 and 1079, the Department of Water Resources (Department) provides the following information regarding the application review process for authority to drill.

NECESSARY STEPS & INSTRUCTIONS TO OBTAIN DRILLING AUTHORITY

1. Pursuant to A.R.S. § 45-596, a person may not drill, cause to be drilled, deepen or modify any well for which a permit is not required without first filing a Notice of Intent to Drill with the Department. Only a well drilling contractor licensed in the State of Arizona or a single well licensee (a person licensed to drill or modify one exempt well on his or her own property) is authorized to drill, deepen or modify a well. Drilling may not begin until the well drilling contractor or licensee has possession of a drilling card at the well site, issued by the Director in the name of the well drilling contractor or licensee, and which authorizes the drilling of the specific well in a specific location. To assist you in understanding the requirements for this application, copies of A.R.S. § 45-596 and Arizona Administrative Code ("A.A.C.") R12-15-810 are available at the Department bookstore (602-417-2450 x7127).
2. If replacing, deepening, or modifying an existing well, provide the registration number of the existing well in item 2. A replacement well is one located no more than 660 feet from the original well and that is not expected to annually withdraw more groundwater than historically withdrawn from the original well.
3. Information to complete items 3, 4, 5 and 13 may be available from your driller.
4. Information to complete items 9 and 12 may be available from your County Assessor's Office.
5. For item 10, in an Active Management Area, A.R.S § 45-454 only allows non-irrigation uses for "exempt" wells. If the proposed use includes the growing of 2 or more acres of plants for sale or human/animal consumption (irrigation use), the well does not qualify as an exempt well.
6. An exempt well, referred to in Item 10, means a well with a pump with a maximum capacity of not more than thirty-five gallons per minute and used for non-irrigation purposes.
7. For item 11, in an Active Management Area, A.R.S §45-454 allow up to 56 acre feet per year of pumping from a domestic (residential) or stock watering exempt well, and up to 10 acre ft per year from an exempt well used for other (usually commercial non-irrigation) purposes.
8. If any water from a proposed well on a parcel of twenty or fewer acres will be used for domestic purposes, as defined in § 45-454, the applicant must submit a well site plan of the property. The plan must be on an 8½" x 11" piece of plain paper with representation of the locations of all structures and proximity of adjacent lot lines, to scale. It must include the county assessor's parcel identification number. The plan must show the proposed well location and the location of any septic tank or sewer system that is either located on the property or within one hundred feet of the proposed well site, as well as indicating the measured shortest distance between the proposed well and existing septic tank system. **The plan must demonstrate that the well will not be drilled within one hundred feet of any septic or sewer system.**
9. The site plan must be approved by the county health authority, or by a local health authority in areas where the county health authority has delegated authority to approve septic or sewer systems. Endorsement by the county/local authority is based solely on the best available judgement that the proposed well, as shown on the site plan submitted, is 100 feet or more from all known and visually identifiable sewage treatment systems. It is not a representation that a well placed at this site will be guaranteed as to quantity or quality. In areas where there is no local or county authority that controls installation of septic tanks or sewer systems, or if the health authority is unable to determine whether the proposed well location complies with state and local requirements, the applicant must apply for approval directly to the Department of Water Resources.
10. If an individual other than the land owner or lessee signs this notice, an original letter of authorization from the land owner/lessee, stating that the individual has permission to sign this specific notice on his or her behalf, must accompany the notice.
11. Please mail **two original Notices with original signatures and two site plans** and, in accordance with A.R.S. § 45-113, a **check or money order (no cash) in the amount of \$10.00** to P. O. Box 458, Phoenix Arizona, 85001-0458, or hand deliver to 500 North Third Street, Phoenix, Arizona.
12. Arizona Revised Statute § 45-596(D) provides that the Director of the Department is to determine whether or not all information required on this form has been submitted. If not, the person filing the Notice will be notified, and the drilling or modification of the well may **not** proceed.
13. This form is not applicable for non-exempt wells (those yielding more than thirty-five gallons per minute) within an Active Management Area. Contact Groundwater Management for further information regarding the appropriate notice to file with the Department.

TIME FRAME FOR REVIEW OF YOUR APPLICATION

Within 15 days after receipt of your Notice of Intention the Arizona Department of Water Resources ("Department") will determine whether your application should be granted or denied, unless this time is extended for lack of a complete application. If your application is incomplete, the Department will notify you in writing and will specify what information is necessary to make the application complete. Until the missing information is received, the time frame for review of your application will be suspended. Your application will not be complete until all of the requested information is received. If you do not supply the missing information within sixty (60) days, the Department may deem your application withdrawn and close the file.

At the end of its review, the Department will send you a written notice either granting or denying your application for drilling authority. If your application is approved, the Drill Card will be mailed directly to the drilling contractor. If denied, the Department's notice will state justification for the denial and an explanation of your right to appeal.

CONSTRUCTION AND FOLLOW UP REQUIREMENTS

1. Construction and abandonment standards for wells, must be in accordance with Department Regulations. A.R.S. § 45-594 and Arizona Administrative Code R12-15-811 require the well to be constructed with a twenty foot steel surface seal casing, including a one foot steel stickup and one and one-half inches of grout seal around the casing from the surface to a depth of twenty feet, unless a variance is granted (see A.R.S. § 45-596 (G) for procedure to follow in requesting a variance).
2. Pursuant to § 45-596(E), the drilling, deepening or modification of the well must be completed within one year of the date of the Notice of Intent. If the well is not completed within one year, a new Notice of Intent must be filed before proceeding with further construction.
3. If a well which was originally drilled as an exploration well, a monitor well, a piezometer well or for any use other than domestic use is later proposed to be converted to use for domestic purposes as defined in § 45-454, the well owner must file a Notice of Intention to Drill and comply with the requirements of § 45-596 before the well is converted and any water from that well is used for domestic purposes.
4. Within thirty days after installation of pumping equipment, the registered well owner must file a Completion Report with the Department. The person to whom a well is registered also must notify the Department of a change in ownership or a change in data relating to this well.

Notice of Disclaimer

Due to the limitations, constraints, inaccuracies and incompleteness of government information and computer mapping data currently available to TRACK Info Services, certain conventions have been utilized in preparing the locations of all federal, state and local agency sites residing in TRACK Info Services's databases. All EPA NPL and state landfill sites are depicted by a rectangle approximating their location and size. The boundaries of the rectangles represent the eastern and western most longitudes; the northern and southern most latitudes. As such, the mapped areas may exceed the actual areas and do not represent the actual boundaries of these properties. All other sites are depicted by a point representing their approximate address location and make no attempt to represent the actual areas of the associated property. Actual boundaries and locations of individual properties can be found in the files residing at the agency responsible for such information.

Waiver of Liability

Although TRACK Info Services uses its best efforts to research the actual location of each site, TRACK Info Services does not and can not warrant the accuracy of these sites with regard to exact location and size. All authorized users of TRACK Info Services's services proceeding are signifying an understanding of TRACK Info Services's searching and mapping conventions, and agree to waive any and all liability claims associated with search and map results showing incomplete and or inaccurate site locations.

Environmental FirstSearch Descriptions

NPL: EPA NATIONAL PRIORITY LIST - The National Priorities List is a list of the worst hazardous waste sites that have been identified by Superfund. Sites are only put on the list after they have been scored using the Hazard Ranking System (HRS), and have been subjected to public comment. Any site on the NPL is eligible for cleanup using Superfund Trust money.

A Superfund site is any land in the United States that has been contaminated by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment.

FINAL - Currently on the Final NPL

PROPOSED - Proposed for NPL

NPL DELISTED: EPA NATIONAL PRIORITY LIST Subset - Database of delisted NPL sites. The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

DELISTED - Deleted from the Final NPL

CERCLIS: EPA COMPREHENSIVE ENVIRONMENTAL RESPONSE COMPENSATION AND LIABILITY INFORMATION SYSTEM (CERCLIS)- CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL.

PART OF NPL- Site is part of NPL site

DELETED - Deleted from the Final NPL

FINAL - Currently on the Final NPL

NOT PROPOSED - Not on the NPL

NOT VALID - Not Valid Site or Incident

PROPOSED - Proposed for NPL

REMOVED - Removed from Proposed NPL

SCAN PLAN - Pre-proposal Site

WITHDRAWN - Withdrawn

NFRAP: EPA COMPREHENSIVE ENVIRONMENTAL RESPONSE COMPENSATION AND LIABILITY INFORMATION SYSTEM ARCHIVED SITES - database of Archive designated CERCLA sites that, to the best of EPA's knowledge, assessment has been completed and has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

NFRAP - No Further Remedial Action Plan

P - Site is part of NPL site

D - Deleted from the Final NPL

F - Currently on the Final NPL

N - Not on the NPL

O - Not Valid Site or Incident

P - Proposed for NPL

R - Removed from Proposed NPL

S - Pre-proposal Site

W - Withdrawn

RCRA COR ACT: EPA RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM SITES - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.

RCRAInfo facilities that have reported violations and subject to corrective actions.

RCRA TSD: EPA RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM TREATMENT, STORAGE, and DISPOSAL FACILITIES. - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.

Facilities that treat, store, dispose, or incinerate hazardous waste.

RCRA GEN: EPA RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM GENERATORS - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.

Facilities that generate or transport hazardous waste or meet other RCRA requirements.

LGN - Large Quantity Generators

SGN - Small Quantity Generators

VGN - Conditionally Exempt Generator.

Included are RAATS (RCRA Administrative Action Tracking System) and CMEL (Compliance Monitoring & Enforcement List) facilities.

RCRA NLR: EPA RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM SITES - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.

Facilities not currently classified by the EPA but are still included in the RCRAInfo database. Reasons for non classification:

Failure to report in a timely matter.

No longer in business.

No longer in business at the listed address.

No longer generating hazardous waste materials in quantities which require reporting.

Federal IC / EC: EPA BROWNFIELD MANAGEMENT SYSTEM (BMS) - database designed to assist EPA in collecting, tracking, and updating information, as well as reporting on the major activities and accomplishments of the various Brownfield grant Programs.

FEDERAL ENGINEERING AND INSTITUTIONAL CONTROLS- Superfund sites that have either an engineering or an institutional control. The data includes the control and the media contaminated.

ERNS: EPA/NRC EMERGENCY RESPONSE NOTIFICATION SYSTEM (ERNS) - Database of incidents reported to the National Response Center. These incidents include chemical spills, accidents involving chemicals (such as fires or explosions), oil spills, transportation accidents that involve oil or chemicals, releases of radioactive materials, sightings of oil sheens on bodies of water, terrorist incidents involving chemicals, incidents where illegally dumped chemicals have been found, and drills intended to prepare responders to handle these kinds of incidents. Data since January 2001 has been received from the National Response System database as the EPA no longer maintains this data.

Tribal Lands: DOI/BIA INDIAN LANDS OF THE UNITED STATES - Database of areas with boundaries established by treaty, statute, and (or) executive or court order, recognized by the Federal Government as territory in which American Indian tribes have primary governmental authority. The Indian Lands of the United States map layer shows areas of 640 acres or more, administered by the Bureau of Indian Affairs. Included are Federally-administered lands within a reservation which may or may not be considered part of the reservation.

State/Tribal Sites: AZ DEQ WQARF REGISTRY LIST & SITE BOUNDARIES- Sites that are currently being addressed by the State's Water Quality Assurance Revolving Fund (WQARF) Program are listed on the WQARF Registry. Sites are represented as polygonal boundary areas as outlined by the Arizona Department of

Environmental Quality. The Program addresses sites that are scored and placed on the Registry, utilizing an approved eligibility and evaluation (E&E) model for evaluating risk and other environmental factors. The information provided includes the E&E score (out of a possible total score of 120), the Site Name, the City and County where the Site is located, and the date the Site was added to the Registry, and other information obtained from the ADEQ Web page. For more information regarding a specific site contact the ADEQ Project Manager or Community Involvement Coordinator identified in the details of the body of this report regarding that specific site titled CONTACTS. Each site may have a different project manager.

Note: In order to quickly identify Registry Sites in the Site Summary List of the First Search Reports. The Registry Sites will be labeled SP instead of State, but reside within the record count totals of the State (State) sites. Site Id's are identified as WQARF_REGISTRY_#/WQARF.

ARIZONA SUPERFUND PROGRAM LIST- (State Database Type in FirstSearch Reports) The Arizona Superfund Program List contains sites and potential sites within the jurisdiction of the Superfund Programs Section (SPS) since April 1997 (the date of the new Water Quality Assurance Revolving Fund statute). Track Info Services removed duplicate listings from this list and has included only the Potential WQARF Registry Sites that have a Program Status of Pending PI. DOD, NPL and current WQARF Registry Sites are not included in the Arizona Superfund Program List as they are listed in NPL and the State registry List. Site ID's are identified as SUPERFUND_TISID#.

Potential WQARF sites that are included in the FirstSearch Reports are those cases which are awaiting or undergoing a WQARF preliminary investigation (PI). Possible outcomes of a PI are:

- 1) No further investigation or action
- 2) Registry listing
- 3) Referral to the ADEQ voluntary remediation program
- 4) Referral to another ADEQ program.

According to the Arizona Department of Environmental Quality (ADEQ), prior to July 5, 2000 the ADEQ Superfund Programs Section (SPS) published a list of sites entitled Arizona CERCLIS Information Data System (ACIDS). The ACIDS list has been replaced as an active list by the Arizona Superfund Program List. It has been archived and will no longer be distributed or updated.

Information regarding specific sites on the ADEQ Superfund Program List may be obtained by calling the ADEQ Superfund Information Hotline at (602) 207-4360 or toll free in Arizona at 1 800 234-5677, ext. 4360.

Note: ADEQ maintains map boundaries of NPL sites & DOD sites. They may vary from those maintained by the US EPA and respective regions. Information regarding NPL and DOD site boundaries provided by ADEQ utilized in First Search Reports will be included in the State (ST) database category to supplement the US EPA's NPL information in the federal database categories.

State Spills 90: *AZ DEQ* HAZARDOUS MATERIALS INCIDENT LOGBOOK-The ADEQ Emergency Response Unit documents chemical spills and incidents, which are referred to the unit.

State/Tribal SWL: *AZ DEQ* SOLID WASTE LANDFILLS- The ADEQ Waste Programs Division Recycling and Data Management Unit maintains a list of solid waste facilities (SWATS) identified as active or closed.

State/Tribal LUST: *AZ DEQ* LEAKING UNDERGROUND STORAGE TANKS- ADEQ maintains a list of leaking underground tanks (LUST).

State/Tribal UST/AST: *AZ DEQ/EPA* UNDERGROUND STORAGE TANKS- Under State (A.R.S. 49-1001 to 1014) and federal RCRA Subtitle laws, persons who own or have owned underground storage tanks (UST's) which contain regulated substances are required to complete a notification form and submit it to the State. More than 6500 facilities have notified the State of more than 19,000 underground tanks.

INDIAN LANDS UST LIST- A listing of underground storage tanks currently on Indian lands under federal jurisdiction. Arizona Indian Lands USTs are administered by US EPA Region 9.

State/Tribal IC: *AZ DEQ* ADEQ DEURS AND VEMURS PROGRAM LIST- According to the ADEQ a DEUR (Declaration of Environmental Use Restriction) is a restrictive covenant that must be recorded when the owner of a site with known contamination elects to use either institutional or engineering controls to prevent or minimize exposure to contaminants on the property, or when an owner elects to leave contamination on the property that exceeds the applicable residential soil remediation standard for the property. A previous program, known as VEMUR (Voluntary Environmental Mitigation Use Restriction) has been replaced by the DEUR program but VEMUR record dates and associated data are still provided by the ADEQ for historic purposes.

State/Tribal VCP: *AZ DEQ* ARIZONA VOLUNTARY REMEDIATION PROGRAM LIST- The ADEQ Waste Programs Division maintains a list of Voluntary Remediation Program (VRP) sites. A VRP is an eligible

contaminated site on which voluntary investigation and cleanup measures are taken by property owners, prospective purchasers and other interested parties in cooperation with ADEQ.

State/Tribal Brownfields: *AZ DEQ/EPA* ARIZONA BROWNFIELDS PROGRAM LIST- The ADEQ Waste Programs Division maintains a list of Brownfields sites as part of its Voluntary Remediation Program. To be listed by the ADEQ as a Brownfield a site must meet the following three criteria: it must be an underutilized commercial or industrial site, it must possess redevelopment potential, and that redevelopment potential must be complicated by known or perceived contamination with a hazardous substance as defined by CERCLA. The Brownfields Management System (BMS) is an analytical database designed to assist EPA in collecting, tracking, and updating information, as well as reporting on the major activities and accomplishments of the various Brownfield grant Programs.

RADON: *NTIS* NATIONAL RADON DATABASE - EPA radon data from 1990-1991 national radon project collected for a variety of zip codes across the United States.

State Permits: *AZ DEQ* DRY WELLS REGISTRATIONS LIST- The ADEQ Water Quality Division Water Protection Approval and Permits Section maintains a registry of dry wells that have been constructed solely for the disposal of storm water registered under A.R.S. 49-331-336.

State Other: *AZ DEQ* ZIP ACIDS LIST- Please Note this is no longer a currently active program maintained by the ADEQ, but the Zip Acids List is included in the First Search database for historical reference. The state has established a program under A.R.S. 49-282 to remedy sites, which may have an actual or potential impact upon waters of the State, caused by hazardous substances. The Remedial Projects Section of ADEQ maintains this program. Some remedial projects are governed and funded by the federal CERCLA Superfund program and on the National Priority List. Among the sites in Arizona there are three military bases under the U.S. Dept. of Defense jurisdiction.

ADEQ DEURS AND VEMURS PROGRAM LIST- According to the ADEQ a DEUR (Declaration of Environmental Use Restriction) is a restrictive covenant that must be recorded when the owner of a site with known contamination elects to use either institutional or engineering controls to prevent or minimize exposure to contaminants on the property, or when an owner elects to leave contamination on the property that exceeds the applicable residential soil remediation standard for the property. A previous program, known as VEMUR (Voluntary Environmental Mitigation Use Restriction) has been replaced by the DEUR program but VEMUR record dates and associated data are still provided by the ADEQ for historic purposes.

Historical Title and Environmental Research

HISTORICAL TITLE REPORT

YOUR FILE NO: 09-0026

ALLANDS FILE NO: 2009-02-131T

Date of Report: February 27, 2009

Title Plant Date***: February 18, 2009

***The Title Plant Date reflects the most current data made available by the information sources used at the time the research was performed.

ALLANDS hereby reports a Historical Title Report to the land described below, subject to the items as shown in Schedule B. This is a historical title report ONLY and is neither a guarantee of title, a commitment to insure or a policy of title insurance. Allands is not responsible for errors in the available records. The total liability is limited to the fee paid for this report. This is a confidential, privileged and protected document for the use of GEC.

1. Title to the estate or interest covered by this report is vested in: DOS RIOS MATERIALS, L L C, AN ARIZONA LIMITED LIABILITY COMPANY, AS TO 010E AND 018; AND CARL LEROY WOLFE AND JENNIFER F. WOLFE, HUSBAND AND WIFE, AS TO 014Z
2. By virtue of that certain chain of title attached.
3. The land referred to in this report is located in Maricopa County, Arizona, described as follows:

Assessor's No.: 502-57-010E, 014Z & 018

SEE LEGAL DESCRIPTION ATTACHED

SCHEDULE B

1. Lease by and between the Executrix of the estate of Marguerite E. Iverson, deceased; Ruth E. Styles, a married woman dealing with her sole and separate property; and Helen A. Buirgy, a married woman, dealing with her sole and separate property, Lessors, and Western A G Service, Inc., Lessee, dated 4-7-70, recorded 7-24-70 in Docket 8235, page 731. (018)
2. Unrecorded Lease dated 12-1-70 with Gary D. King as disclosed by Joint Tenancy Deed recorded 4-1-71 in Docket 8613, page 191. (010E)
3. No VEMUR'S, DEUR'S; Environmental Liens, or activity and use limitations, if any, were found currently recorded against the property as searched at the subject county recorders office. ***

*** A.R.S. 49-152. This states that the Director of the Arizona Department of Environmental Quality shall allow property owners, who have voluntarily elected to remediate their property for nonresidential uses, to record in the applicable county recorders office a VEMUR limiting, by legal description, the area necessary to protect public health and the environment to nonresidential uses if contamination remains on the property at or above certain levels. In accordance with Arizona Administrative Code (A.A.C.) R18-7-201 et. Seq., a Declaration of Environmental Use Restriction (DEUR) is a voluntary notice to deed which restricts the use of a property to non-residential use. Effective July 18, 2000, the Declaration of Environmental Use Restriction (DEUR) replaced the Voluntary Environmental Mitigation Use Restriction (VEMUR) as a restrictive use covenant.

LEGAL DESCRIPTION

PARCEL NO. 1: TAX PARCEL NO: 500-78-004E; 500-78-004F; 500-78-005C; 500-78-005D; 500-78-006C; 500-78-006D; 500-78-010B; 500-78-010E; 500-78-010D

Lots 3, 4, 5 and 6 of Section 34, Township 1 North, Range 1 West of the Gila and Salt River Base and Meridian, Maricopa County, Arizona.

PARCEL NO. 2: TAX PARCEL NO: 400-08-015A

The East 30 feet of the Southwest quarter of the Southeast quarter of Section 7, Township 1 South, Range 2 West of the Gila and Salt River Base and Meridian, Maricopa County, Arizona;

EXCEPT the South 33 feet thereof.

PARCEL NO. 3: TAX PARCEL NO: 501-45-002A

That part of the East half of the Northeast quarter of Section 24, Township 3 North, Range 1 West of the Gila and Salt River Base and Meridian, Maricopa County, Arizona, described as follows:

BEGINNING at the Northeast corner of Section 24;

THENCE South to the East quarter corner of said Section;

THENCE West to the Southwest corner of the East half of the Northeast quarter;

THENCE Northeast to the POINT OF BEGINNING;

EXCEPT that portion of said parcel described as beginning 288.20 feet West of the Southeast corner of said Northeast quarter;

THENCE West 235.08 feet;

THENCE North 13 degrees 39 minutes East, a distance of 2379.77 feet to the East line of Section 24;

THENCE South, a distance of 1046.95 feet;

THENCE South 13 degrees 39 minutes West, a distance of 1310.1 feet to the POINT OF BEGINNING.

PARCEL NO. 4: TAX PARCEL NO: 502-57-018; 502-57-019

Lots 3 and 4, Section 34, Township 1 North, Range 2 West of the Gila and Salt River Base and Meridian, Maricopa County, Arizona, according to the Official Plat of Survey of said land of file in the General Land Office;

lgk/escr

EXCEPT from Lot 3 any portion lying within the South Extension of the Buckeye Canal right-of-way.

PARCEL NO. 5: TAX PARCEL NO: 502-57-020; 502-57-016

That part of Tract No. 56, Township 1 North, Range 2 West of the Gila and Salt River Base and Meridian, Maricopa County, Arizona, according to the Official Plat of Survey of said land of file in the General Land Office, more particularly described as follows:

That portion of the Southwest quarter of the Northeast quarter of Section 34, Township 1 North, Range 2 West of the Gila and Salt River Base and Meridian, Maricopa County, Arizona, lying North of the Buckeye Irrigation District South Extension right-of-way and South of a boundary line described as follows:

BEGINNING at a point, 99 feet North of the Buckeye Irrigation Canal South Extension on the East line of the Southwest quarter of the Northeast quarter of Section 34;

THENCE Southwesterly 150 feet to a point 35 feet North of said right-of-way;

THENCE Southwesterly 243 feet to a point 23 feet North of said right-of-way;

THENCE Southwesterly to a point 74 feet North and 338 feet East of the Southwest corner of the Southwest quarter of the Northeast quarter of said Section 34;

THENCE West 305 feet to a point 74 feet North and 33 feet East of the Southwest corner of the Southwest quarter of the Northeast quarter of said Section 34;

THENCE North approximately 312 feet to State Highway 85, said point of intersection being 33 feet East of the point of intersection of the West line of the Southwest quarter of the Northeast quarter of Section 34 with said highway;

THENCE Southwesterly along the South line of said highway to its intersection with the West line of said Southwest quarter of the Northeast quarter.

PARCEL NO. 6: TAX PARCEL NO: 502-57-017

That part of Lot 2, Section 34, Township 1 North, Range 2 West of the Gila and Salt River Base and Meridian, Maricopa County, Arizona, according to the Official Plat of Survey of said land of file in the General Land Office, more particularly described as follows:

A triangular strip of ground lying on the South side of the South Extension Canal of the Buckeye Irrigation Canal, described as beginning at the Southeast corner of said Lot 2 and running North 630 feet;

THENCE Southwest 835 feet;

THENCE East 525 feet to the place of beginning.

PARCEL NO. 7: TAX PARCEL NO: 502-57-014D

The Northeast quarter of the Southeast quarter of the Northwest quarter of the Southeast quarter of Section 34, Township 1 North, Range 2 West of the Gila and Salt River Base and Meridian, Maricopa County, Arizona.

PARCEL NO. 8: TAX PARCEL NO: 502-57-014F

The Northeast quarter of the Southwest quarter of the Northwest quarter of the Southeast quarter of Section 34, Township 1 North, Range 2 West of the Gila and Salt River Base and Meridian, Maricopa County, Arizona.

PARCEL NO. 9: TAX PARCEL NO: 502-57-014S

The East half of the West half of the Northeast quarter of the Northwest quarter of the Southeast quarter of Section 34, Township 1 North, Range 2 West of the Gila and Salt River Base and Meridian, Maricopa County, Arizona.

PARCEL NO. 10: TAX PARCEL NO: 502-57-014C

The Southeast quarter of the Northeast quarter of the Northwest quarter of the Southeast quarter of Section 34, Township 1 North, Range 2 West of the Gila and Salt River Base and Meridian, Maricopa County, Arizona.

PARCEL NO. 11: TAX PARCEL NO: 502-57-012E

The East half of the West half of the Southeast quarter of the Southwest quarter of the Northeast quarter of Section 34, Township 1 North, Range 2 West of the Gila and Salt River Base and Meridian, Maricopa County, Arizona, lying South and East of the Southerly right-of-way line of the South extension of the Buckeye Canal.

PARCEL NO. 12: TAX PARCEL NO: 502-57-014H

The South half of the Southeast quarter of the Northwest quarter of the Southeast quarter of Section 34, Township 1 North, Range 2 West of the Gila and Salt River Base and Meridian, Maricopa County, Arizona.

PARCEL NO. 13: TAX PARCEL NO: 502-57-014E

The Northwest quarter of the Southeast quarter of the Northwest quarter of the Southeast quarter of Section 34, Township 1 North, Range 2 West of the Gila and Salt River Base and Meridian, Maricopa County, Arizona.

PARCEL NO. 14: TAX PARCEL NO: 502-57-014G; 502-57-014K

The South half of the Southwest quarter of the Northwest quarter of the Southeast quarter of Section 34, Township 1 North, Range 2 West of the Gila and Salt River Base and Meridian, Maricopa County, Arizona.

PARCEL NO. 15: TAX PARCEL NO: 502-57-014R

The East half of the East half of the Northwest quarter of the Northwest quarter of the Southeast

lgldescr

quarter of Section 34, Township 1 North, Range 2 West of the Gila and Salt River Base and Meridian, Maricopa County, Arizona.

PARCEL NO. 16: TAX PARCEL NO: 502-57-014R

The West half of the West half of the Northeast quarter of the Northwest quarter of the Southeast quarter of Section 34, Township 1 North, Range 2 West of the Gila and Salt River Base and Meridian, Maricopa County, Arizona.

PARCEL NO. 17: TAX PARCEL NO: 502-57-012D

The East half of the East half of the Southwest quarter of the Southwest quarter of the Northeast quarter of Section 34, Township 1 North, Range 2 West of the Gila and Salt River Base and Meridian, Maricopa County, Arizona, lying South and East of the Southerly right-of-way line of the South extension of the Buckeye Canal.

PARCEL NO. 18: TAX PARCEL NO: 502-57-012D

The West half of the West half of the Southeast quarter of the Southwest quarter of the Northeast quarter of Section 34, Township 1 North, Range 2 West of the Gila and Salt River Base and Meridian, Maricopa County, Arizona, lying South and East of the Southerly right-of-way line of the South extension of the Buckeye Canal.

PARCEL NO. 19: TAX PARCEL NO: 502-57-014Y

The Southwest quarter of the Northwest quarter of the Northwest quarter of the Southeast quarter of Section 34, Township 1 North, Range 2 West of the Gila and Salt River Base and Meridian, Maricopa County, Arizona;

EXCEPT any portion thereof lying within the North 420 feet of the West half of the Northwest quarter of the Northwest quarter of the Southeast quarter of said Section 34;

TOGETHER WITH an easement for ingress and egress over the West 20 feet of the North 420 feet of the West half of the Northwest quarter of the Northwest quarter of the Southeast quarter of said Section 34.

PARCEL NO. 20: TAX PARCEL NO: 502-57-014Y

The Northwest quarter of the Southwest quarter of the Northwest quarter of the Southeast quarter of Section 34, Township 1 North, Range 2 West of the Gila and Salt River Base and Meridian, Maricopa County, Arizona;

TOGETHER WITH an easement for ingress and egress over the West 20 feet of the North 420 feet of the West half of the Northwest quarter of the Northwest quarter of the Southeast quarter of said Section 34.

PARCEL NO. 21: TAX PARCEL NO: 502-57-014Y

The West half of the Southeast quarter of the Northwest quarter of the Northwest quarter of the Southeast quarter of Section 34, Township 1 North, Range 2 West of the Gila and Salt River Base

lg/descr

and Meridian, Maricopa County, Arizona;

EXCEPT any portion thereof lying within the West 20 feet of the North 420 feet of the East half of the Northwest quarter of the Northwest quarter of the Southeast quarter of said Section 34;

TOGETHER WITH an easement for ingress and egress over the West 20 feet of the North 420 feet of the West half of the Northwest quarter of the Northwest quarter of the Southeast quarter of said Section 34.

PARCEL NO. 22: TAX PARCEL NO: 502-57-010D; 502-57-010E

The West half of Tract 59 and that part of Tract 58, Section 34, Township 1 North, Range 2 West of the Gila and Salt River Base and Meridian, Maricopa County, Arizona, lying South of the westerly prolongation of the North line of said Tract 59 and Easterly of the right of way of the Phoenix-Yuma State Highway 85;

EXCEPT that portion of said Tract 58 conveyed to the Buckeye Canal and Land Company in Deed recorded in Book 68 of Deeds, Page 604, records of Maricopa County, Arizona, being a 25 foot strip of land extending 12.50 feet on either side of the following described line:

COMMENCING at or near the point where the South branch of the Buckeye Canal crosses the North line of the South half of the Southwest quarter of said Section 34;

THENCE on a right curve 100 feet to a point 12.50 feet South of the Northeast corner of the Southwest quarter of the Southwest quarter of said Section 34;

THENCE West 900 feet on a line parallel to and 12.50 feet South of the North line of said Southwest quarter of the Southwest quarter;

THENCE on a left curve 450 feet to a point 288.50 feet South of the Northwest corner of Thomas fence; and also

EXCEPT the East 85.00 feet of the West 150.00 feet of the North 70.00 feet of the South 120.00 feet of said Tract 58, as conveyed to Maricopa County, a political subdivision of the State of Arizona, in Deed recorded January 30, 1997, in Document No. 1997-0061817, Official Records of Maricopa County, Arizona, excluding any portion lying with Highway 85.

PARCEL NO. 23: TAX PARCEL NO: 502-59-002E; 502-59-002F;

The South half of the Northwest quarter of Section 35, Township 1 North, Range 2 West of the Gila and Salt River Base and Meridian, Maricopa County, Arizona;

EXCEPT that part lying North and West of the following described line:

BEGINNING at a point on the East line of said Northwest quarter which is 1470 feet South of the Northeast corner of said Northwest quarter;

THENCE Southwest to a point on the West line of said Northwest quarter which is 1700 feet South of the intersection of the South border of Buckeye Canal and the West line of said Northwest quarter.

lyjdesr

TOGETHER WITH a nonexclusive easement for ingress and egress and public utilities as created in instrument recorded in Docket 11523, Page 359, over the East 30 feet of the Northwest quarter of said Section 35, except any portion lying within the above described parcel.

PARCEL NO. 24: 502-59-003B; 502-59-003C; 502-59-008C; 502-59-008E

Lots 3 and 4 (the South half of the Southwest quarter) and the North half of the Southwest quarter of Section 35, Township 1 North, Range 2 West of the Gila and Salt River Base and Meridian, Maricopa County, Arizona;

EXCEPT that portion conveyed to the Flood Control District of Maricopa County, a political subdivision of the State of Arizona, in a Final Order of Condemnation, a certified copy of which recorded February 20, 1997, in Document No. 1997-0108415, Official Records of Maricopa County, Arizona.

L E A S E

THIS INDENTURE OF LEASE, made and entered into this 7th day of April, 1970, by and between ~~Charlotte E. Smith~~ ^{Marguerite E. Iverson}, the duly appointed, qualified and acting Executrix of the estate of Marguerite E. Iverson, deceased, and acting herein as such Executrix; Ruth E. Styles, a married woman dealing with her sole and separate property; and Helen A. Buirgy, a married woman dealing with her sole and separate property, herein collectively referred to as Lessor, and Western Ag Service, Inc., hereinafter referred to as Lessee,

W I T N E S S E T H:

That the Lessor, for and in consideration of the covenants and agreements hereinafter mentioned to be kept and performed by Lessee, has demised and leased to the Lessee the following described property situated in the County of Maricopa, State of Arizona, to-wit:

Lots Three (3) and Four (4) of Section Thirty-four (34) in Township One (1) North, Range Two (2) West of the Gila and Salt River Base and Meridian, Maricopa County, Arizona;

That portion of the Southwest Quarter of the Northeast Quarter (SW 1/4 NE 1/4) of Section Thirty-four (34), Township One (1) North, Range two (2) West, Gila and Salt River Base and Meridian, Maricopa County, Arizona, lying North of the Buckeye Irrigation District South Extension Right of Way, and lying South of a boundary line described as follows: BEGINNING at a point 99 feet North of the Buckeye Irrigation District South Extension Right of Way on the E. line of the Southwest Quarter (SW 1/4) of the Northeast Quarter (NE 1/4) of Section 34; thence southwesterly 150 feet to a point 35 feet North of the said right of way; thence southwesterly 243 feet to a point 25 feet North of said Right of Way; thence southwesterly to a point 74 feet North and 338 feet East of the Southwest corner of the Southwest Quarter (SW 1/4) of the Northeast Quarter (NE 1/4) of said Section 34; thence West 305 feet to a point 74 feet North and 33 feet East of the Southwest corner of the Southwest Quarter (SW 1/4)

DKT 8235 PAGE 732

of the Northeast Quarter (NE 1/4) of Section 34; thence North approximately 312 feet to U. S. Highway 80, said point of intersection being 33 feet East of the Point of Intersection of the West line of the Southwest Quarter (SW 1/4) of the Northeast Quarter (NE 1/4) of Section 34 with said Highway;

A triangular strip of ground lying on the South side of the South Extension Canal of the Buckeye Irrigation Canal described as: BEGINNING at the Southeast corner of the Northeast Quarter of the Northeast Quarter (NE 1/4 NE 1/4) of Section Thirty-four (34) and running North 630 feet, thence Southwest 835 feet, thence East 525 feet to the place of beginning. All in Section Thirty-four (34), Township One (1) North, Range Two (2) West of the Gila and Salt River Base and Meridian, Maricopa County, Arizona.

together with the improvements, pump, motor and well now located on the said premises, to have and to hold the same unto the Lessee from the 1st day of January, 1971, to and including the 31st day of December, 1975; and the Lessee, in consideration of the leasing of the premises as set forth hereinabove, covenants and agrees to and with the Lessor to pay the said Lessor's rent for the same the sum of ONE THOUSAND FIVE HUNDRED DOLLARS (\$1,500.00) annually, payable as follows:

\$1,500.00 on or before January 1, 1971, to be applied to the annual rental for 1971; and thereafter

\$1,500.00 per annum, due and payable on or before January 1st of each succeeding year.

It is further agreed by the parties hereto that Lessee shall have an option to purchase the above described property at any time during the tenure of this Lease for the full purchase price of TWENTY-EIGHT THOUSAND DOLLARS (\$28,000.00), said option to be exercised by notice to the Lessor, the terms of said purchase to be worked out between the Lessor and Lessee.

It is further mutually agreed between the parties as follows:

DKT 8235 PAGE 733

1. If the whole of the leased premises or the major portion thereof shall be acquired or condemned by eminent domain or condemnation for any public or quasi public use or purpose, then the term of this Lease shall cease and terminate as of the date of title vesting in such proceeding and all rental shall be paid up to the date and Lessor shall have no claim against Lessee for the value of any unexpired term of this Lease.

Damages awarded either for a taking of the whole of the premises, or for taking any part of the premises, shall be paid as follows:

Lessor shall receive any part of the award attributable to the land, including severance damages;

Lessee shall receive any portion of the award attributable to the diminution in the value of its leasehold interest, including improvements placed upon the property by Lessee.

2. Lessor covenants and agrees that all taxes on said property have been paid and that no liens exist against said property which shall in any way impair the covenants and agreements herein made in this Lease.

3. Lessor agrees and covenants that Lessee, upon execution of this Lease Agreement, shall be let into possession of said premises and enjoy peaceful and quiet possession thereof.

4. Lessee agrees that upon the expiration of the time mentioned in this Lease, and in the event the option to purchase heretofore set forth in this Lease is not exercised, that peaceable possession of said premises shall be given to Lessor in as good a condition as they are at the time of execution of this Lease, usual wear and tear and inevitable accident and loss by fire excepted.

DKT 8235 PAGE 734

5. Lessee agrees not to sublet or let the whole or any part of said premises without the consent of the Lessor, which shall not be unreasonably withheld.

6. Lessor covenants and agrees to assign the cotton allotment on the leased premises to Lessee and to execute and prepare all necessary documents to accomplish said assignment, said assignment to be effective during the term of this Lease. Lessee also shall have the right, with Lessor's written consent which shall not be unreasonably withheld, to sublet said cotton allotment to other persons for use off the leased premises. Lessor agrees to execute and prepare all necessary documents to accomplish said subletting during the term of this Lease. For the purpose of complying with this paragraph Lessor appoints Ruth E. Styles as the agent of all the Lessors herein for the purpose of assigning the cotton allotment to Lessee or for the purpose of consenting to the subletting of the allotment by Lessee to others.

7. In the event the option to purchase heretofore granted to Lessee is exercised during the term of this Lease, it is agreed and covenanted that none of the annual payments made under this Lease shall apply to the purchase price. It is agreed by Lessor that if the option to purchase heretofore granted to Lessee in this Lease is exercised it shall include the well on said premises, and Lessor will execute to Lessee any and all necessary documents to convey title to the property in question, including the well on said property and the rights to operate said well, including but not limited to all permits and rights granted by the state, county, municipality or any other governmental agency for the operation of said well.

8. All notices and other matters directed to the

DKT 8235 PAGE 735

Lessor shall be mailed to:
5301 W. Virginia
3044 West Polk
Phoenix, Arizona

and to Lessee at

P. O. Box 516
Buckeye, Arizona

and to such other place or places as may be designated in writing by the parties from time to time during the term hereunder or any extension or renewal thereof.

9. In case Lessee shall not pay the rentals coming due hereunder at or before the due date, then Lessor may either distrain for said rent due or declare this Lease at an end and recover possession of the leased premises as in cases of forcible detainer. In the event this Lease shall be terminated for any reason, then the option to purchase herein extended shall thereafter be void; and in any event Lessee shall not be entitled to exercise said option at any time when Lessee is in default in the performance of the covenants and conditions of this Lease.

10. This Agreement shall extend to and be binding upon the heirs, administrators, executors and assigns of the parties hereto; time is of the essence of this Lease.

IN WITNESS WHEREOF the parties have hereto set their hands the day and year first above written.

USER QUESTIONNAIRE FOR PHASE I ENVIRONMENTAL SITE ASSESSMENTS

The new All Appropriate Inquiry (AAI, 40 CFR 312) requirements and guidance on conducting Phase I Environmental Site Assessments (ESA) have requirements for the "User" of the assessment. The User is responsible for providing information on the following issues in an attempt to qualify for landowner liability protection (LLPs). This information should be provided to the Environmental Professional for incorporation into the Phase I ESA report. Please check yes or no, or if you do not want to provide this information to us, please state this fact on the lines provided. In addition, please provide any additional information you may have regarding the Site.

(1) Environmental cleanup liens that are filed or recorded against the Site (40 CFR 132.25). Are you aware of any environmental cleanup liens against the Site that are filed or recorded under federal, tribal, state, or local law?

YES NO

If yes, please explain:

(2) Activity and land use limitations that are in place on the Site or that have been filed or recorded in a registry (40 CFR 312.26). Are you aware of any activity use limitations (AULs), such as engineering controls, land use restrictions, or institutional controls that are in place at the Site and/or have been filed in a registry under federal, tribal, state, or local law? YES NO

If yes, please explain:

(3) Specialized knowledge or experience of the person requesting the Phase I ESA and seeking to qualify for the landowner liability protections (40 CFR 312.28). As the user of this ESA, do you have any specialized knowledge or experience related to the Site or adjoining properties? For example, are you involved in the same line of business as the current or former occupants of the Site or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? YES

NO

If yes, please explain:

(4) Relationship of the purchase price to the fair market value of the property, if it were not contaminated (40 CFR 312.29). Does the purchase price offered for this property reasonably reflect the fair market value of the Site? YES NO

If there is a difference between the purchase price and the fair market value, have you considered the lower purchase price is because of contamination is known or believed to be at the Site?

Please discuss:

(5) Commonly known or reasonably ascertainable information about the Site (40 CFR 312.30). Are you aware of commonly known or reasonably ascertainable information about the Site that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,

- (a) Do you know the past uses of the Site? YES NO
- (b) Do you know of specific chemicals that are present or once were present at the Site?
 YES NO
- (c) Do you know of spills or other chemical releases that have taken place at the Site?
 YES NO
- (d) Do you know of any environmental cleanups that have taken place or are ongoing at the Site?
 YES NO

If yes, please explain:

(6) The degree of obviousness of the presence or likely presence of contamination at the Site and the ability to detect the contamination by appropriate investigation (40 CFR 312.31). As the user of this ESA, based on your knowledge and experience related to the Site, are there any obvious indicators that point to the presence or likely presence of contamination at the Site? YES NO

If yes, please explain:

Presence of debris along bank
