SES OF THE NEW YORK OF THE PART OF THE PAR

NOTICE OF INTENT TO DISCHARGE (NOID) ON-SITE WASTEWATER TREATMENT FACILITY CHECKLIST

NOID APPLICATIONS FOR TREATMENT AND DISPOSAL WORKS SYSTEM DESCRIBED IN R18-9-E303 THROUGH R18-9-E323 MUST INCLUDE ALL APPLICABLE ITEMS ON THIS CHECKLIST, IF NOT ALREADY SUPPLIED WITH THE PHASE I APPLICATION. INCOMPLETE OR INACCURATE SUBMITTALS MAY RESULT IN REVIEW OR APPROVAL DELAYS OR DENIAL OF APPLICATIONS PRIOR TO THE EXCEEDANCE OF THE LICENSING TIME FRAMES.

Applicant	MCESD	ITEMS REQUIRED FOR ALL APPLICATION SUBMITTALS
		Complete NOID application, signed by owner OR owner's agent
		Vicinity map and detailed driving directions to the site (Sample Vicinity Map)
		One (1) complete site plan, with north arrow, at a scale of 1"=10', 1"=20', or 1"=30'. For large parcels, use an appropriate scale to fit entire parcel on one sheet. The proposed on-site system, the structure(s) it serves, and the immediate area may be contained within the dimensions of the parcel drawing or on a separate sheet. Site plans must include the items described in R18-9-A309.B. including project information block, parcel dimensions, test holes, structures, driveways, concrete or paved features, washes, easements, wells, earth fissures (Earth Fissure Map), water lines, and any feature within 200' that constrains to location of the designated primary or reserve onsite wastewater treatment facility area (Standard Setback Requirements). Topography must be delineated with an appropriate contour interval, with original and post-installation grades including any slopes greater than 15 percent.
		One copy of complete floor plan(s) of the entire structure(s) served by the onsite wastewater treatment facility(s) with all rooms identified and plumbing fixtures clearly labeled. Plans should include walls, windows and doorways. (Sample Floor Plans)
		Design documents that include: fixture unit and bedroom equivalent determination (or method of daily design flow calculation for non-residential properties), soil absorption rate (SAR) daily design flow (in gallons per day), and calculation of system size. (Sample design documents)
		Copies of soil/site evaluations, percolation tests or seepage pit performance tests
		List of estimated materials, components, and equipment for constructing the on-site wastewater treatment facility (Materials, Components, and Equipment List)
		Applicable fees, payable by cash, check, Visa, MasterCard, Discover, or American Express at time of submittal
ITEMS RE	EQUIRED F	OR AN ALTERNATIVE/ENGINEERED ONSITE WASTEWATER TREATMENT FACILITY
		For Alternative/Engineered On-Site Wastewater Treatment Facilities (permitted under R18-9-E303 through R18-9-E323), the design documents must also include:
		Construction-quality drawings that indicate:
		Systems, subsystems and key components, including manufacturer's name, model number and associated construction notes and inspection milestones, as applicable
		Title block, including facility owner, revision date and page numbers
		Plan profile with elevations of wastewater pipelines and treatment and disposal components, including calculations justifying the absorption area
		Cross sections showing wastewater pipelines, construction details and elevations of treatment and disposal components, and original and finished grades of the land surface, seasonal high water table if less than 10 feet below the bottom of a disposal works or 60 feet below the bottom of a seepage pit and a soil evaluation to allow verification of installation design and performance
		Drainage pattern, drainage controls and erosion protection, as applicable, for the facility
		Draft operation and maintenance manual for the on-site wastewater treatment facility, consisting of the tasks and schedules for operating and maintaining performance over a 20-year life
		Any additional design requirements as listed under R18-9-E303 through R18-9-E323

March 2021 Page **1** of **2**

A statement signed by the applicant indicating that: The applicant is aware that although a septic tank and disposal works system described in R18-9-E302 is appropriate for the site, the applicant desires to install a treatment works or disposal works authorized under R18-9-E302 through R18-9-E322 and the applicant is aware that a treatment works or disposal works authorized under R18-9-E303 through R18-9-E322 may re in higher capital, operation, and maintenance costs than a septic tank and disposal works system described R18-9-E302.
